Date and Time Products Delivered to Incident:		Digital files: Posted to: <ul style="list-style-type: none"> • ftp.wildfire.gov/incident_specific_data/ • NIFS Emailed to:	
Comments /notes on tonight's mission and this interpretation: This was the first IR scan for this fire. I did use the current NIFS perimeter as a starting point. This fire was active on all flanks with a very intense heat front on the eastern flank. There was intense and scattered heat throughout the interior of the majority of the fire.
