WEATHER DISCUSSION: Gradual warming and drying continues through the weekend as high pressure strengthens to the west of the region. Today's afternoon temperatures will be 2-3 degrees up from yesterday with afternoon humidity down 3-5%. A weather disturbance tracking to the north and east of the area will bring some varying amounts of mid and high-level cloud-cover through this evening with general winds from the west to northwest through this afternoon, turning more northerly this evening and overnight. A period of breezy northeast winds is possible tonight along the Flathead River corridor from West Glacier to Hungry Horse with lighter terrain-driven winds prevailing across most of the fire area.

Haines 3 LAL 1

FUELS: The major fuel types, found in and around the fire area include compact timber stands, timber Understory, brush and heavy down and dead.

Ignition Receptiveness: ERC: 34= 90th percentile. Burn Index: 27 just below the 90th percentile.

Probability of Ignition: 73-77% **Spotting distance:** Ridge top timber .4 mile, brush .2 mile

Dryness: Dead and down fuel moistures: 1 hour – 4% 10 hour-17 %, 100 hour -16%, 1000 hour-16%.

FIRE BEHAVIOR

Expect a transition in weather to a hotter and dryer pattern for several operational periods. Conditions will be similar to the significant growth stages early in the incident. Poor overnight recovery will increase burn periods. Potential for fire behavior to increase from low/moderate to active. Down and dead fuels are currently realizing the fuel moisture increases from the previous rain. With the forecasted rise in temperature, expect the fuels to dry in an abbreviated time frame and become available. Potential for active fire behavior still exists.

SPECIFIC FIRE BEHAVIOR:

Division A: Minimal fire activity, smoldering and creeping. Possible flare-ups and roll-out within indirect lines. Backing with slow rate of spread

Division G: Minimal fire activity, interior smoldering and creeping. Potential for roll-out and flare-ups. Backing with slow rate of spread.

Division M: Minimal fire activity, interior smoldering and creeping. Backing with slow rate of spread.

Division W: (unstaffed) Minimal fire activity, interior smoldering and creeping. Backing with slow rate

Aviation Safety/ Watchout:

Have flight hazards been assessed? Have the pilots been informed?

Safety Message/ Watch Out Situations:

Snags/ trees can burn in the upper portions. Look up! Just because there is no fire in the lower trunk doesn't mean it's safe.

Ridge Fire – Safety Message

INCIDENT #MT-FNF-000518

DATE: 08/12-13/2023 TIME: 0600-0600 24 Hour Shift

RISK MANAGEMENT

Use the following process to quickly assess risk for the situations you face throughout the day.

Step 1 - Identify the hazards. Make this an ongoing, continuous process in your daily decision-making routine. Gather as much information as possible.

Step 2 - Assess the risk levels. The probability and severity of an undesirable outcome linked to identified hazards = **RISK**.

Step 3 - Analyze and select control or mitigation measures. Limiting exposure is almost always an option.

Step 4 - Reassess risk level with controls in place (residual risk).

Step 5 - Make your informed decision based on the residual risk. Ask the **risk vs. gain** question: is the benefit of the action I'm considering worth the risk?

Step 6 - Monitor the situation.

“SEE SOMETHING.....SAY SOMETHING!”

If you see a hazard or a dangerous situation developing, tell your supervisor and those around you.

LEADERSHIP IS ALL ABOUT CHARACTER

Fire leaders set the example by exhibiting strong character. Character is based on values. It is the combination of actions and words that others appraise to determine if the leader can be trusted to do the right thing.

- Know our values, review them frequently, and look for areas of improvement.
- Admit when we are wrong.
- Take time to reflect on our actions.
- Find role models and ask them to be a mentor.
- Study leaders and leadership, learn from their successes and mistakes.

RECOGNIZE THE SIGNS OF FATIGUE

The effects of fatigue can directly hinder our abilities to:

- Perform various tasks, maintain a positive and supportive attitude
- Maintain situational awareness and a high degree of alertness
- React appropriately in a timely manner and in fashion
- Retain a sharp memory and recollection of information

Reporting Harassment

Many employees do not formally report harassment for a variety of reasons. They may not want to cause trouble, they may not trust their company to act, or they may fear retaliation from the harasser or coworkers. Most of the time they just want it to go away.

While these concerns are understandable, it's very important to report workplace harassment to your HR department or other decision makers. If you don't report harassment, there won't be a chance to deal with it and make it stop.

This incident has a policy on harassment to include reporting misconduct to the HRSP if you are not able to resolve it within your unit. The incident HRSP has the capability of addressing misconduct on the incident, as well as reaching out to your home agency to ensure harassment stops when you get back to your home unit.

The requirement of zero tolerance of harassment, bullying, intimidation, or any similar behavior on this incident.

If you would like to understand more, or would just like to chat, feel free to reach out.

NOTICE

You're in Bear Country

- DO NOT bring food, toiletries, or scented items into your tent.
- Sleep at least 100 yards away from the kitchen/food prep area.
- Secure food attractants properly in a bear resistant bin or in a secured building.
- Stay alert and look for bear activity, especially where visibility or hearing is limited (thick vegetation, streams).
- Make noise whenever possible to avoid surprising a bear, especially where visibility or hearing is limited. The human voice is the best deterrent, be loud.
- Travel in a group and keep members together.
- Never run from a bear.
- If a bear is hanging around, alert others, and from a safe place make it leave. Yell, set off car alarms, air horns, bang pots and pans, etc.
- If you experience any type of conflict with a bear or have any questions/concerns, immediately contact Bear Specialist Justine Vallieres at (406)250-1265.
