12. Prepared By: Print Name: Valentijn Hoff Date/Time Prepared: 08/08/2021 1600 PDT		13. Approved By: Print Name: Doug Turman, ICT1 Signature: .									
14. Date/Time Submitted:		15. Primary Location, Organization, or Agency Sent To: NRCC									
16. State: ID	17. County / Parish / Borough: Shoshone	18. City:									
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): ID-IPF									
22. Latitude/Longitude: Latitude: 47° 7' 41" Longitude: 115° 21' 15"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:									
25. Short Location or Area Description (list all affected areas or a reference point): 6.5 miles SW of St. Regis, MT			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/n_rockies/2021_fires/2021_StateLineComplex/											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Backing Creeping											

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

Smoldering
Narrative: The fire area received precipitation in the early morning, reducing fire behavior.
29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc): Closed Timber Litter Timber (Litter and Understory) Light Logging Slash
Narrative: Vegetation types consists of sub-alpine fir in higher elevations with a transition down to pine, mixed conifer, and brush in lower elevations. Fuels consist of thick, continuous canopy cover with brush and heavy dead and down component. Previous fire footprints have heavy dead and down fuels. ERCs and 1000 FM are in 97th percentile.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

---	---

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

<p>Eagle Creek has been temporarily closed due to increased fire activity.</p> <p>An area closures is in affect for locations in and around the fire complex area on the Idaho Panhandle National Forest. More information can be found at: https://www.fs.usda.gov/alerts/ipnf/alerts-notice.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Precipitation occurred over the fire area. Cool, breezy and showery conditions continue through the evening as a upper level disturbance moves through the region. Then high pressure builds back over the Inland Northwest with drier and warmer weather. Locally breezy north winds are possible by mid week which may increase the haze and smoke from area fires. The main story will be the extreme heat that returns by Thursday and lasts through the weekend.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 90%;"></th> <th style="width: 10%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>A. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p>12 hours: Little fire spread is expected due to a moist and cool atmosphere.</p> <p>24 hours: Cool and dry weather is anticipated.</p> <p>48 hours: Warm and dry weather is anticipated to return to the fire area.</p> <p>72 hours: Warm and dry weather is anticipated over the fire area.</p> <p>Anticipated after 72 hours: Temperatures are expected to increase to above normal through the week, due to a high pressure ridge building.</p>

<p>37. Strategic Objectives (define planned end-state for incident): The Stateline Complex has a full suppression strategy that utilizes a mix of tactics (direct, indirect and point protection) when and where the probability of success is high and the risk is commensurate to the identified values.</p>
--

<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p>
<p>12 hours: The fire has reached Hancock Timber Resource Group lands. Threats will be moderate for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus timber lands, Potlatch timberlands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</p>
<p>24 hours: Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and</p>

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

	<p>Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</p>
48 hours:	<p>Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate to high for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Molpus Timber lands, Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</p>
72 hours:	<p>Threats exist for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will be moderate for the following values: Natural resources including (Bull trout critical habitat, riparian areas and watershed values), Middle Sisters Peak Lookout, developed recreation sites, cultural resources, and Wild and Scenic River values. Threats will be moderate to the Redd Bull and Smeagle Timber Sale Areas. Threats will exist from smoke impacts to the I-90 corridor as well as local communities within the fire area.</p>
Anticipated after 72 hours:	<p>Threats will increase to the following communities: DeBorgia, Haugan, St. Regis and Superior. Threats will also increase for the following commercial timber lands: Molpus Woodlands Group, Potlatch, and Hancock Timber Resource Group. Threats will continue to exist for natural resources, developed recreation sites, cultural resources and Wild and Scenic River values.</p>
<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:</p>	
12 hours:	<p>2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.</p> <p>2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.</p> <p>2 HEQB- Heavy Equipment Bosses are a critical need to supervise the large amount of equipment that is assigned to the fire.</p>
24 hours:	<p>2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.</p> <p>2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.</p> <p>2 HEQB- Heavy Equipment Bosses are a critical need to supervise the large amount of equipment that is assigned to the fire.</p>
48 hours:	<p>2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.</p> <p>2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.</p> <p>2 HEQB- Heavy Equipment Bosses are a critical need to supervise the large amount of</p>

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

<p>equipment that is assigned to the fire.</p> <p>2 - Type 2 IA crews are a critical need to assist on implementing direct line along northern flank of Tumbledown fire between Quartz Creek and Bruin Creek in Division Uniform, and as line progression continues to the west of Quartz Creek toward Nugget Hill.</p>
<p>72 hours: 2 TFLD- Task Force Leaders are critically needed for adequate supervision of Heavy Equipment Taskforces and address span of control on all divisions.</p> <p>2 HEQB- Heavy Equipment Bosses are a critical need to supervise the large amount of equipment that is assigned to the fire.</p>
<p>Anticipated after 72 hours: are working.</p> <p>2 FMODs will be timing out in 5 days. FMODs are a critical need to continue to address hazard trees along fire perimeter and along indirect control lines crews</p> <p>5 Engines are a critical need to continue to hold, improve and mop up along direct control lines</p>

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Operation personnel are prioritizing resource assignments based on agency administrator priorities and the limited number of resources available on the complex. T2IA crews are needed along portions of the northern and southern flanks of Tumbledown fire where equipment cannot access due to steep terrain. Further fire progress to the north could impact I-90 corridor. TFLD and HEQB resources are required to maintain span of control.

41. Planned Actions for Next Operational Period:

Divisions U: Equipment will continue working toward each other from Quartz Creek Rd moving east and from Bruin Creek moving west to reduce fire progress to the north. Monitor fire activity and scout possible line placement from Quartz Creek to Nugget Hill above the St Joes River Road. Type 1 and Type 2IA crews are needed to construct direct fire line in areas that equipment cannot access which includes ground between Bruin Cr. and Quartz Cr. and lands west of Quartz Creek toward Nugget Hill.

Div. T: Monitor fire activity and scout line placement from Quartz Creek to Nugget Hill above the St Joes River Road. Hand crews are the resources needed to construct direct line in Div T.

Division X: Continue work on direct line from Dolly Creek to Washout creek on the Dolly fire with Engine crew personnel.

Division R: IHC will continue work the 10 spot fires in Nugget Creek and grid the area for additional fires. Heavy equipment will continue to construct direct line between Bluff Creek and Fuzzy Creek. Road prep will continue on roads 752, 1478, 752A, 1956A, and 3488 as indirect control lines.

Division N: Heavy Equipment Taskforce is building lines from Conrad Peak to the west on existing roads where possible to the Division break near Bluff Point. Hand crews are needed to construct direct fire line in areas that equipment cannot access. Monitor fire activity and scout possible line placement north from Conrad peak

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

Incident Status Summary (ICS-209)

Incident: **Stateline Complex**

43. Anticipated Incident Containment or Completion Date: 10/31/2021								
44. Projected Significant Resource Demobilization Start Date:								
45. Estimated Incident Costs to Date: \$11,100,000.00								
46. Projected Final Incident Cost Estimate:								
47. Remarks (or continuation of any blocks above – list block number in notation):								
Incident Name	Suppression Strategy	Area	Area Measure	% Ctn/Comp	% Ctn/Comp Measure	Est. Cost to Date	Est. Comp Date	Perimeter
