14. Date/Time Submitted: <b>08/07/2021 1647 PDT</b>		15. Primary Location, Organization, or Agency Sent To: <b>NRCC</b>									
16. State: <b>ID</b>	17. County / Parish / Borough: <b>Shoshone</b>	18. City:									
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): <b>ID-IPF</b>									
22. Latitude/Longitude: Latitude: <b>47° 7' 41"</b> Longitude: <b>115° 21' 15"</b>	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township:    Range:    Section: 1/4 Sec: of 1/4 Sec:									
25. Short Location or Area Description (list all affected areas or a reference point): <b>6.5 miles SW of St. Regis, MT</b>			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): <b><a href="https://ftp.wildfire.gov/public/incident_specific_data/n_rockies/2021_fires/2021_StateLineComplex/">https://ftp.wildfire.gov/public/incident_specific_data/n_rockies/2021_fires/2021_StateLineComplex/</a></b>											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):  <b>Active Single Tree Torching Flanking</b>											

## Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

<p><b>Creeping</b></p> <p>Narrative:  <b>Fire behavior increased compared to yesterday, due to partially sunny and windy conditions.</b></p>
<p>29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):</p> <p><b>Closed Timber Litter  Timber (Litter and Understory)  Light Logging Slash</b></p> <p>Narrative:  <b>Vegetation types consists of sub-alpine fir in higher elevations with a transition down to pine, mixed conifer, and brush in lower elevations. Fuels consist of thick, continuous canopy cover with brush and heavy dead and down component. Previous fire footprints have heavy dead and down fuels. ERCs and 1000 FM are in 97th percentile.</b></p>

<p>30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):</p>	<table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th style="width: 40%;">A. <p>33. Life, Safety, and Health Status/Threat Remarks:  <b>The Highway 50 corridor between the East fork of Gold Creek and</b></p>	<p>34. Life, Safety, and Health Threat Management:</p>
--	--

## Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

<p><b>Eagle Creek has been temporarily closed due to increased fire activity.</b></p> <p><b>An area closures is in affect for locations in and around the fire complex area on the Idaho Panhandle National Forest. More information can be found at: <a href="https://www.fs.usda.gov/alerts/ipnf/alerts-notice">https://www.fs.usda.gov/alerts/ipnf/alerts-notice</a>.</b></p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Gusty SW winds of 15-20 mph are occurring across the ridges today, but RH values remain rather high at 30-35% in the valleys and 40% on mid slopes. An energetic cold trough will bring wetting rains early Sunday with temperatures about 20 degrees below normal. A strong ridge will build over the region next week enabling temperatures to warm to 5-10 degrees above normal along with lowering RH values.</b></p>		Active?
	A. No Likely Threat	
	B. Potential Future Threat	
	C. Mass Notifications in Progress	
	D. Mass Notifications Completed	
	E. No Evacuation(s) Imminent	
	F. Planning for Evacuation	
	G. Planning for Shelter-in-Place	
	H. Evacuation(s) in Progress	
	I. Shelter-in-Place in Progress	
	J. Repopulation in Progress	
	K. Mass Immunization in Progress	
	L. Mass Immunization Complete	
	M. Quarantine in Progress	
N. Area Restriction in Effect		
O. Road Closure	<b>X</b>	
P. Trail Closure	<b>X</b>	
Q. Area Closure	<b>X</b>	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	<b>Fire spread in heavy dead/down fuels will continue to support growth. West winds could cause fire spread towards the east, prior to the start of precipitation.</b>
24 hours:	<b>A cold front will cause cooler temperatures and a 90% chance of wetting rain. If precipitation does not occur over the fire area in sufficient amounts to penetrate the canopy, the heavy dead and down component will still aid in fire spread.</b>
48 hours:	<b>Cool and dry weather is anticipated.</b>
72 hours:	<b>Warm and dry weather is anticipated to return to the area.</b>
<b>Anticipated after 72 hours: Temperatures are expected to increase to above normal through the week.</b>	

37. Strategic Objectives (define planned end-state for incident):	
<b>The Stateline Complex has a full suppression strategy that utilizes a mix of tactics (direct, indirect and point protection) when and where the probability of success is high and the risk is commensurate to the identified values.</b>	

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:	
12 hours:	<b>The fire has reached Hancock Timber Resource Group lands. Threats will be moderate for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus timber lands, Potlatch timberlands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</b>
24 hours:	<b>Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate for the following values:</b>

## Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

	<p><b>Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</b></p>
48 hours:	<p><b>Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</b></p>
72 hours:	<p><b>Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</b></p>
Anticipated after 72 hours:	<p><b>Threats will increase to the following communities: DeBorgia, Haugan, St. Regis and Superior. Threats will also increase for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will continue to exist for natural resources, developed recreation sites, cultural resources and Wild and Scenic River values.</b></p>
<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:</p>	
12 hours:	<p><b>3- T 1 IHC are a critical need due to steep rocky terrain that Heavy Equipment cannot access on the Tumble Down and Dolly Creek Fires. Handline is required to meet full containment along certain portions of the north ,west and south flanks of the Tumbledown this includes an area between Bruin Creek and Quartz Creek, all line construction west of Quartz Creek in Division Uniform. On the southern flank in Division R, steep drainages where equipment is unable to work will require hand crew to construct direct control lines. Getting full containment on the Dolly Creek fire will reduce the threat to the fire crossing the Idaho/Montana boarder.</b></p> <p><b>2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.</b></p> <p><b>1 DIVS- One Division Supervisor is critically needed to supervise new Division that was created when the fire perimeter grew to the west.</b></p> <p><b>2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.</b></p> <p><b>1 HETF- One additional Heavy Equipment Taskforce is required in order to construct adequate fire line over a large amount of area on both the north and southsides of the Tumbledown fire.</b></p>
24 hours:	<p><b>3- T 1 IHC are a critical need due to steep rocky terrain that Heavy Equipment cannot access on the Tumble Down and Dolly Creek Fires. Handline is required to meet full containment along certain portions of the north ,west and south flanks of the Tumbledown this includes an area between Bruin Creek and Quartz Creek, all line construction west of Quartz Creek in Division</b></p>

## **Incident Status Summary (ICS-209)**

Incident: **Stateline Complex**

**Uniform. On the southern flank in Division R, steep drainages where equipment is unable to work will require hand crew to construct direct control lines. Getting full containment on the Dolly Creek fire will reduce the threat to the fire crossing the Idaho/Montana boarder.**

**2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.**

**1 DIVS- One Division Supervisor is critically needed to supervise new Division that was created when the fire perimeter grew to the west.**

**2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.**

**1 HETF- One additional Heavy Equipment Taskforce is required in order to construct adequate fire line over a large amount of area on both the north and southsides of the Tumbledown fire.**

**3- T 1 IHC are a critical need due to steep rocky terrain that Heavy Equipment cannot access on the Tumble Down and Dolly Creek Fires. Handline is required to meet full containment along certain portions of the north ,west and south flanks of the Tumbledown this includes an area between Bruin Creek and Quartz Creek, all line construction west of Quartz Creek in Division Uniform. On the southern flank in Division R, steep drainages where equipment is unable to work will require hand crew to construct direct control lines. Getting full containment on the Dolly Creek fire will reduce the threat to the fire crossing the Idaho/Montana boarder.**

48 hours:

**2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.**

**1 DIVS- One Division Supervisor is critically needed to supervise new Division that was created when the fire perimeter grew to the west.**

**2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.**

**1 HETF- One additional Heavy Equipment Taskforce is required in order to construct adequate fire line over a large amount of area on both the north and southsides of the Tumbledown fire.**

**3- T 1 IHC are a critical need due to steep rocky terrain that Heavy Equipment cannot access on the Tumble Down and Dolly Creek Fires. Handline is required to meet full containment along certain portions of the north ,west and south flanks of the Tumbledown this includes an area between Bruin Creek and Quartz Creek, all line construction west of Quartz Creek in Division Uniform. On the southern flank in Division R, steep drainages where equipment is unable to work will require hand crew to construct direct control lines. Getting full containment on the Dolly Creek fire will reduce the threat to the fire crossing the Idaho/Montana boarder.**

72 hours:

**2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.**

**1 DIVS- One Division Supervisor is critically needed to supervise new Division that was created**

## **Incident Status Summary (ICS-209)**

Incident: **Stateline Complex**

**when the fire perimeter grew to the west.**

**2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.**

**1 HETF- One additional Heavy Equipment Taskforce is required in order to construct adequate fire line over a large amount of area on both the north and southsides of the Tumbledown fire.**

**3- T 1 IHC are a critical need due to steep rocky terrain that Heavy Equipment cannot access on the Tumble Down and Dolly Creek Fires. Handline is required to meet full containment along certain portions of the north ,west and south flanks of the Tumbledown this includes an area between Bruin Creek and Quartz Creek, all line construction west of Quartz Creek in Division Uniform. On the southern flank in Division R, steep drainages where equipment is unable to work will require hand crew to construct direct control lines. Getting full containment on the Dolly Creek fire will reduce the threat to the fire crossing the Idaho/Montana boarder.**

Anticipated after 72 hours:

**2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.**

**1 DIVS- One Division Supervisor is critically needed to supervise new Division that was created when the fire perimeter grew to the west.**

**2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.**

**1 HETF- One additional Heavy Equipment Taskforce is required in order to construct adequate fire line over a large amount of area on both the north and southsides of the Tumbledown fire.**

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**Operation personnel are prioritizing resource assignments based on agency administrator priorities and the limited number of resources available on the complex. Continue locating, assessing, and prepping Forest Service infrastructure. T1 IHC/ T2IA crews are needed along portions of the northern and southern flanks of Tumbledown fire where equipment cannot access due to steep terrain. In addition crew are needed to continue containment efforts on the Dolly Creek fire. Further fire progress to the north could impact I-90 corridor. DIVS and TFLD resources are required to staff new divisions and maintain span of control.**

41. Planned Actions for Next Operational Period:

**Divisions U: Equipment will be working toward each other from Quartz Creek Rd moving east and from Bruin Creek moving west to reduce fire progress to the north. Monitor fire activity and scout possible line placement from Quarts Creek to Nugget Hill above the St Joes River Road. Type 1 and Type 2IA crews are needed to construct direct fire line in areas that equipment cannot access which includes ground between Bruin Cr and Quartz Cr. and lands west of Quarts Creek toward Nugget Hill.**

## Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

**Division X: Continue work to contain east flank of Dolly Creek fire with engine crew personnel. Equipment continues to do structure prep and fuels reduction near Red Ives Guard Station and along access and egress routes to Legacy Trout Unlimited Restoration Projects.**

**Division R and N: IHC and engines will continue to contain spot fires on Hancock Forest Resource Group lands and Forest Service south of Tumbledown Fire. Continue to scout access and look for line placement opportunities to reduce fire movement toward and onto Hancock Forest Resource Group, Potlach Corp, and Molpus Timberlands Management lands. Locate and assess infrastructure within the divisions.**

**Division N: Heavy Equipment Taskforce is building lines from Conrad Peak to the west on existing roads where possible to the Division break near Bluff point. Hand crews (Type 1 and Type 2IA) are needed to construct direct fire line in areas that equipment cannot access. Monitor fire activity and scout possible line placement north from Conrad peak.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **10/31/2021**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$10,500,000.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
Berge Peak	Full Suppression	0.1	Acres	100	Percent			100
Broadaxe	Full Suppression	0.1	Acres	100	Percent			100
Deception	Full Suppression	203	Acres	0	Percent			100
Dolly Creek	Full Suppression	825	Acres	0	Percent	8,600,000		100
