<b>Comments / notes on tonight's mission and this interpretation:</b> Interpretation started with the current Wildfire Daily Perimeter in NIFS. Reported acres are not geodesic. No change in perimeter. Isolated heat sources detected outside of the perimeter could be mining equipment, bare rock, or urban features (Ashland).  All products have been posted to the FTP and uploaded into NIFS.  <a href="https://ftp.wildfire.gov/public/incident_specific_data/n_rookies/2021_fires/2021_RichardSpring/IR/">https://ftp.wildfire.gov/public/incident_specific_data/n_rookies/2021_fires/2021_RichardSpring/IR/</a>
