## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY</b>	
TRESTLE CREEK COMPLEX	Date/Time From: 08/16/2021 0600      MON	Date/Time To: 08/16/2021 2200      MON
<b>3. Objective(s):</b>		
Provide for firefighter and public safety through sound risk management principles at all times.  Keep fire north of Trout Peak and Round Top Mtn., east of Trout Rd. 232. Keep fire south of Flume Creek Drainage and Quartz Creek and west of Lightning Creek.		
<b>4. Operational Period Command Emphasis:</b>		
Continually evaluate yourself and your crewmembers for chronic fatigue. Monitor escape times and safety zones as operational progress is made.		
<b>General Situational Awareness:</b>		
Establish situational awareness prior to working around heavy equipment. Be aware of what is above you and below you on the mountain, watch out for rolling material. Monitor weather and fire weather forecast. Plan actions based on current and expected fire behavior. Establish trigger points, especially on work locations when egress times are long.		
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located		
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan):

# Trestle Creek Complex Weather Forecast

Forecast Iteration: #1  
Prediction For: 0600-2200 PDT  
Date: Monday 08/16/2021  
Forecast Issued: Sunday 08/15/2021 at 1900 PDT

Name of the Fire: Trestle Creek Complex  
Unit: Idaho Panhandle National Forest  
Incident Meteorologist: Lamont Bain  
Signed: *Anthony Lamont Bain*

**WEATHER DISCUSSION:** Southwest to west breezes will continue today across the Idaho Panhandle with sustained 20-ft winds averaging between 8 and 16 mph today with pockets of smoke/haze continuing. It should be cooler in many areas, though unseasonable warmth is still likely. Highs in the 70s and 80s can be anticipated, except at ICP where temperatures may climb into the 90s. Peak afternoon wind gusts to near 25 mph should be anticipated, especially along Trestle Creek drainage. A cold front will approach late tonight into and move through on Tuesday resulting in a wind shift to the northwest as well as a risk for rain and storms.

**TODAY:** Pockets of dense smoke and haze. Otherwise expect increasing clouds above any smoke.

High Temperatures: Valley/Drainages: 78-83° Mid-Slope (4000 FT): 75-80° Ridges (> 4500 FT): 72-77°  
Minimum Relative Humidity: Valley/Drainages: 20-25% Mid-Slope (4000 FT): 25-30% Ridges (> 4500 FT): 25-30%

**DIV A/C/W:** South to Southwest winds between 2 to 5 mph around 0600 PDT will increase by 1000 PDT with speeds approaching 12 to 15 mph, especially along the Trout Peak ridgeline. Through 1600 PDT, winds will become more westerly with peak sustained winds around 15 mph. Gusts of upward to 25 mph are possible, mainly on the west aspects. Mid-slope and below on the east aspect may remain sheltered and see reduced wind speeds/gusts. Minimum afternoon RH will fall down to near 25%.

**DIV Z:** South to South-Southwest winds near 3 mph around 0600 PDT will increase to near 12 mph by 1000 PDT. Through the afternoon hours, winds will become more southwesterly and remain near 12 mph. Gusts of 20-23 mph should be anticipated, especially along the ridgeline. Mid-slope down toward Trestle Creek may remain sheltered such that winds are reduced by 3-5 mph here compared to the ridgeline. Afternoon humidity is expected to fall down into the 25-30% range.

**Stability:** Inversion lifting around 1000 PDT. Becoming unstable in the afternoon. Columns are possible where smoke clears.

**CHANCE OF RAIN:** 2% **LAL:** 1 **TRANSPORT WINDS:** Westerly at 5 to 15 mph

**TONIGHT:** Mostly cloudy with a low chance for a sprinkle or very light rain shower. Patchy smoke/haze will linger.

Low Temperatures: Valley/Drainages: 55-60° Mid-Slope (4000 FT): 53-58° Ridges (> 4500 FT): 55-60°  
Relative Humidity Recovery: Valley/Drainages: 65-70% Mid-Slope (4000 FT): 60-65% Ridges (> 4500 FT): 58-63%

**DIV A/C/W:** Winds will continue to become more westerly through the evening hours while relaxing some with the approach of a cold front. Winds along the Trout Peak ridgeline will remain elevated with speeds between 5 and 10 mph and gusts to near 13 mph. Mid-slope winds will become more down-valley with speeds under 8 mph. Overnight RH will increase into the mid 60% range (even higher after sunrise Tuesday).

**DIV Z:** Winds will start to veer to the west in the evening, but remain elevated along the ridgeline. Peak sustained speeds near 12 mph are forecast with a gust to near 15 mph possible. Upslope flow may persist beyond 2200 PDT for the west aspect of DIV Z with westerly downslope continuing on the east aspect. Speeds between 6 and 9 mph are forecast with gusts to near 12 mph. Overnight RH will rebound into 60 percent range and increase after sunrise Tuesday.

**Stability:** Inversion strengthening around 2000 PDT.

**CHANCE OF RAIN:** 10% **LAL:** 1 **TRANSPORT WINDS:** Westerly at 5 to 10 mph

**Extended Outlook (Tuesday through Thursday):** A cold front will sweep in from the north and northwest through the day on Tuesday. This will result in a wind shift to the northwest along with the only risk for wetting rainfall in the extended forecast. Rain amounts in some spots may be as great as ¼ of an inch. There will be a threat for thunderstorms. Gusty and erratic winds will be possible in and within the vicinity of storms. More northerly winds are favored on Tuesday and Wednesday with gusts remaining within the 20 to 25 mph range. More seasonal west to southwest winds should be anticipated by Thursday. The front should usher in cooler conditions as well as less-smoky/hazy skies. Overnight humidity recovery will elevate into the 60 to 90 percent range through the extended outlook with afternoon humidity values generally between 40 and 50 percent.

Please submit weather observations to the Lamont Bain (IMET) at 580-583-9265 or email to [Lamont.Bain@noaa.gov](mailto:Lamont.Bain@noaa.gov). Weather observations can be found using the QR code:

**Smoke Outlook for 8/15 - 8/16**  
**N Idaho - NW Montana - South Yaak/Trestle Complex**  
 Issued at: 2021-08-15 11:55 MDT

**Fire**

South Yaak Fire, Burnt Peak and Trestle Complex had moderate growth due to strong wind yesterday. Wind is expected to weaken some today. Rain is in the forecast for Tuesday and temperature drop is expected for the following few days. Fire activities are expected to dampen on Tuesday for a few days.

**Smoke**

Moderate wind is expected for today and smoke from fires should disperse slightly better than yesterday. However, most monitors are expected to be in "Unhealthy" range for today and tomorrow.

Daily AQI Forecast\* for Aug 15, 2021

Station	Yesterday hourly	Sat 8/14	Forecast* Comment for Today -- Sun, Aug 15	Sun 8/15	Mon 8/16
Newport			Smoky condition should improve some in late afternoon.		
Mt Hall			Smoky condition should improve some in late afternoon.		
Sandpoint			Smoky condition should improve some in late afternoon.		
Columbia Falls			Smoky condition should improve some in late afternoon.		
Libby			Smoky condition should improve some in late afternoon.		
Cranbrook			Smoky condition should improve some in late afternoon.		

Issued 2021-08-15 11:55 MDT by Dan Chan, ARA, dchan@gfc.state.ga.us

Air Quality Index (AQI)	Actions to Protect Yourself
Good	None
Moderate	Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
USG	People within Sensitive Groups* should <b>reduce</b> prolonged or heavy outdoor exertion.
Unhealthy	People within Sensitive Groups* should <b>avoid all</b> physical outdoor activity.
Very Unhealthy	Everyone should avoid prolonged or heavy exertion.
Hazardous	Everyone should avoid any outdoor activity.

\*Disclaimer: This forecast is based on fine particulates only, ozone is not included. Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.

# TRESTLE CREEK FIRE

Operation Period: 8/16/2021

## SAFETY MESSAGE

### Thunderstorm Safety

Thunderstorms cause significant hazards for wildland firefighters, including downbursts. Downbursts can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be aware of the signs.

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Sound waves move at different rates based on atmospheric conditions. Take the storm precautions below as soon as you hear thunder, not when the storm is upon you. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle metal hand tools or flammable materials in open containers.

### MAJOR HAZARDS AND RISKS

STEEP TERRAIN CHIPPING OPERATIONS DRIVING	ROLLING MATERIAL FATIGUE WILDLIFE/ LIVESTOCK	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
---	--	--

***Be sure all elements of your safety plan are in place prior to engagement***

## SYMPTOMS SELF CHECKER

Employees will be directed to the Medical Unit for any of the following :

- ~ Cough
- ~ Shortness of Breath
- ~ Difficulty Breathing
- ~ Fever > 100.4°F, felt feverish or chills
- ~ Muscle pain
- ~ Headache
- ~ Sore throat
- ~ New loss of taste and / or smell

**Upon meeting any of the above criteria**

- **Notify your current Supervisor and your home unit if possible**
- **Report to the Medical Unit**

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> - 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> - 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
