INCIDENT ACTION PLAN

Ridge Fire MT-FNF-000518 P1QGT5 (0110)

Friday - Saturday OPERATIONAL PERIOD

08/11/23 - 08/12/23

DAY: 0600 - 1800

NIGHT: 1800 - 0600

INTENTIONALLY LEFT BLANK

INCIDENT OBJECTIVES (ICS 202)

INCIDE	ENI OBJECTIV				MT
1. Incident Name:	2. Operational Period:	Date From:		Date To:	8/12/2023
RIDGE FIRE	L	Time From	0600	Time To:	0600
3. Objective(s):					***
Management Objectives	ans identified assessed and	l mitiaatad			
- Manage risk to responders by ensuring hazards		i mitigated.			
- Minimize impact to economy, property, and infras					
- Minimize impact to natural, cultural, wildlife and h	neritage resources.				
- Mitigate or eliminate environmental resource imp	acts as a result of fire suppre	ession efforts.			
- Ensure coordinated, timely and accurate release	of public information.				
- Foster and maintain relationships with all cooper	ators and stakeholders.				
- Maintain fiscal accountability and keep costs con	nmensurate with values at ris	sk.			
Control Objectives					
- North of Fire Service Road 38					
- South of Great Bear Wilderness					
- East of the communities along Highway 2					
- West of Tiger Creek					
Command Emphasis					
- Coordinated Percision					
General Safety Message					
- Good communication is the bridge between conf	usion and clarity.

Ridge Fire Weather Forecast

FORECAST NO: 3 NAME OF FIRE: Ridge

PREDICTION FOR: Friday UNIT: MT-FHA

SHIFT DATE: 08/11/23 SIGNED: Bob Hoenisch - Incident Meteorologist

FORECAST ISSUED: 08/10/23 at 2000 MDT text/email obs: 406-899-4112/robert.hoenisch@noaa.gov

Becoming Warmer and Drier through the Weekend

<u>WEATHER DISCUSSION:</u> A general westerly flow continues across the Northern Rockies with noticeable warming and drying beginning today. General winds from the west will affect ridgetops and areas with open exposure while relatively light terrain-driven winds prevail across most slope and drainage locations. A weak weather disturbance passing to the north and east of the area will bring some increase in clouds on Saturday with ridgetop winds turning more to the northwest Saturday afternoon and evening.

TODAY:

SKY/WEATHER: A few clouds in the morning, then mostly sunny.

Max Temperature: 80-85 lower elevations (below 4500 ft) and 74-79 mid-slopes to ridges.

Min RH: 21-26% lower elevations (below 4500 ft) and 26-31% mid-slopes to ridges.

20 ft WINDS: Slope/Valley – Becoming upslope/up-drainage 4-9 mph by 1200.

Ridgetop - West 6-12 mph. Afternoon gusts up to 18 mph.

LAL: 1 Chance of Wetting Rain (0.10"): Zero HAINES INDEX: 3 (Very Low)

TONIGHT:

SKY/WEATHER: Partly cloudy. **Min Temperature:** 49 to 54.

Max RH: Over 75% valleys and drainage bottoms, 65-75% elsewhere.

20 ft WINDS: Slope/Valley - Becoming downslope/down-drainage 3-8 mph by 2100.

Ridgetop - West 6-12 mph. Evening gusts to 18 mph.

LAL: 1 Chance of Wetting Rain (0.10"): Zero

Outlook for SATURDAY:

SKY/WEATHER: Partly cloudy with increasing afternoon clouds.

Max Temperature: 82-87 lower elevations (below 4500 ft) and 76-81 mid-slopes to ridges.

Min RH: 19-24% lower elevations (below 4500 ft) and 25-30% mid-slopes to ridges.

20 ft WINDS: Slope/Valley - Becoming upslope/up-drainage 4-9 mph by 1200. A few afternoon gusts

from the Northwest to 15 mph.

Ridgetop - West 6-12 mph, becoming northwest in the afternoon with gusts to 20 mph.

Extended Forecast Discussion: Significant warming and drying occurs this weekend as an upper-level high pressure ridge builds across the Northwest US and strengthens through early next week. Very warm temperatures and low afternoon humidity are likely to peak Monday and Tuesday with overnight thermal belts bringing only moderate overnight humidity recovery at mid-upper slope locations.

8/10/2023 observations thru 2000	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation
Spotted Bear LO (7202')	48	83%	58	48%	SW 34 mph	0.00"
Fielding RAWS (4641')	52	99%	67	41%	W 24 mph	0.02" (early AM)
West Glacier RAWS (3165')	52	100%	74	37%	W 18 mph	0.13" (early AM
Hungry Horse RAWS (3123')	54	100%	73	37%	NW 22 mph	0.08" (early AM)

INPUTS

WEATHER SUMMARY

WEATHER: AM clouds, then mostly sunny

MAX TEMP: Below 4500ft 80-85° mid-slope and ridge tops 74-79°. **Humidity:** Below 4500ft **21-26%** mid-slope and ridge tops 26-31%.

20 FOOT WINDS: Valleys/Lower Slope: upslope/up-drainage 4-9mph by 1200

Ridge/Upper slope: W 6-12mph, afternoon gust up to 18mph.

Haines 3 LAL 1

FUELS: The major fuel types, found in and around the fire area include compact timber stands, timber Understory, brush and heavy down and dead.

Ignition Receptiveness: ERC: below the 90th percentile. Burn Index: above the 90th percentile.

Probability of Ignition: 75-77% Spotting distance: Ridge top timber .4 mile, brush .2 mile

Dryness: Dead and down fuel moistures: 1 hour - 4% 10 hour-14 %, 100 hour -15%, 1000 hour-15%.

FIRE BEHAVIOR

West winds will affect exposed ridge tops and may cause flare-ups in areas with open line. Drought stricken fuels will continue to dry and become receptive. This is the beginning of a warming and drying trend. Potential for fire behavior to increase from low/moderate to active. Large fire runs can be attributed to fuel driven topography influenced alignment. Avoid complacency, as past fire behavior has been benign. Conditions can change rapidly with increased wind and or wind shifts.

SPECIFIC FIRE BEHAVIOR:

Division A: Minimal fire activity, smoldering and creeping. West winds should help reinforce containment lines. Possible flare-ups and roll-out within indirect lines.

Division G: Minimal fire activity, interior smoldering and creeping. Potential for roll-out and flare-ups from West winds.

Division M: Minimal fire activity, interior smoldering and creeping. Potential for spotting due to West winds into Emery Creek. Expect backing fire with possible roll-out and slope reversal.

Division W: (unstaffed) Minimal fire activity, interior smoldering and creeping. Potential for spotting due to West winds around Hungry Horse Mountain. Expect backing fire with possible roll-out and slope reversal.

Aviation Safety/ Watchout:

Should the operation or the flight be stopped due to a change in conditions?

Safety Message/ Watch Out Situations:

Snags and stump holes are likely in timber areas.

Ridge Fire - Safety Message

INCIDENT #MT-FNF-000518

DATE: 08/11-12/2023 TIME: 0600-0600 24 Hour Shift

Lead with Respect

Fireline leaders respect their co-workers and subordinates. This attitude creates an atmosphere of professionalism and effectiveness in line resources. As an additional benefit, safety is enhanced. Employ your people in accordance with their qualifications and capabilities.

- Know your people and look out for their well-being.
- Keep your people informed.
- Build the team.

Working with Heavy Equipment

- Don't approach until you have eye contact with the operator and all implements have been lowered.
- Avoid working downhill from equipment.
- Communicate all hazards to the operator.
- During night shift or low visibility, use a headlamp or glow sticks so the operator can see you.
- Equipment operators can have a difficult time see you ground personnel; take responsibility for your safety and all of those around you.

Look Up, Look Down, Look Around

- Look Up: Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increases in speed. Watch for air operations and water drops. Look for snags.
- Look Down: Watch your footing. Keep an eye out for snakes, bee nests, stump holes and observe fuels on the ground.
- Look Around: Check fuel loading in the area, general terrain, current fire behavior and ladder fuels. Keep an eye on fellow firefighters for signs of heat stress and smoke inhalation.

Safety is No Accident!

- Situational Awareness: gathering information about your surroundings.
- Hazard Assessment: identify the tactical hazard.
- Hazard Control: develop mitigations to reduce or eliminate risk.
- Decision Point: are mitigations in place and timely?
- Evaluate: What is changing? Are strategy and tactics working? Is fatigue becoming a bigger factor?

Prepared by:

CIIMT 4 Safety Group

ICS (215A) 24 HOUR SHIFT

	INCIDENT KISK ANALYSIS	ICS (215A) 24 HOUR SHIFT				
BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES				
ALL	TRAFFIC HAZARDS AND DRIVING	 Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. 5mph speed limit in and around ICP, keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills. Be alert for wildlife. Dusk to dawn poses the greatest potential for accidents. 				
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access. 				
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.20) Limit the number of personnel around snags and their exposure time. Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees. 				
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Key to success in the WUI is preparation and preplanning. Be active and engage in defense preparations & don't wait for the fire to arrive. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, and Escape Routes. 				
ALL	AVIATION OPERATIONS	 Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources 				
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) with those who also have a need. Answer questions and/or ask for intel when you do not know the plan. Ensure all personnel are familiar with the incident and IA communications plans. 				
ALL	WILDLIFE	 High concentration of wildlife in the area Use bear-resistant garbage cans. Do not keep food inside your vehicle or tent. Do not feed bears or other wild animals. Backhaul garbage from drop points. Never approach bears or cubs. If you see a bear, be aggressive, assert dominance, make noise, and back away slowly. DO NOT RUN! 				
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES Utilize favorable locations when constructing control features; i.e. lighter fuels, natural or existing barriers, and ridgelines. Watch out as there is unburned fuel between you and the fire. 				
ALL	PUBLIC SAFETY	 Have a purpose for where you drive and what you do. During high fire activity, do not expect drivers to pull over or drive through the area slower. Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. 				
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic. 				
ALL	FIRING OPERATIONS AND DEVICES	 Follow the chain of command when undertaking burning operations. Ensure that the aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. Wear and use appropriate PPE. Request spot weather forecasts prior to burning. Initiate burning after ensuring the plan is authorized and understood by all. 				
M.	INCIDENT NAME:	OPERATIONAL PERIOD: 0600 – 0600				
	RIDGE FIRE	AUGUST 11/12, 2023 Date/Time Prepared: 08/10/2023 – 1500				

RIDGE FIRE AUGUST 11, 2023 Human Resource Message

Alcohol, Non-Prescription, and Federal-Illegal Drugs are <u>Not Allowed</u> on This or Any Incident!

Alcohol and/or illegal drugs are NOT allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing and able to perform the duties for which they are qualified and for which they are assigned on this incident.

Feel free to call/text HRSP if you have questions, concerns, or just want to chat

Adam Alvarez – HRSP - 707-373-8715

MUTUAL RESPECT, YOU MAKE THE DIFFERENCE!

NW Montana Real Estate Inv	E-57	Need Govt signature
J3 Contracting	E-84	Need 8/7 travel times
Rocky Mountain	E-67	Need travel miles 8/6 lowboy

You're in Bear Country

- DO NOT bring food, toiletries, or scented items into your tent.
- Sleep at least 100 yards away from the kitchen/food prep area.
- Secure food attractants properly in a bear resistant bin or in a secured building.
- Stay alert and look for bear activity, especially where visibility or hearing is limited (thick vegetation, streams).
- Make noise whenever possible to avoid surprising a bear, especially where visibility or hearing is limited.
 The human voice is the best deterrent, be loud.
- Travel in a group and keep members together.
- Never run from a bear.
- If a bear is hanging around, alert others, and from a safe place make it leave. Yell, set off car alarms, air horns, bang pots and pans, etc.
- If you experience any type of conflict with a bear or have any questions/concerns, immediately contact Bear Specialist Justine Vallieres at (406)250-1265.

FIRE INFORMATION CONTACT — Please direct any public or media inquiries to the Information Center at:

406-998-6074 (staffed from 0800-1930) or 2023.ridge@firenet.gov

PICTURES NEEDED!!

Your photos help tell this fire's story and justify our hard work! Take photos of the fire and firefighters working and Airdrop to a PIO's phone. Be sure to provide information. Looking for landscape photos of steep rock terrain, active fire behavior, as well as crews working. And as always please make sure to have all PPE on if sending photos of firefighters. Thanks!

Please email/text/airdrop your photos to: 406-998-6074 or

2023.ridge@firenet.gov

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

*This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of	Severity of Emergency □RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.							
-	ND	OYEL	LOW / PRIORITY 2 S	erious Injury or illness. Ev	acuation may be DELAYE
