INCIDENT: Leland Complex (Sand Mountain)
UNIT: Ponderosa Supervisory Area Office

Incident Meteorologist: Robert Rickey

Weather Discussion: For today, expect a round of sunny, cool and dry weather. Westerly ridgetop winds are forecast to be similar, but slightly higher than yesterday. On slopes and within drainages, terrain will determine direction and speed, with the strongest upslope winds on west aspects. Afternoon humidity will drop into the 20% range, with the lowest humidity on southern aspects at lower elevations. Expect light downslope winds into the Big Sand Creek drainage overnight and poor humidity recoveries. Over the weekend, high pressure will strengthen over the area causing a continuation of dry conditions and warming temperatures. The highest temperatures and lowest humidity is forecast for Sunday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	INCIDENT TYPE: Wildfire
FIRE NAME: Leland Complex	OPERATIONAL PERIOD: July 23, 2021 0600-2000
DATE ISSUED: July 22, 2021	TIME ISSUED: 1900
UNIT: ID-PDS	PREPARED BY: Mike Bowden FBAN

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for specifics for Sand Mountain and Johnson Creek fires.
Sky/Weather: Sunny and Hazy. High Temps: Mid 70's to low 80's. RH: 20-28%

FUELS & FUEL MOISTURE: The fires are burning in all age and size classes of conifer fuels. Crown base height varies based on age. Surface fuel amounts increase with the age of the stands. Dead and down, logging and thinning slash will contribute to fire spread and intensity. Herbaceous and live woody fuels are green and not contributing to fire spread or intensity. All dead fuels are very dry and available to burn.

ERC: Above 97% 1000 Hour FM: 7% 100 Hour FM: 8%

OUTPUTS - FIRE BEHAVIOR

GENERAL:

Expect fire behavior to pick up once the fuels receive direct solar radiation. The east facing slopes will pick up in activity in the mid-morning with south and west facing following shortly behind. The Johnson Creek fire has a few places where the fire is aligned with slope which could lead to some heading fires. Flame lengths should be around 4 feet. Single tree and small group torching with short range spotting is likely. The upslope rate of spread will be slow, around 150 feet per hour. Elsewhere on both fires, expect backing and flanking spread with minimal intensity except where the fire gets into jackpots of fuel. Isolated single tree torching will occur along all active fire edges.

SPECIFIC:

Sand Mountain Fire:

DIVS A – The fire is hung up in the Duel Creek drainage and a young stand of timber. The fire adjacent to the creek is smoldering and creeping. The young stand to the west has an unchecked fire edge but is not moving due to limited fuels. Current fire behavior is such that direct attack in this area should be successful. The triangles of older timber above DP 40 and just south of the division break will continue to flank and back towards Big Sand Creek Road. Single tree torching is expected in this area. Be on the lookout for spots if the smoke from trees torching blows across Big Sand Creek Road.

DIVS M – The fire will continue to smolder and creep along the edge of the young timber stand near H-20. The fire intensity should allow the continued direct attack efforts in this area.

DIVS Z – Continued smoldering of un-mopped up fuels will continue.

Johnson Creek Fire:

DIV Y: Expect continued backing and flanking behavior with single tree torching. The fire will continue to move slowly down towards Shite Creek.

DIV B: Continued slow movement to the south and east is expected. Flame lengths should be 2 to 4 feet. Single tree and small group torching is likely. The fuels removed from the "clipper line" will continue to hold heat around the slopover and cause holding problems. Expect the fire to move around 1/8 mile during the burning period. Fire intensity on the western edge should allow planned direct attack efforts to be successful.

AIR OPERATIONS: Air conditions should allow use of aircraft throughout the operational period.

SAFETY: The fire ground is very steep, with heavy fuels and limited visibility. Assess the fuel and topography hazards before engaging. Be sure you have lookouts that can detect and communicate changes in fire behavior.

****Base all action on current and expected fire behavior****

Driving & Traffic Safety

Fundamental safety principles for driving and traffic safety have been established based on repeated lessons learned following serious accidents. To protect operational personnel from exposure to potential traumatic injury or death when driving, the following safety procedures should be applied to all activities. Fireline supervisors should continue to monitor all operations to ensure the following safe job procedures are consistently applied:

- Practice “Defensive Driving” techniques traveling on all roads and city streets.
- Keep clutter off dash and inside cab.
- Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts.)
- Always use headlights.
- Yield to pedestrians and bicycles.
- Observe posted speed limits.
- Use the 3 second rule for following distance when driving.
- Avoid distractions (eating, cell phones, texting, radio).
- Ensure that windshields are kept clean of dust and bugs.

Conducción y seguridad vial

Los principios fundamentales de seguridad para la conducción y la seguridad vial se han establecido sobre la base de las repetidas lecciones aprendidas después de accidentes graves. Para proteger al personal operativo de la exposición a posibles lesiones traumáticas o muerte al conducir, se deben aplicar los siguientes procedimientos de seguridad a todas las actividades. Los supervisores de Fireline deben continuar monitoreando todas las operaciones para garantizar que los siguientes procedimientos de trabajo seguro se apliquen de manera consistente:

- **Practique técnicas de "conducción defensiva" viajando por todas las carreteras y calles de la ciudad.**
- **Mantenga el desorden fuera del tablero y dentro de la cabina.**
- **Siga la conducción de LCES (luces, bloques de cuña, freno de emergencia, cinturones de seguridad.)**
- **Utilice siempre faros.**
- **Ceder ante peatones y bicicletas.**
- **Observe los límites de velocidad publicados.**
- **Utilice la regla de 3 segundos para seguir la distancia al conducir.**
- **Evite distracciones (comer, teléfonos celulares, mensajes de texto, radio).**
- **Asegúrese de que los parabrisas se mantengan limpios de polvo y errores.**

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED/PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW/PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN/PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of incident within an incident <i>(Ex: TFLD Jones)</i>

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication
