Spot Forecast for Trestle Creek Complex...ID-IPF

.DISCUSSION...

Dry, hot and very smoky conditions will persist through Sunday under an area of high pressure. Locally gusty winds are possible on exposed ridges early this evening before light terrain driven winds set up. Expect poor overnight recoveries and thermal belts across mid slopes of the fire through the weekend. Surface pressure gradients tighten Sunday afternoon, giving way to breezy southwest winds into the early evening hours. A cold front will push across the fire area on Monday, bringing a cooldown along with more breezy winds. The increase in winds may help mix out the smoke in some areas on Sunday with further improvement into Monday. A northerly flow Tuesday and Wednesday may bring in more smoke. Anticipate cooler temperatures through Tuesday.
