10. Incident Complexity Level: Single <input checked="" type="checkbox"/> Complex		11. Report Time Period: From Date/Time: 07/31/2021 1800 PDT To Date/Time: 08/01/2021 1415 PDT									
12. Prepared By: Print Name: Chris Stetson Date/Time Prepared: 08/01/2021 1415 PDT		13. Approved By: Print Name: Mark Bernal, IC Signature: _____									
14. Date/Time Submitted: 08/01/2021 1517 PDT		15. Primary Location, Organization, or Agency Sent To: MT-NRCC									
16. State: ID	17. County / Parish / Borough: Shoshone	18. City:									
19. Unit or Other:	20. Incident Jurisdiction: ID-IPF	21. Incident Location Ownership (if different than jurisdiction): ID-IPF									
22. Latitude/Longitude: Latitude: 47° 7' 41" Longitude: 115° 21' 15"		23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:								
25. Short Location or Area Description (list all affected areas or a reference point): 6.5 miles SW of St. Regis, MT			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/n_rockies/2021_fires/2021_StateLineComplex/											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Extreme Wind Driven Runs Group Torching Spotting Narrative: All fires in the Stateline Complex showed Active to moderate fire behavior beginning around 1400 yesterday, except for Tumbledown. The Tumbledown Fire was most active and showed extreme fire behavior beginning around 2200 last night and continued in to today's shift. Observations of intense uphill runs, long-range											

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

spotting, and spread of 4-5 miles occurred. All other fires showed some torching, active backing and consuming fuels on north slopes. Today, all fires are experiencing dense smoke inversion and moderated fire behavior.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Closed Timber Litter
Timber (Litter and Understory)
Light Logging Slash**

Narrative:

Vegetation types consists of sub-alpine fir in higher elevations with a transition down to pine, mixed conifer, and brush in lower elevations. Fuels consist of thick, continuous canopy cover with brush and heavy dead and down component. Previous fire footprints have heavy dead and down fuels. ERCs and 1000 FM are in 97th percentile.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	0	0	0
I. Other Minor Structures	0	0	0

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Civilians (Public) Affected:	0		0

32. Responder Status Summary:

C. Indicate the Number of Responders Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	3	0	3
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	3	0	3

33. Life, Safety, and Health Status/Threat Remarks:

The Highway 50 corridor between the East fork of Gold Creek and Eagle Creek has been temporarily closed due to increased fire activity.

An area closures is in affect for locations in and around the fire complex area on the Idaho Panhandle National Forest. More information can be found at: <https://www.fs.usda.gov/alerts/ipnf/alerts-notice>.

35. Weather Concerns (synopsis of current and predicted weather; discuss related

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	
B. Potential Future Threat	X
C. Mass Notifications in Progress	
D. Mass Notifications Completed	

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

factors that may cause concern): Flash Flood Watch in effect until 9pm Sunday night. Expecting 0.25-0.60 of an inch with locally over 1.0 inch. Rockslides/debris flows off of burn scars a real concern through tonight. Stable atmosphere with thick, dense smoke settling in the valleys. Chance of showers Monday.		Active?
	E. No Evacuation(s) Imminent	
	F. Planning for Evacuation	
	G. Planning for Shelter-in-Place	
	H. Evacuation(s) in Progress	
	I. Shelter-in-Place in Progress	
	J. Repopulation in Progress	
	K. Mass Immunization in Progress	
	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	
	O. Road Closure	X
	P. Trail Closure	X
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	Fire will continue to increase in activity with increased growth until shading from smoke occurs or evening clouds arrive. Following cloud cover and smoke inversion, fire behavior will begin to moderate. Wetting rain is expected to further moderate fire behavior into the night.
24 hours:	Fire behavior will become moderated on all fires by wetting rain and high RH recoveries. Fire spread in heavy dead/down fuels will continue to support growth.
48 hours:	Moderated fire behavior is expected based on forecasted precip for Monday. Slow start to the day as RH values slowly drop. Cloudy conditions will slow drying and keep moderated fire behavior.
72 hours:	A drying trend is expected to dry fuels and return fire spread. Activity will begin to increase and with full sun and reduced smoke shading. The fire area could see increased fire behavior.
Anticipated after 72 hours:	Continued drying is expected to support increasing fire behavior. Fire on north slopes will take longer to re-establish energy to support fire spread.

37. Strategic Objectives (define planned end-state for incident):	
The Stateline Complex has a full suppression, values-driven strategy that utilizes a mix of tactics (direct, indirect and point protection) when and where the probability of success is high and the risk is commensurate to the identified values.	
Planned End State: Identified values and infrastructure are successfully protected from adverse fire effects. Public and firefighter safety have remained paramount with all decisions based on values at risk using appropriate tactics given the strategy. Expectations have been met for communications and coordination with local stakeholders, county officials and emergency management agencies and the US Forest Service.	

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:	
12 hours:	Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.
24 hours:	Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

	will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.
48 hours:	Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.
72 hours:	Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.
Anticipated after 72 hours:	Threats will increase to the following communities: DeBorgia, Haugan, St. Regis and Superior. Threats will also increase for the following commercial timber lands: Molpus Timber Management Lands and Hancock Forest Management. Threats will continue to exist for natural resources, developed recreation sites, cultural resources and Wild and Scenic River values.
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	2 IHC; 2 Type 2IA crews; 4 Type 2 crews; 5 DIVS; 2 TFLD; 1 HEQB; 5 FELM, 4 FELB; 2 Structure Protection Specialist; 1 Safety Officer SOF2,SOFR or (T); 2 RADO's
24 hours:	2 IHC; 2 Type 2IA crews; 4 Type 2 crews; 5 DIVS; 2 TFLD; 1 HEQB; 5 FELM, 4 FELB; 2 Structure Protection Specialist; 1 Safety Officer SOF2,SOFR or (T); 2 RADO's
48 hours:	2 IHC; 2 Type 2IA crews; 4 Type 2 crews; 5 DIVS; 2 TFLD; 1 HEQB; 5 FELM, 4 FELB; 2 Structure Protection Specialist; 1 Safety Officer SOF2,SOFR or (T); 2 RADO's
72 hours:	2 IHC; 2 Type 2IA crews; 4 Type 2 crews; 5 DIVS; 2 TFLD; 1 HEQB; 5 FELM, 4 FELB; 2 Structure Protection Specialist; 1 Safety Officer SOF2,SOFR or (T); 2 RADO's
Anticipated after 72 hours:	2 IHC; 2 Type 2IA crews; 4 Type 2 crews; 5 DIVS; 2 TFLD; 1 HEQB; 5 FELM, 4 FELB; 2 Structure Protection Specialist; 1 Safety Officer SOF2,SOFR or (T); 2 RADO's
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:	
<ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. 	
Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.	
The remote location, steep terrain, limited access, distance between fires, and lack of suppression resources is challenging firefighting efforts and logistical support.	
Crews continue to reassess direct and indirect containment lines for the Tumbledown Fire and continue locating, assessing and prepping Forest Service infrastructure. On the remaining fires, crews will continue to monitor fire activity and where needed prep and construct direct and indirect line where highest probability of success exists.	
41. Planned Actions for Next Operational Period:	
Southwest Area Incident Management Team 5 will be transferring command of the incident to the Northern Rockies Incident Management Team 2 on 8/2 at 0600 Mountain time.	
42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):	
43. Anticipated Incident Containment or Completion Date: 10/31/2021	
44. Projected Significant Resource Demobilization Start Date:	
45. Estimated Incident Costs to Date: \$7,600,000.00	
46. Projected Final Incident Cost Estimate:	
47. Remarks (or continuation of any blocks above – list block number in notation):	

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

No reported growth on this 209 due to IR not being filled last night. However, substantial growth occurred on the west side of Tumbledown fire early this morning, crossing control lines and spreading approximately 4-5 miles.

The Northern Rockies Incident Management Team 2 was in-briefed at 1000 MDT today. Southwest Area Incident Management Team 5 will be transferring command of the incident to the Northern Rockies Incident Management Team 2 on 8/2 at 0600 Mountain time.
