Gusty Afternoon Winds in Exposed Locations

Discussion

A weather disturbance in West to Northwest flow aloft will bring increased winds today, especially in areas with exposure to the southwest and over ridgetops where gusts of 25 mph or more are likely this afternoon. This is in association with a weak and mainly dry cold front, which brings a risk for isolated showers and thunderstorms as well, mainly between 1400 and 1900. Winds decrease this evening for most areas but may remain gusty through the night on exposed ridgetop areas. Breezy west winds are expected again on Thursday with afternoon gusts to 25 mph or more on ridgetops.

TODAY:

SKY/WEATHER: Partly cloudy. Increasing afternoon clouds and slight chance of showers and thunderstorms.

Max Temperature: 81-86 lower elevations (below 4000 ft) and 75-80 mid-slopes to ridges.

Min RH: 22-27% lower elevations (below 4000 ft) and 25-30 mid-slopes to ridges.

20 ft WINDS: **Slope/Valley** - Terrain-driven winds 4-9 mph, becoming southwest 6-12 mph. Gusts to 25 mph in the afternoon in exposed areas.

Ridgetop- Southwest 6-12 mph increasing to 12-17 mph with gusts to 28 mph in the afternoon.

LAL: 2 **Chance of Wetting Rain:** 10% **HAINES INDEX:** 3 (Very Low)

TONIGHT:

SKY/WEATHER: Partly cloudy. Isolated evening showers and thunderstorms.

Min Temperature: 50 to 55.

Max RH: Over 75% valleys and drainage bottoms, 60-70% elsewhere.

20 ft WINDS: **Slope/Valley** - Southwest 6-12 mph with gusts up to 25 mph early in the evening, then decreasing and becoming down-drainage 3-8 mph after midnight.

Ridgetop- Southwest 10-15 mph. Evening gusts to 25 mph.

LAL: 2 **Chance of Wetting Rain:** 10%

Outlook for THURSDAY:

SKY/WEATHER: Partly cloudy.

Max Temperature: 80-85 lower elevations (below 4000 ft) and 73-78 mid-slopes to ridges.

Min RH: 20-25% lower elevations (below 4000 ft) and 25-30 mid-slopes to ridges.

20 ft WINDS: **Slope/Valley** - Southwest 4-9 mph, becoming West 6-12 mph with gusts to 20 mph in the afternoon. **Ridgetops-** Southwest 8-14 mph, becoming West in the afternoon with gusts to 25 mph .

Extended Forecast Discussion: Gradual warming and drying occurs late this week as an upper-level high pressure ridge builds across the Northwest US. A westerly flow aloft will maintain breezy afternoon winds on ridgetops with lighter terrain-driven winds on lower slopes and valleys.

WEATHER SUMMARY

WEATHER: Partly cloudy with a chance of showers and thunderstorms in the afternoon.
MAX TEMP: Below 4000ft 81-86° mid-slope and ridge tops 75-80°.
Humidity: Below 4000ft 22-27% mid-slope and ridge tops 25-30%.
20 FOOT WINDS: Valleys/Lower Slope: Terrain driven winds 4-9mph, becoming SW 6-12mph, gust 25mph.

Haines 3 LAL 2

FUELS: The major fuel types, found in and around the fire area include compact timber stands, timber Understory, brush and heavy down and dead.

Ignition Receptiveness: ERC: just below the 90th percentile. **Burn Index:** above the 90th percentile

Probability of Ignition: 74-77% **Spotting distance:** Ridge top timber .4 mile, brush .2 mile

Dryness: Dead and down fuel moistures: **1 hour** – 4% **10 hour**-7 %, **100 hour** -15%, **1000 hour**–16%.

FIRE BEHAVIOR

Forecasted strong afternoon SW winds and low RH during today's operational period can intensify fire behavior and increase fire activity. Watch for alignment. Fuels remain dry and receptive. Current drought conditions continue to affect all fuel types. Be mindful of the potential for new starts in the immediate area. Even though fire activity has been minimal, don't be lured into a false sense of security, wind can dramatically change the fire environment. Beware of down-drafts from thunderstorms.

SPECIFIC FIRE BEHAVIOR:

Division A: Minimal fire activity, smoldering and creeping. SW winds should help reinforce containment lines.

Division B: Minimal fire activity, interior smoldering. Potential for spotting due to strong SW winds.

Division C: Minimal fire activity, interior smoldering. Potential for spotting due to strong SW winds into Emery Creek. Possible roll-out and slope reversal.

Division Z: Minimal fire activity, interior smoldering. Potential for spotting due to string SW winds around Hungry Horse Mountain. Possible roll-out and slope reversal.

Aviation Safety: Never stand directly beneath hovering helicopter unless trained in and performing sling load hookup operations.

Safety Message

Watch Out Situations: Wind increases and/or changes direction.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

| BR/DV | HAZARDOUS ACTIONS – CONDITIONS | MITIGATIONS – WARNINGS – REMEDIES |
|-------|--------------------------------|--|
| ALL | TRAFFIC HAZARDS AND DRIVING | <ul style="list-style-type: none"> • Take extra precautions when entering or exiting the roadways. • Maintain high visibility when in the operational area, and use warning lights when working on roads or traveling in smoke. • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. • 5mph speed limit in and around ICP, keep your speed down in all areas. Drive at or below posted speed limits • Use warning lights when working on roads or traveling in smoke. • Use chock blocks and turn wheels into hills. • Be alert for wildlife. Dusk to Dawn poses the greatest potential for accidents. |
| ALL | STEEP TERRAIN & ROLLING DEBRIS | <ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Do not work above any personnel. • Evaluate the necessity to send personnel into areas with limited access. |
| ALL | HAZARD / DANGER TREES | <ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit the number of personnel around snags and their exposure time. • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees. |
| ALL | FIRE BEHAVIOR | <ul style="list-style-type: none"> • Are you seeing what we have predicted? • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Plan & communicate your exit strategy with your crew and adjacent resources. • Provide additional briefing for new resources and maintain communications. |
| ALL | HEAT-RELATED ILLNESS | <ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, a minimum of 10 minutes every hour. • Recognize symptoms of heat-related illness which include low energy, cramping, headaches, dizziness, poor rest and eating habits, hot skin, and lack of sweating. |
| ALL | COMMUNICATIONS | <ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) with those who also have a need. • Answer questions and/or ask for intel when you do not know the plan. • Ensure all personnel are familiar with the incident and IA communications plans. |
| ALL | WILDLIFE | <ul style="list-style-type: none"> • High concentration of wildlife in the area • Use bear-resistant garbage cans. • Do not keep food inside your vehicle or tent. • Do not feed bears or other wild animals. • Never approach bears or cubs. • If you see a black bear, be aggressive and assert your dominance, make noise, and back away slowly. DO NOT RUN! |
| ALL | INDIRECT LINE CONSTRUCTION | <ul style="list-style-type: none"> • Establish and maintain LCES • Utilize favorable locations when constructing control features; IE lighter fuels, natural or existing barriers, and ridgelines • Watch out as there is unburned fuel between you and the fire. |
| ALL | PUBLIC SAFETY | <ul style="list-style-type: none"> • Have a purpose for where you drive and what you do • During high fire activity, do not expect drivers to pull over or drive through the area slower. • Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. |
| ALL | HEAVY EQUIPMENT OPERATIONS | <ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use road guards as needed to control traffic. |
| ALL | WEATHER | <ul style="list-style-type: none"> • Maintain continuous Situational Awareness based on the fire environment, observed fire behavior, hazards, and incident objectives. • Take weather throughout the shift to get timely and accurate information. • Is what we predicted what you are observing? • Request spot weather forecasts if you notice a notable change in the weather. • Communicate any changes in the weather with your crew and adjacent resources. |
