.DISCUSSION...

Hot and dry conditions are forecast through Saturday. The smoke and haze will likely remain thick with possible small improvements, but no real clearing until the frontal passage on Monday. Overnight RH recoveries will be poor through Sunday morning for mid-slopes and ridgetops. Sunday and Monday the winds will become breezier ahead of and after a cold front passage. Temperatures will cool a few degrees Sunday, with more cooling Monday thru Wednesday (with higher daytime humidities. The best chance for rain will start late Monday and will continue through Tuesday, with a chance of isolated thunderstorms.

Expect smoke today to be as thick as yesterday, if not slightly worse. Stronger southwesterly flow on Sunday could bring improving conditions to the wildfire area. Conditions will likely continue to improve on Monday before northwesterly flow brings in more smoke either Tuesday or Wednesday.
