

COLT FIRE

Incident Action Plan

August 6, 2023

Operational Period

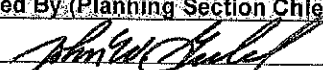

0600 to 2200

MT-SWS-200549

PNQD24 (1522)

903164

INCIDENT OBJECTIVES	1. Incident Name Colt Fire	2. Date Prepared 8/5/23	3. Time Prepared 2100
	4. Operational Period Sunday, August 6, 2023 DAY SHIFT		
Intent, Objectives			
<p>Commander's Intent Success is defined as prioritizing fire fighter safety, minimizing potential impacts/threats to human populations, private land, infrastructure and other identified values; this is achieved by effective risk management and enhanced coordination.</p> <p>Ensure that all incident actions reflect a commitment to aviation, responder, and public safety through using the risk management process outlined in the IRPG, adherence to the 10 Standard Firefighting Orders, mitigation of the 18 Situations That Shout Watch Out and LCES. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action until such time as the risk can be satisfactorily mitigated before re-engaging. Ensure this Commander's Intent is clearly communicated and understood by all resources.</p>			
<p>Operational Objectives <i>Implementation of the following operational objectives is to be applied and accomplished only through managing risk to best assure firefighter safety.</i></p> <ol style="list-style-type: none"> 1. Execute full suppression, full perimeter control action strategies utilizing direct and indirect tactics to minimize impacts to values at risk and firefighter exposure. 2. Prevent or minimize fire impacts to these prioritized values: State Highway 83, private property and infrastructure. 3. Provide Initial Attack within TFR (Temporary Flight Restriction). 4. Consider operational strategies and tactics that minimize smoke impacts to sensitive areas and receptors. Follow guidance in State Smoke Management Plans and coordinate with State and local Air Quality Regulators. 			
<p>Management Objectives</p> <ol style="list-style-type: none"> 1. Provide timely and accurate dissemination of information to residents of Seeley Lake, Condon, fire-adjacent residences and the jurisdictional agencies. Keep these entities informed of management goals, objectives, successes and challenges on the incident. 2. Protect and/or mitigate impacts to the identified values at risk as prioritized by the jurisdictional agencies. Operations personnel should coordinate with appropriate READ(s) to document; and, if necessary, coordinate mitigation measures related to threatened and endangered species, cultural sites, and minimize introduction and spread of noxious/exotic weeds and aquatic species. 			
<p>Additional Commander's Intent Communicate and coordinate incident management activities to ensure they are aligned with the overall goals of the requesting and cooperating agencies.</p> <p>Treat all Incident Management personnel, cooperators, contractors and the local public with dignity and respect creating a "no tolerance" atmosphere for harassment, discrimination, alcohol, or federally prohibited substances.</p>

INCIDENT Weather Forecast

Forecast No: 15
 Prediction For: Sunday
 Shift Date: August 06, 2023
 Forecast Issued: August 05, 2023 at 1800

Name of Incident: Colt
 Unit: MT-SWS / Nrn Rockies Team 5
 Incident Meteorologist: Shawn Smith
 (240) 778-5293

Discussion: Low pressure to our west will continue to interact with moisture ahead of a stationary front today bringing another day of showers and possible thunderstorms with cool temperatures and cloudy conditions. The best chance of thunderstorms will come near pockets of sun and could bring heavy downpours, lightning, and outflow winds. Additional rainfall will be likely tonight and Monday as the low pressure area transits west to east across the fire area. The best chances of thunderstorms on Monday will be during the afternoon. Relative humidity will remain high with the moist conditions.

Forecast for Today:

Sky/Weather:

Mostly Cloudy; Showers with Possible Thunderstorms.

	<u>ICP 4,200'</u>		<u>East End 4,600'</u>		<u>West End 6,600'</u>

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 15

FIRE NAME: Colt

DATE ISSUED: 8/5/2023

UNIT: Montana DNRC / Lolo National Forest

TYPE OF FIRE: Wildfire

OPERATIONAL PERIOD: 8/6/2023 Day

TIME ISSUED: 1900

SIGNED: *Ashley Sitas* *Siban*
Gary McLondon *Siban(C)*

WEATHER:

***** Moist Conditions Continue *****

See Fire Weather Forecast for Details

Local Weather Thresholds that shout WATCH OUT (per Lolo DNRC East pocket card)
Temperatures above 80°, Relative Humidity below 20%, 20' winds above 20 mph

FUELS:

The fire area is dominated by stands of mixed conifer with grass and brush on the surface. Heavy loads of dead and down material as well as concentrations of standing dead subalpine fir in the "gray needled phase" is prevalent. A special fuel of concern is the moss hanging from the timber, often called "Old Mans Beard" or "Goats Beard". This ladder fuel allows fire to easily transition from the surface to the crown. The fuels are considered unseasonably dry for this time of the year. The current ERC-Y is above average the 80th percentile. 100 -hr and 1000 -hr fuel moisture contents are currently both at 9%. At this stage, these fuels will contribute to fire intensity and consumption will occur. Live fuel moistures in the brush fuels are still high enough to keep the fire behavior to a minimum. However, they are being stressed by the warm and dry conditions (notice the red and light green color) these areas may begin to contribute to fire behavior.

Today's Forecasted Fine Dead Fuel Moisture:
8% unshaded, 11 % shaded

FIRE BEHAVIOR:

Cool and moist conditions will continue to keep fire movement at minimum. Fire behavior should be limited to creeping and smoldering in surface fuels. Heavy dead and down will continue to burn due to low fuel moistures.

AIR OPERATIONS

Downdrafts from thunderstorms may interfere with air operations today.

SAFETY:

At all times maintain your situational awareness so you can provide for your safety & safety of your coworkers.

Safety Message

<p>!!MANAGE FATIGUE!! REMEMBER FATIGUE IS CUMULATIVE!!! <input type="checkbox"/> Adequate Rest? <input type="checkbox"/> Overwhelmed (in over your head)? <input type="checkbox"/> Proper Nutrition? <input type="checkbox"/> Driving too far? <input type="checkbox"/> Personal Hygiene? <input type="checkbox"/> Been out way too many days? <i>Complete the checklist for yourself. Be honest, Make sure all systems are GO today.</i></p>	<p>Driving There are narrow roads on the incident. Drive at or below the speed limit with your headlights and seat belts on (Day and Night). Drive defensively. When in doubt, yield the right of way to the other vehicle.</p>	<p>Individual Health Wash hands often to prevent the spread of any contagious diseases. Use mole skin prior to developing blisters. Drink plenty of fluids, primarily water. Monitor each other for signs of dehydration. Encourage snacking throughout the work shifts. Ensure firefighters hydrate before, during, and after work shifts.</p>
---	--	---

Risk Assessment Tool (Real-Time Risk Management)			
1. Do you know the risk associated with your task today? 2. Do you understand why you're doing this task and what the end state looks like?		<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> No <input type="checkbox"/> No
3. Determine whether the benefit of meeting your objective exceeds the degree of risk that will entail (<i>Amount of gain in meeting objectives</i>)	<input type="checkbox"/> Low Gain	<input type="checkbox"/> Moderate Gain	<input type="checkbox"/> High Gain
4. Determine the probability of success in completing your assigned mission. (<i>Probability of success in meeting objectives</i>)	<input type="checkbox"/> Low P.O.S.	<input type="checkbox"/> Medium P.O.S.	<input type="checkbox"/> High P.O.S.
5. RISK ELEMENTS - THESE SIX ELEMENTS ARE IDENTIFIED AS CONTRIBUTING TO A LARGE PORTION OF RISK ON PROJECTS / WORK ACTIVITIES. (RATE EACH ELEMENT 1 THROUGH 10)		SCORE Element Rating	Total risk element scores for GAR risk
Supervision - Leadership is actively engaged, good communication, organized, qualifications, experience levels, clear chain of command. (<i>1=Very competent; 10=Terrible organization</i>)			Total Score = 6-23 GREEN (Low Risk)
Planning - Thoroughly planned, risk assessment, resources match the job, timeline appropriate, emergency contingency in place. (<i>1=Organized & well thought out; 10=No planning, ill-prepared</i>)			
Leader's Intent - Clear task, purpose, and end state; adequate briefings; safety first (<i>1=Same page, objectives addressed; 10=Vague, instructions and assignments not understood</i>)			Total Score = 24-44 AMBER (Medium Risk)
Team Fitness - physical/mental fitness, good morale, mindful, high level of situational awareness, experience, cohesiveness. (<i>1=Strong body & mind; 10=Physically/mentally struggling</i>)			
Environment - Weather & environment conditions, rugged terrain, remoteness, hazards -snags, wildlife, manmade hazards, etc. (<i>1=limited, low risk hazards; 10=numerous, high-risk hazards</i>)			Total Score = 45-60 RED (High Risk)
Duration/Complexity - task duration, repetitive, overextended, air support or logistics dependent (<i>1=Short term project, few moving parts; 10=Long-term project, many moving parts</i>)			
6. DOES THE GAIN WARRANT THE RISK?	< GAIN VS RISK >		Discuss results with team members

Safety is your Responsibility!

Work Assignments

TASK: Continue mop up operations securing fire edge from H22 to DP16. Secure fire edge with direct line from Colt to Beaver Lake.

PURPOSE: To have control features in place that have the highest probability of success to protect critical values at risk. Maintain positive relationships with cooperators and private landowners during suppression operations.

END STATE: The fire is contained at the established control features with minimal impacts to timber sale units, the local economy and the Hwy 83 corridor including homes, powerlines, closures, campgrounds and infrastructure from Beaver Creek Rd to the town of Seeley Lake and from Pierce Lake to Lindbergh Lake.

Special Instructions

Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.
To request Law Enforcement support, use assigned CMD frequency.

AMBO3 Best Practice	E-78	8/8	Taylor Morrissey 559-720-9217	2	Fawn Creek 0600	Fawn Creek 2100

Work Assignments

TASK: Scout control line opportunities utilizing the road system directly west of DP63 with the intention to connect into Sunset Ridge. Coordinate with DIV E to identify control line opportunities to hold fire progression north of Sunset Ridge in the area west of Sunset Peak.

PURPOSE: To find favorable terrain that have the highest probability of success with the least amount of risk to incident resources.

END STATE: Control features are constructed ensuring minimal impacts to values at risk.

Special Instructions

Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible.

To request Law Enforcement support, use assigned CMD frequency.

Work Assignments

TASK: Mop up fire edge from 91226 road to Beaver Lake. Utilize crews to prep dozer line from 91162 road to 9658 road. Prep mechanical line from DP61 to DP62 for planned firing operation in coordination with DIV K. Prep road east of DP61 for planned firing operation. Assist DIV K with scouting and line construction.

PURPOSE: To have control features in place that have the highest probability of success with the least amount of risk to incident resources. Maintain positive relationships with private landowners and cooperators during suppression operations.

END STATE: The fire is contained at the established control features with minimal impacts to private property, natural resources and values at risk. Local relationships are strengthened through timely communication, cooperation and coordination.

Special Instructions

Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. These actions will be coordinated with and approved by the OSC whenever possible. To request Law Enforcement support, use assigned CMD frequency.

Work Assignments

TASK: Prep values at risk in all closure areas and evacuation types from Lindbergh Lake to Lake Inez as directed by Operations. Continue to patrol and scout the Hwy 83 corridor for any new fire activity. Respond to initial attack within the TFR as requested.

PURPOSE: To be prepared to implement structure protection tactics in the event fire becomes established in residential areas. Maintain positive relationships with cooperators and private landowners during suppression operations.

END STATE: Actions taken by incident responders result in minimal impacts to homes, campgrounds and Hwy 83 infrastructure associated with the Colt Fire perimeter.

Special Instructions

Prioritization of all control or containment actions taken during the operational period in this Division will be at the discretion of the DIVS. Actions may have to be taken by the DIVS that are not enumerated in today's IAP. These actions would be a result of a significant change in actual or expected fire behavior over and above that anticipated at the time the IAP was prepared. AIR OPERATIONS SUMMARY 220 Prepared By: Steve Croy Prepared: **08/5/2023** Prepared Time: 19:00 hrs.

1. INCIDENT NAME: Colt Fire **2. OPERATIONAL PERIOD** **08/6/2023** **START TIME:** 0600 **END TIME:** 2100 **SUNRISE:** 0619 **SUNSET:** 2102

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):

1. Smoky conditions & low ceiling can hamper our aviation operations adhere to visibility limitations. DO NOT be pressured into accepting a mission that you know or feels unsafe!
 2. Ensure visibility and winds are adequate to safely conduct flight operations.
 3. If you see a UAV (drone) on your division report it up the chain of command to Air Operations!
 4. Pilot always has final say on conducting any mission.
 5. And always remember: if you see something out of the ordinary, say something!!!

4. READY ALERT AIRCRAFT:

1)H-407RL
 With Litter Kit
 2) H-933CH

Initial Attack Aircraft:
 H-933CH

Colt Fire

Resource Advisory

Invasive Species Prevention

- If you are demobing today, please remember to go through the weed wash station. You will need to have a signed receipt for checkout.
- If you have a drafting hose, please go through the aquatic invasive species (AIS) station:
 1. soak drafting hose and foot valve in water with quat at least 10 minutes to decontaminate
 2. rinse in second tank and make sure the foot valve is not leaking
 3. dry your drafting hose and foot valve in the hot sun until completely dry to the touch before you switch incidents
- Decontaminating your drafting hose and foot valve prevents the spread of invasive species such as zebra mussel into other bodies of water

Grizzly bear

Black bear

Bear Safety

- Please be BEAR AWARE – There have been reports of bears on the line
- Do not keep anything smelly in your tent
- The Flathead and Lolo National Forests are under a food storage order
- All food either needs to be locked in a bear proof cooler or inside a locked vehicle at nighttime
- Toiletries need to be in a locked vehicle with windows rolled up
- There is bear spray available at supply

If you have any questions, please contact your Resource Advisors:

Geoff Bogie – Lead Resource Advisor – 406-214-9515

Autumn Keller – 406-720-3977

Aric Burt (t) – 406-493-5442

Anthony Butterfield (t) – 406-210-7960

FINANCE MESSAGE

- **All resources will turn in HARD COPY CTRs & Shift Tickets.** Shift Tickets & CTRs (and any finance-related documents) can be turned into a Finance drop box at Base Camp) located near the briefing area.
- **Extended Shifts** – Shifts exceeding 16 hours must be documented in the remarks of the CTR and/or Shift Ticket. Mitigation should also be documented in the remarks.
 - **Extended Shift EX.** “Extended shift on 7/20/23 due to critical firing operations on DIV A. Will return to 2:1 as soon as possible”.
 - **Mitigation Ex.** “Mitigated 1 hour on 8/01/23 from extended shift on 7/30/23”
- **Lunch Breaks!** Either show a lunch break or write a justification as to why you did not take one. (*MT DNRC/MT EFFs /MT Local Gov't resources are excluded*).
 - **EX.** “Unable to break for lunch due to ongoing firing operations”.

SHIFT TICKET CHECKLIST:

- **Signatures** – Shift Tickets require 2 signatures. Contractor/Cooperator AND Supervisor.
- **Transport Mileage** – If you have equipment with a transport, please write your mileage in the remarks of your shift ticket, even if the transport did not move.
- **Lunch Breaks** – Equipment on a daily rate must still show hours on the shift ticket. Include “1/2 hour lunch break” written in the remarks or special column.
- **Resource Order #** - Make sure your resource order number is written at the top-right corner of your shift ticket.
- **Incident Replacement for non-consumable items** – Requires a completed Northern Rockies property loss and damage form.

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:
See IRPG page 108

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

ACTIVITY LOG (ICS 214)

1. Incident Name: _____	2. Operational Period: Date From: _____ Date To: _____ Time From: _____ Time To: _____	
3. Name: _____	4. ICS Position: _____	5. Home Agency (and Unit): _____
