Forecast Issued: Monday 08/16/2021 at 1900 PDT

Name of the Fire: Trestle Creek Complex
Unit: Idaho Panhandle National Forest

WEATHER DISCUSSION: ***Weather pattern change with a risk for showers, wet thunderstorms and a noticeable wind shift***. Flash Flood Watch in effect from 10 AM Tuesday through 9 PM Tuesday. Flash Flooding possible for any areas that experience a slow moving storm. Southwest to west-southwest winds will switch sharply to the northeast mid to late afternoon Tuesday and become strong with gusts as great as 30 mph, especially along northeast aspects, aligned drainages, and ridgelines. Rain and isolated wet storms may linger Tuesday night into Wednesday. There will be a risk for additional rain and storms late in the week and into the weekend.

TODAY: Cloudy with showers and embedded wet thunderstorms probable. Patchy haze and smoke, especially in drainages and at lower elevations. Gusty/erratic winds and heavier rainfall will be possible with storms.

High Temperatures: Valley/Drainages: 67-72° Mid-Slope (4000 FT): 60-65° Ridges (> 4500 FT): 58-63°
Minimum Relative Humidity: Valley/Drainages: 45-50% Mid-Slope (4000 FT): 40-45% Ridges (> 4500 FT): 40-45%

DIV A: Terrain driven flow will intensify and become southerly between 5 and 10 mph by 0800 PDT (except along north aspects, where winds may remain down valley below 10 mph). Around 1400 PDT winds will become more WSW with peak sustained speeds near 13-15 mph. As the cold front approaches around 1600 PDT, winds may subside and then shift quickly to the north and northeast. By around 1800 PDT, NE winds near 18 mph with gusts as high as 30 mph (mainly along aligned drainages, ridges and exposed areas) are forecast.

DIV W/C: Downslope flow will become SSE/upslope along the Trestle Creek drainage with speeds up to 6 mph forecast by 0800 PDT. Speeds may increase up to around 8-12 mph by noon. Winds may fall below 5 mph and become variable as a front approaches near 1600 PDT, but by 1700-1800 PDT, winds will accelerate and become more northeasterly. Peak speeds in less sheltered areas may climb as high as 15 mph with gusts to around 25 mph, 30 mph along NE aspects.

DIV Z: Downslope flow will become SSE/upslope by 0700 PDT before stronger S to SW flow commences thereafter. Speeds near 10 mph should be expected, except along north aspects, where winds may remain upslope, but less than 10 mph. After noon through at least 1600-1700 PDT, SW winds near 12 mph with gusts as great as 18 mph are forecast. The front should arrive closer to 1700 PDT bringing a sharp wind shift to the northeast. Sustained speeds, especially on north aspects will increase to 15 mph with gust ramping up to near 30 mph by sunset.

Stability: Shallow Inversion lifting between 0800 - 1000 PDT. Unstable for thunderstorm development.

CHANCE OF RAIN: 80% **LAL:** 3 **TRANSPORT WINDS:** Westerly at 10 mph becoming northeast late afternoon at 15 mph

TONIGHT: Mostly cloudy with a chance for showers and an isolated wet storm or two. Less smoke and haze.

Low Temperatures: Valley/Drainages: 47-52° Mid-Slope (4000 FT): 45-50° Ridges (> 4500 FT): 45-50°
Relative Humidity Recovery: Valley/Drainages: 73-78% Mid-Slope (4000 FT): 73-78% Ridges (> 4500 FT): 70-75%

DIV A: Strong NE winds will continue overnight with sustained speeds up to 20 mph. Gusts as great as 30 mph (mainly along aligned drainages, ridges and exposed areas) should be anticipated. Sustained NE winds should subside down to near 10 mph with gusts to near 15 mph by sunrise.

DIV W/C: Sustained NE winds near 20 mph mainly in exposed areas. Gusts as high as 30 mph are possible, though channeling may result in higher wind gusts here if winds become aligned with the terrain. Winds are expected to subside by sunrise with sustained speeds near 13 mph with gusts near 18 mph.

DIV Z: Sustained NE winds near 20 mph, especially along the north aspect overlooking Lightning Creek. Gusts as great as 30 mph. Winds will subside down to near 13 mph with gusts to near 18 mph by sunrise.

Stability: Unstable enough for isolated storms. No real inversion due to frontal passage.

CHANCE OF RAIN: 50% **LAL:** 2 **TRANSPORT WINDS:** Northeast at 20 mph

Extended Outlook (Wednesday through Friday): Blustery northeasterly winds will subside through the day on Wednesday. Lingering light rain showers are possible, especially across DIV Z. Rain chances diminish Wednesday afternoon and evening with mostly rain-free conditions expected on Thursday. Elevated RH is anticipated Wednesday and beyond with RH not expected to fall below 40%. There will be another risk for showers and wet storms toward the end of the week and into the weekend. East winds will briefly turn to the SW before becoming NW on Friday and Saturday.

SAFETY MESSAGE

Transition Day

- **Ensure you are getting complete briefings.**
- **Validate the plan to ensure it matches the current situation.**
- **Pass on Situational Awareness gained from previous operational periods.**
- **Know the who, what, when, where, why and how?**
- **Ask for clarification if something does not make sense or if there are questions. You are probably not the only person with that concern or question.**
- **If you see something, say something!**

MAJOR HAZARDS AND RISKS

Chipping Operations Wildlife and Livestock Driving	Hazard Trees Transfer of Command Drought Conditions	Fatigue Complacency Steep/ Rough Terrain
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Planning for Safety

Have multiple plans and make them know

P – Primary Plan (Offense)

Focused on firefighter safety and mission objectives

A – Alternate Plan (Offense)

A fall back plan that closely supports the primary

C- Contingency Plan (Defense)

Entirely focused on firefighter safety

E – Emergency Plan (Defense)

Entirely focused on individual firefighter survival

Planning for Medical Emergencies

Ask and be able to answer these 3 questions:

1. What are we going to do if someone gets hurt?
2. How will we get them out of here?
3. How long will it take to get them to a hospital?

All operational activities should be based on answers to these questions. See page 2 of the IRPG for more guidance.
