Working with Heavy Equipment

Fundamental safety principles for heavy equipment operations have been established based on repeated lessons learned following serious accidents. To protect equipment operators and operational personnel from exposure to potential traumatic injury or death when working around heavy equipment, the following safety procedures should be applied to all activities. Fireline supervisors should continue to monitor all heavy equipment operations to ensure the following safe job procedures are consistently applied (reference page 86 IRPG):

- When working around heavy equipment in timber stay a **MINIMUM OF TWO AND ONE HALF (2.5) TIMES THE HEIGHT OF THE CANOPY HEIGHT IN ALL DIRECTIONS.**
- No one but the operator should ride on the equipment.
- Never approach equipment until you have eye contact with operator, all implements have been lowered to the ground and/or powered down, and equipment is idled down.
- Avoid working downhill from equipment.
- Use headlight, strobe light, and/or glow sticks at night so operator can see you.
- Establish visual and radio communications prior to engaging.
- Communicate all hazards to the operator.
- Equipment operators have difficulty seeing ground personnel: **TAKE RESPONSIBILITY FOR YOUR SAFETY AND THOSE AROUND YOU.**
-

Hazard Inventory Tool – Leland Complex

Please take the 5 minutes & fill out the Hazard Inventory Tool. Your assessment of safety hazards is greatly appreciated.

EA Gold Team Safety Group: Terry Trapp (SOF2), Kurt Schierenbeck (SOF2), Kim Lemke (SOF2)

Eastern Area Gold Team Health and Wellness

Leader and Team intent is to utilize the most current and effective CDC, NWCG, local health department and Agency guidance to ensure the safety and health of ALL resources on this incident, achieve mission success, and allow all resources to safely move to the next incident.

DAILY SCREENING:

The "Am I fit" questions and self-screening will be the responsibility of each individual on the incident.

Am I Fit Screening Tool

FACE MASKS

Follow all CDC guidelines and Agency guidelines, be prepared to follow more restrictive local guidelines.

- If you are not fully vaccinated and aged 2 or older, you should wear a mask in indoor public places.
- In general, you do not need to wear a mask in outdoor settings.
- In areas with high numbers of COVID-19 cases, consider wearing a mask in crowded outdoor settings and for activities with close contact with others who are not fully vaccinated.
- If you are fully vaccinated and have a condition or are taking medications that weaken your immune system, you may need to keep taking steps to protect yourself, like wearing a mask. Talk to your healthcare provider about steps you can take to manage your health and risks.
- Masks are required on planes, buses, trains, and other forms of public transportation traveling into, within, or out of the United States and in U.S. transportation hubs such as airports and stations. Travelers are not required to wear a mask in outdoor areas of a conveyance (like on a ferry or the top deck of a bus). CDC recommends that travelers who are not fully vaccinated continue to wear a mask and maintain physical distance when traveling.

SANITIZING AND DISTANCING

You should follow best sanitizing practices including handwashing, cleaning of common surfaces, and respecting the personal space/distancing needs of all other resources on this incident.

2020 incident statistics indicate that sanitizing practices reduce respiratory infectious diseases (common cold, other camp related virus, COVID-19).

Eastern Area Gold Team thanks you in advance for all your efforts to help us keep everyone safe and healthy.

FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: 3	INCIDENT TYPE: Wildfire
FIRE NAME: Leland Complex	OPERATIONAL PERIOD: July 21, 2021 0600-2000
DATE ISSUED: July 20, 2021	TIME ISSUED: 1900
UNIT: ID-PDS	PREPARED BY: Mike Bowden FBAN
INPUTS	
WEATHER SUMMARY: See Fire Weather Forecast for specifics for Sand Mountain and Johnson Creek fires. Sky/Weather: RED FLAG WARNING IN EFFECT FROM 1100 to 2100 HOURS FOR STRONG WINDS.	
FUELS & FUEL MOISTURE: The fires are burning in all age and size classes of conifer fuels. Crown base height varies based on age. Surface fuel amounts increase with the age of the stands. Dead and down, logging and thinning slash will contribute to fire spread and intensity. Herbaceous and live woody fuels are green and will generally not actively burn. All dead fuels are very dry. ERC: Above 97% 1000 Hour FM: 7% 100 Hour FM: 8%	
OUTPUTS - FIRE BEHAVIOR	
<u>GENERAL:</u> The predicted increased winds will change the fire behavior today. Where the fire is exposed to west winds, expect the fire to become active, especially in drainages that run east/west and on ridgetops. Expect single tree/group torching and short range spotting in these situations. Backing and flanking with very dry fuels driving fire spread will continue in areas not exposed to the wind. When the fire gets in alignment with slope expect upslope movement with single and small group torching.	
<u>SPECIFIC:</u>	
<i>Sand Mountain Fire:</i>	
DIVS A – This division should be sheltered from the west winds and continue to flank and back.	
DIVS M – The west wind will push heat and smoke back into the burned area reducing any threats to the control line. Be aware that the wind may cause more snags to come down in the higher elevation areas of the division.	
DIVS Z – Expect to find continued heat as the heavy fuels continue to consume.	
<i>Johnson Creek Fire:</i>	
NORTH: The predicted west wind will push the fire in the upper Shite Creek Drainage to the east. Expect active flanking with torching and short range spotting. Flame lengths with be 3 to 5 feet. The fire edge should move to the east approximately ¼ mile during the burning period.	
SOUTH: The east edge of the fire is exposed to the wind and will move ¼ to ½ mile east during the burning period. Expect flame lengths of 4 to 5 feet, single tree/group torching, and spotting up to 0.2 mile downwind. The fire may push and bump the southern dozer line. If it reaches this line, it will likely cross it.	
AIR OPERATIONS: The gusty winds in the afternoon may limit the use of aircraft.	
SAFETY: Today will be a heads up day. Be sure to establish trigger points, use lookouts, have good communications so you can disengage and move to safe areas with plenty of time.	

****Base all action on current and expected fire behavior****
