

# Leland Complex

## Incident Action Plan

0600-2000

Saturday July 24, 2021

<u>Leland Complex</u>	ID-PDS-000614	State Code: PDS99721	Fed Code: PN N5F0
<u>Johnson Creek</u>	ID-CTS-000550		Fed Code: PN N5DK
<u>Sand Mountain</u>	ID-PDS-000585	State Code: PDS01321	Fed Code: PN N5AT
<u>Pine Creek</u>	ID-PDS-000544	State Code: PDS01121	Fed Code: PN N464

QR Code to download the IAP and maps

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>Leland Complex</b>	2. Date <b>July 23, 2021</b>	3. Time <b>1700</b>
----------------------------	---	---------------------------------	------------------------

4. Operational Period: Saturday July 24, 2021, 0600-2000

5. General Control Objectives for the Incident
- Provide for firefighter and public safety. All known hazards will be identified and mitigated through the risk management process.
  - Protect valuable assets including structures, infrastructure (especially the Elk Butte communications tower), timber agricultural crops and the watershed for Elk River.
  - Maintain a work environment that is free from unlawful discrimination, retaliation, and sexual/non-sexual harassment.
  - Effectively manage the costs of the incident by planning strategies and tactics with a high probability of success in meeting objectives.
  - Keep retardant out of waterways and riparian areas and properly report mishaps in avoidance areas.
  - Mop-up utilizing weather and fuels conditions that will allow the fire to stay within existing control lines.
  - Initial attack response with in the TFR and assist, as possible, with resources outside the TFR.
  - Keep Clearwater and/or Latah County emergency services coordinator, county commissioners, the sheriffs and the public informed of incident activity and status.

5a. Management Objectives

In order to protect high valued timbered lands, structures, recreational infrastructure, recreation lease sites, private recreation sites, culturally sensitive areas, established mining claims, and critical travel corridors, keep fire:

At Sand Mountain; East of Little Sand Creek South of the Palouse River West of Big Sand Creek North of Moose Creek/Sand Mountain Divide.	For Johnson Creek Fire; East of Elk Creek, South of Trestle and Shite Creeks, West of Windy Point Road, North of Partridge Creek.
--	---

- 5b. Commander's Intent
- Provide the highest level of customer service to all involved with, or impacted by, the fires within the Leland Complex. Ensure transparent, timely and accurate communication at all levels of the incident. All incident assigned personnel should be advised and prepared to take the appropriate actions regarding:
- Professional behavior and conduct at all times.
  - Timely and effective communication.
  - Personal safety and the safety of others includes driving slowly, safely and defensively.
  - Fatigue management by taking breaks and maintaining appropriate work/rest cycles.
  - Minimize risk and limit exposure to COVID-19 by following agency and established CDC guidelines.
  - Effective management of incident costs by planning strategies and tactics toward a high probability of success in meeting incident objectives.
  - Minimize fire impacts to residences, commercial property, critical community infrastructure (especially the Elk Butte repeater), timber, agricultural crops, natural resources, cultural sites and watersheds.
  - Maximize protection of the soil, water and cultural resources.
  - Minimize the spread of exotic species.

# Safety Message

Incident: Leland Complex	Date: 7/24/2021	Shift: Day
-----------------------------	--------------------	---------------

## How to Properly Refuse Risk (IRPG pg 19-20)

When an individual feels an assignment is unsafe they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

A “turn down” is a situation where an individual has determined they cannot undertake an assignment as given and they are unable to negotiate an alternative solution.

The turn down of an assignment must be based upon an assesment of risks and the ability of the induvidual or organization to control those risks. Individuals may turn down an assignment as unsafe when:

- There is a violation of safe work practices.
- Environmental conditions make the work unsafe.
- They lack the necessary qualifications or experience
- Defective equipment is being used.

See IRPG page 20 for turn down procedure.

### Hazard Inventory Tool – Leland Complex

Please take the 5 minutes & fill out the Hazard Inventory Tool. Your assesment of safety hazards is greatly appreciated.

## Cómo rechazar adecuadamente el riesgo (IRPG pg 19-20)

Cuando un individuo siente que una asignación es insegura, también tiene la obligación de identificar, en la medida de lo posible, alternativas seguras para completar esa asignación. Rechazar una asignación es un posible resultado de la gestión del riesgo.

Un "rechazar" es una situación en la que un individuo ha determinado que no puede llevar a cabo una asignación como se le dio y son incapaces de negociar una solución alternativa.

La disminución de una asignación debe basarse en una evaluación de los riesgos y en la habilidad de la industria u organización para controlar esos riesgos. Los individuos pueden urnabajo de una asignación como insegura cuando:

- Hay una violación de las prácticas de trabajo seguras.
- Las condiciones ambientales hacen que el trabajo sea inseguro.
- Carecen de las cualificaciones o la experiencia necesarias
- Se están utilizando equipos defectuosos.

Consulte la página 20 del IRPG para el procedimiento de desactivación.

## Herramienta de inventario de peligros – Complejo Leland

Por favor, tómese los 5 minutos & complete la Herramienta de Inventario de Peligros. Su evaluación de los peligros para la

**Fire Weather Forecast**

**FORECAST NO: #6**  
**PREDICTION FOR: Saturday**  
**OPERATIONAL PERIOD: July 24 2021**  
**FORECAST ISSUED: 7/23/2021 at 1900**

**INCIDENT: Leland Complex (Sand Mountain)**  
**UNIT: Ponderosa Supervisory Area Office**

*Incident Meteorologist: Robert Rickey*

**Weather Discussion:** For today, expect a round of sunny, warm and dry weather. Ridgetop winds will generally be light and from the west. On slopes and within drainages, terrain will determine direction and speed, with the strongest upslope winds on west aspects. Afternoon humidity will drop into the 20% range, with the lowest humidity on southern aspects at lower elevations. Expect light downslope winds into Big Sand Creek drainage overnight and poor humidity recoveries, especially in the thermal belt above 3500 feet. Hotter and slightly drier conditions are forecast for Sunday and Monday, but increasing cloud cover will move into the area by Monday afternoon. Otherwise, westerly ridgetop winds will continue.

**WEATHER FORECAST**

**Today:**

**Weather:** Sunny, but hazy.  
**High Temperatures:** 81-87  
**Min RH:** 19-25%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 3-6 mph through 1100. After 1100, increasing to W 2-5 mph with gusts 8-11.  
**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 6-9 mph after 1200 on west aspects.  
**Chance of Wetting Rain ( $\geq 0.10''$ )...0% LAL...1 Haines Index...4 (Low)  
**Mixing Height...**6,000 ft AGL **Transport Wind...**W 5 mph **Inversion Break Time...**1100**

**Tonight:**

**Weather:** Clear, but hazy.  
**Low Temperatures:** 56-62  
**Max RH:** 46-52%, with the lowest recoveries in the thermal belt above 3500 feet.  
**20 FOOT WINDS:**

**Ridgetops:** W 2-5 mph with gusts 8-11 mph through 1900. After 1900, variable 2-4 mph.  
**Slopes/Valleys:** Upslope 3-6 mph, becoming downslope 2-4 mph after 2200.  
**Chance of Wetting Rain ( $\geq 0.10''$ )...0% LAL...1 Haines Index...4 (Low)**

**Outlook for Sunday: \*\*\*Hottest and Driest Day\*\*\***

**Weather:** Sunny, but hazy.  
**High Temperatures:** 85-91  
**Min RH:** 17-23%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 2-4 mph through 1000. After 1000, increasing to W 4-7 mph with gusts 11-15.  
**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 9-12 mph after 1100 on west aspects.  
**Chance of Wetting Rain ( $\geq 0.10''$ )...0% LAL...1 Haines Index...4 (Low)  
**Mixing Height...**9,000 ft AGL **Transport Wind...**W 15 mph**

**Extended Outlook for Monday:**

**Weather:** Partly cloudy in the morning, becoming mostly cloudy in the afternoon.  
**High Temperatures:** 84-90  
**Min RH:** 18-24%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 3-6 mph through 1000. After 1000, increasing to W 4-7 mph with gusts 11-15.  
**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 9-12 mph after 1100 on west aspects.

**FIRE BEHAVIOR FORECAST****FORECAST NUMBER: 6****INCIDENT TYPE: Wildfire****FIRE NAME: Leland Complex****OPERATIONAL PERIOD: July 24, 2021 0600-2000****DATE ISSUED: July 23, 2021****TIME ISSUED: 1900****UNIT: ID-PDS****PREPARED BY: Mike Bowden FBAN****INPUTS****WEATHER SUMMARY: See Fire Weather Forecast for specifics for Sand Mountain and Johnson Creek fires. Sky/Weather: Sunny and Hazy. High Temps: 81-87 RH: 19-25%****FUELS & FUEL MOISTURE: The fires are burning in all age and size classes of conifer fuels. Crown base height varies based on age. Surface fuel amounts increase with the age of the stands. Dead and down, logging and thinning slash will contribute to fire spread and intensity. Herbaceous and live woody fuels are green and not contributing to fire spread or intensity. All dead fuels are very dry and available to burn.****ERC: Above 97% 1000 Hour FM: 7% 100 Hour FM: 8%****OUTPUTS - FIRE BEHAVIOR****GENERAL:**

Several days of decreased smoke and haze along with low relative humidity has increased activity. Expect very similar fire behavior today. Smoke will linger until around 1200 hours. Once it clears activity will pick up. The Johnson Creek fire southeast corner will continue to try to push towards the clipper line but the effect use of aircraft has prevented the fire from moving during the day. A thermal belt has been setting up each night around 3500' feet so any active fire above this threshold will burn all night. In areas with open line, expect the fire to advance beyond where it was the end of shift the day before. Single tree and small group torching with short range spotting is likely on both fires. When aligned with slope, flame length will be around 4 feet but rate of spread will be slow, around 150 feet per hour. Elsewhere on both fires, expect backing and flanking spread with minimal intensity except where the fire gets into jackpots of fuel.

**SPECIFIC:*****Sand Mountain Fire:***

**DIVS A –** The fire is holding along Big Sand Creek and Duel Creek. Keep on the lookout for burning trees that fall across the creek or road as this will provide a fire pathway. The fire continues to work its way through the pocket north of DP40. This activity will continue. Expect single tree torching where heat is present in the division.

**DIVS M –** Fire intensity will allow the direct attack efforts between H-20 and the division break to be successful. Some limited torching is likely.

**DIVS Z –** No significant activity is expected; heavy fuels interior will continue to burn out.

***Johnson Creek Fire:***

**DIV Y:** The fire will continue to back and flank towards Shite Creek. Higher up on the slope, the fire is exposed to the forecasted west wind and should move to the east. Single tree torching and burning material rolling downslope will lead to short range spotting.

**DIV B:** The eastern edge of the fire, south of Johnson Creek, will try to move upslope towards the clipper line west of H-3. The use of bucket drops has slowed this progression during the daylight hours but expect some movement overnight. The fire north of Johnson Creek is struggling to move through this area due to the high amount of green live fuels. Flame lengths in heavy timber should be 2 to 4 feet. Single tree and small group torching is likely. Fire intensity on the southwestern edge should allow direct attack efforts to be successful.

**AIR OPERATIONS: Smoke will should dissipate by 1200 hours allowing for use of aircraft.****SAFETY: Direct view of the fires is limited so lookouts are critical to informing ground resources of change in fire behavior. Snags continue to present a safety risk and pathway for advancement of the fire.****\*\*Base all action on current and expected fire behavior\*\***

# Leland Complex

7. Control Operations:						
Continue to prep fuels and construct direct and indirect fire line using hand and mechanized equipment for future burnout operations west from 3311 along ridge north of Johnson Creek. Hold fire north of 3805 Rd and east of Windy Point Rd. Begin securing and holding where feasible to minimize risk of fire threatening the Elk Butte Communication site and high value private timberlands to the west, and the community of Elk River to the south. Improve Elk Butte Road between DP JC45 north to the north clipper line.						

8. Special Instructions:

- Due to limited cell phone coverage, in case of an IWI emergency, contact Grangeville Dispatch by radio on the Forest Repeater/Elk Butte.
- The Basecamp Manager should know the sleeping location of the Branch Director and Safety.
- Coordinate with READs in areas with cultural resource concerns.
- The TFLD will identify IA Resources when requested.
- Safety Officer will be working across all divisions of the incident and will be checking in with Division Supervisors.
- @@@@ The two hand crews will eat dinner at the Log-Inn Restaurant. (112 S. Front Street, Elk River)

7. Control Operations:  
 Assess burn unit for prep needs and determine equipment needs to provide for water support to the unit.  
 Ensure that prep is complete to provide protection to critical communication infrastructure prior to implementing burning.  
 Improve Elk Butte Road between DP JC45 north to the north clipper line.

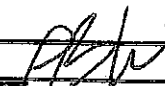

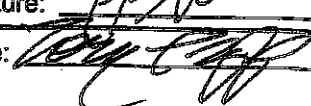

8. Special Instructions:  
 Due to limited cell phone coverage, in case of an IWI emergency, contact Grangeville Dispatch by radio on the Forest Repeater/Elk Butte.  
 The Basecamp Manager should know the sleeping location of the Branch Director and Safety.  
 Coordinate with READs in areas with cultural resource concerns.  
 Safety Officer will be working across all divisions of the incident and will be checking in with Division Supervisors.

### Fire Weather Forecast

**FORECAST NO: #6**  
**PREDICTION FOR: Saturday**  
**OPERATIONAL PERIOD: July 24 2021**  
**FORECAST ISSUED: 7/23/2021 at 1900**

**INCIDENT: Leland Complex (Johnson Creek)**  
**UNIT: Ponderosa Supervisory Area Office**  
*Incident Meteorologist: Robert Rickey*

**Weather Discussion:** For today, expect a round of sunny, warm and dry weather. Ridgetop winds will generally be light and from the west. On slopes and within drainages, terrain will determine direction and speed, with the strongest upslope winds on west aspects. Afternoon humidity will drop into the 20% range, with the lowest humidity on southern aspects at lower elevations. Expect light downslope winds overnight and poor humidity recoveries, especially in the thermal belt above 3500 feet. Hotter and drier conditions are forecast for Sunday and Monday, but increasing cloud cover will move into the area by Monday afternoon. Otherwise, westerly ridgetop winds will continue.

#### WEATHER FORECAST

##### Today:

**Weather:** Sunny, but hazy.  
**High Temperatures:** 79-85  
**Min RH:** 21-27%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 3-6 mph through 1100. After 1100, increasing to W 2-5 mph with gusts 8-11.

**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 6-9 mph after 1200 on west aspects.

**Chance of Wetting Rain ( $\geq 0.10$ " )...0% LAL...1 Haines Index...4 (Low)**

**Mixing Height...6,000 ft AGL Transport Wind...W 5 mph Inversion Break Time...1100**

##### Tonight:

**Weather:** Clear, but hazy.  
**Low Temperatures:** 57-63  
**Max RH:** 43-49%, with the lowest recoveries in the thermal belt above 3500 feet.  
**20 FOOT WINDS:**

**Ridgetops:** W 2-5 mph with gusts 8-11 mph through 1900. After 1900, variable 2-4 mph.

**Slopes/Valleys:** Upslope 3-6 mph, becoming downslope 2-4 mph after 2200.

**Chance of Wetting Rain ( $\geq 0.10$ " )....0% LAL...1 Haines Index...4 (Low)**

##### Outlook for Sunday: \*\*\*Hottest and Driest Day\*\*\*

**Weather:** Sunny, but hazy.  
**High Temperatures:** 84-90  
**Min RH:** 19-25%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 2-4 mph through 1000. After 1000, increasing to W 4-7 mph with gusts 11-15.

**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 9-12 mph after 1100 on west aspects.

**Chance of Wetting Rain ( $\geq 0.10$ " )...0% LAL...1 Haines Index...4 (Low)**

**Mixing Height...9,000 ft AGL Transport Wind...W 15 mph**

##### Extended Outlook for Monday:

**Weather:** Partly cloudy in the morning, becoming mostly cloudy in the afternoon.  
**High Temperatures:** 83-89  
**Min RH:** 20-26%  
**20 FOOT WINDS:**

**Ridgetops:** Variable 3-6 mph through 1000. After 1000, increasing to W 4-7 mph with gusts 11-15.

**Mid-Slopes/Valleys:** Upslope 3-6 mph. Gusts 9-12 mph after 1100 on west aspects.

**Chance of Wetting Rain ( $\geq 0.10$ " )...0% LAL...1 Haines Index...4 (Low)**

**Mixing Height...6,000 ft AGL Transport Wind...W 10 mph**

**MEDICAL PLAN (ICS 206 WF)**  
**Controlled Unclassified Information//Basic**

**Medical Incident Report**

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

- CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
*Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."*
- INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED/PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW/PRIORITY 2</b> Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN/PRIORITY 3</b> Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG Page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
