Flight Time: 2127 MDT Flight Date: 8/18/2022	Interpreter(s) location: Enoch, UT Interpreter(s) Phone: 435-592-5175	GACC IR Liaison: Jen Frazer GACC IR Liaison Phone: Work – (406) 547-6010 Cell – (203) 695-1207	National Coordinator: Tom Mellin National Coord. Phone: Work – (505) 842-3846 Cell – (505) 301-8176
Ordered By: RIST 406-544-1506 SITL Amy Haas (605) 645-8355	A Number: A-98	Aircraft/Scanner System: N149Z/Phoenix	Pilots/Techs: Pilots: Helquist/Watts Tech: Mann
IRIN Comments on imagery: Good		Weather at time of flight: Clear	Flight Objective: Heat Perimeter Detection / Categorizing Heat Intensity
Date and Time Imagery Received by Interpreter: 8/18/2022 @ 2236 MDT		Type of media for final product: Shapefiles, one geodatabase, two pdf maps, kmz file, IRIN log. IR data posted to IRIN Edit Services (National Incident Feature Service 2022) Digital files sent to: https://ftp.wildfire.gov/public/incident_specific_data/n_rookie_s/2022_fires/2022_Elmo_2/IR/2020819	
Date and Time Products Delivered to Incident: IR data uploaded to IES: 8/19/2022 @ 0550 MDT IR products uploaded to ftp: 08/19/2022 0600 MDT			
Comments / notes on tonight's mission and this interpretation: <ul style="list-style-type: none"> • Started interpretation with incident provided perimeter based on data downloaded from Internal View Services (National Incident Feature Service 2022) on 8/18/2022 @ 2004. • No perimeter growth. Acreage is still 21,349. • Small patch of intense heat at the most northern tip in the middle of the fire. • Small patches of scattered heat. • Lots of isolated heat sources in the middle interior and the middle northern area. • The provided geodatabase and shapefiles are in WGS84 decimal degrees, so would be convenient for working in IES and IVS. • Maps are in NAD83 UTM 11. • Feedback is always appreciated. Please contact the interpreter at the contact information listed above.
