Date and Time Products Delivered to Incident:		Digital files sent to: Wildfire ftp, adam.warren@usda.gov , neal.cox@usda.gov	
Comments /notes on tonight's mission and this interpretation: This is the IR scan for this fire. Clear heat perimeter with intense heat along the eastern and southeastern flanks and scattered heat throughout the remainder of the interior. There was a small cluster of isolated heat 0.75 miles west of the fire at 115°45'3.658"W 46°16'12.462"N. Suspect it could be a spike/fire camp.
