Musselshell Trail RdNational Weather Service Billings2021-07-10 4:24 PM MDT
Spot Forecast for Musselshell Trail Rd...BLM
National Weather Service Billings MT
423 PM MDT Sat Jul 10 2021

Forecast is based on forecast start time of 1700 MDT on July 10.
If conditions become unrepresentative...contact the National Weather Service.

Please contact our office if you have questions or concerns with this forecast.

...Hot and Dry Sunday...
...Cold Front and Isolated Thunderstorms Sunday Evening...

.DISCUSSION...

Winds will continue to be out of the east today, and should remain mainly less than 10 mph at the fire site. An occasional gust of 10 to 15 mph is possible yet this evening, with mixing, until around sunset. Winds will shift to the southeast overnight, but should remain light.

Humidity recoveries will be poor to moderate overnight, to around 50 percent. Sunday will be hotter and dry, with the high temperatures around 100 degrees and minimum humidity into the low teens, if not single digits. Light and variable early morning winds will turn more southwest and should remain less than 10 mph into early afternoon. Winds will turn west and increase through the afternoon.

Winds are expected snap northwesterly around 6pm, as a cold front pushing into the region. A few isolated showers and thunderstorms are possible at the fire site after 6 pm, which could produce some gusty and erratic outflows that could gust 15 to 20 mph. Shower and thunder potential is expected to decrease after sunset.

.REST OF TODAY...

Sky/weather.....Sunny.
CWR.....0 percent.
LAL.....1...no thunderstorms.
Max temperature.....88-92.
Min humidity.....17-21 percent.
Wind (20 ft).....
Slope/valley.....East winds around 5 mph, with occasional stronger gusts.
Ridgetop.....Northwest around 10 mph.
Mixing height.....8600 ft AGL.
Transport winds.....Southeast around 7 mph.
Haines index.....3.

.TONIGHT...

Sky/weather.....Mostly clear.
CWR.....0 percent.

LAL.....1...no thunderstorms.
Min temperature.....61-65.
Max humidity.....44-48 percent.
Wind (20 ft).....
Slope/valley.....Southeast winds 5 to 7 mph shifting to the
south 6 to 7 mph overnight.
Ridgetop.....South around 10 mph.
Mixing height.....0 ft AGL.
Transport winds.....Southeast around 9 mph.

.SUNDAY...

Sky/weather.....Sunny. Haze and patchy smoke in the afternoon.
CWR.....0 percent.
LAL.....1...no thunderstorms.
Max temperature.....98-102.
Min humidity.....7-11 percent.
Wind (20 ft).....
Slope/valley.....Southwest winds 7 to 9 mph, turning west and
increasing to 10 to 15 mph.
Ridgetop.....Southwest around 15 mph.
Mixing height.....0 ft AGL increasing to 15900 ft AGL in the
afternoon.
Transport winds.....Southwest around 20 mph.
Haines index.....4.

PUBLIC INFORMATION PLAN	Incident Name: MY Complex	Operational Period Date: 7/11/2021 From: 0600 to 2200
--------------------------------	-------------------------------------	--

1. Employee use of cameras, texting, and social media

Stay Alert! Don't let taking a picture or sending a text distract you and jeopardize your or someone else's safety. Limit personal texts, emails and calls to non-shift hours.

Don't share anything using social media that is unprofessional, sensitive or inappropriate. Remember, anything you say, post, or photograph during an incident can be part of the public record.

Regardless of your position, agency or affiliation, you and all fire management resources work for and represent the hosting unit. Ensure your actions reflect this responsibility.

2. Answering general questions from the public

When asked a question, be polite, friendly, kind and courteous. If asked questions about overarching policies do not give your personal opinion or guess. Policy questions should be referred to the Incident PIO for follow-up.

You should not hesitate to answer any general questions about wildland fire or the current fire. If you don't know an answer, don't guess – just give an honest "I don't know" and refer the individual to the Incident PIO.

3. Interactions with members of the news media

Employees performing their duties on an incident may be photographed or recorded at any time without their permission.

Media requests for interviews should be directed to a PIO or to the Incident Commander.

4. Media and VIP access into closed areas and to the fireline

Members of the media may work freely in any area open to the public. Members of the media and VIPs may be escorted into closed areas and to the fireline with prior approval from the Incident Commander or his/her designated representative and are required to follow all safety protocols.

5. Special Notes/Situation Remarks

If you have photos from the fireline, please share them with the PIOs so they can be utilized in updates.

SAFETY MESSAGE

ALWAYS MAINTAIN LCES!!!

Fire fighter safety comes first on every fire, every time

Dehydration is the result of the body trying to regulate its temperature naturally through sweating. Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.

- Studies conducted on wildland firefighters indicate that during fire suppression activities firefighters need to drink a minimum of 1 quart of fluid each hour of work.
- Before work, you should take extra fluids to prepare for the heat. Drink 1 or 2 cups of water, juice, or a sports drink before work.
- While working drink at least 1 quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Hyponatremia (abnormally low concentration of sodium in the blood), as a result of excessive water intake, is a potentially life-threatening complication and can be prevented when rehydration is enhanced by fluids containing sodium and potassium, or when foods with these electrolytes are consumed along with water.
- After work, it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs, so you should drink more than you think you need.
- Don't overdo salt intake; too much salt impairs temperature regulation. Excessive salt can cause stomach distress, fatigue, and other problems.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.
- Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; continuing to work in a dehydrated state can lead to serious consequences, including heat stroke, muscle breakdown, and kidney failure.

Safety Officers: Gary Kirpach, Chad Tuss, Tim Banaszak, and Michael Dardis

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:
See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: *Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
