**...Critical Combination of Heat, Very Low RH and Increasing Wind This Afternoon and Evening...  
 \*\*\*Fire Weather Watch for Gusty Winds and Low RH Friday\*\*\***

**WEATHER DISCUSSION:** A very warm and dry airmass remains in place across the region with afternoon humidity below 20% and poor overnight humidity recovery outside of drainage bottoms/valleys. West to southwest winds increase this afternoon with ridgetops and areas with terrain alignment likely to see gusts to 25 mph while areas with less exposure see a few afternoon gusts of 15-20 mph. Clouds and moisture aloft begin to increase tonight with an isolated overnight shower or thunderstorm possible. Winds increase further on Friday with only slight improvement to temperature and humidity.

### TODAY:

**SKY/WEATHER:** Partly cloudy. High clouds with late afternoon cumulus.

**Max Temperature:** 95-100 lower elevations (below 4500 ft) and 87-93 mid-slopes to ridges.

**Min RH:** 14-19%.

**20 ft WINDS:** Slope/Valley – Upslope/up-drainage 3-7 mph, becoming west to southwest 5-10 mph after 1300. Late afternoon gusts to 20 mph in areas with exposure and terrain alignment.

Ridgetop-West 5-10 mph increasing to 10-15 mph in the afternoon with gusts to 25 mph.

LAL: 1                                      **Chance of Wetting Rain (0.10"):** Zero                                      **HAINES INDEX:** 4 (Low)

### TONIGHT:

**SKY/WEATHER:** Partly cloudy. An isolated shower or thunderstorm possible overnight.

**Min Temperature:** 54-59 valleys and drainage bottoms, 60-65 mid-slopes to ridgetops.

**Max RH:** 60-65% valleys and drainage bottoms, 35-40% mid-slopes to ridgetops.

**20 ft WINDS:** Slope/Valley - Becoming downslope/down-drainage 3-8 mph by 2100.

Ridgetop - West 6-12 mph. Gusts 15-20 mph through the overnight period.

LAL: 2                                      **Chance of Wetting Rain (0.10"):** Zero

### Outlook for FRIDAY:

**SKY/WEATHER:** Mostly cloudy in the morning then partly cloudy in the afternoon.

**Max Temperature:** 85-90 lower elevations (below 4500 ft) and 80-85 mid-slopes to ridges.

**Min RH:** 15-20% lower elevations (below 4500 ft) and 21-26% mid-slopes to ridges

**20 ft WINDS:** Slope/Valley - Southwest 5-10 mph, increasing to 8-12 mph with gusts up to 25 mph in the afternoon.

Ridgetop - Southwest 6-12 mph increasing to 12-16 mph with gusts to around 30 mph. Isolated gusts to 35 mph possible on ridgetops above 6000 ft.

**Extended Forecast Discussion:** More noticeable moderation in temperature and humidity occurs this weekend as additional moisture moves into the area for increased cloud-cover and a return to seasonal temperatures. Thunderstorm potential also increases late Friday through Saturday with chances for wetting precipitation increasing Sunday and Monday.

**Probability of Ignition:** 86-89% **Spotting distance:** Ridge top timber .4 mile, brush .2 mile  
**Dryness:** Dead and down fuel moistures: 1 hour – 3% 10 hour-10 %, 100 hour -11%, 1000 hour-14%.

### FIRE BEHAVIOR

**\*\*\*RED FLAG WARNING\*\*\*** High risk burn environment due to critical fire weather, gusty winds and low RH. With clear air, expect fire behavior to increase. Anticipate fire behavior (group torching, surface fire, spotting) to increase in Div Mike, Romeo and Whiskey. Emery Creek from DP10 North to DP8 has channeled West winds into a South to North orientation. Much stronger Westerly winds predicted, Northern and Eastern areas of the incident will most likely be effected. Interior islands may be a source for casting embers over control lines.

#### SPECIFIC FIRE BEHAVIOR:

**Division A:** Minimal fire activity, interior smoldering and creeping. West winds should help reinforce control lines.  
**Division M:** Moderate fire behavior, interior smoldering and creeping. Potential for flare-ups, roll-out and spotting into Emery Creek.  
**Division R:** Active fire behavior, interior smoldering and creeping. Anticipate backing, torching and spotting into Highline Loop on the leeward side of Hungry Horse Mountain. Interior islands will continue to be consumed. Expect fire intensity to increase once the inversion has lifted.  
**Division W:** Active fire behavior, interior smoldering and creeping. Backing (near 38 rd.). Potential for roll-out and flare-ups near control lines. Expect an increase in fire behavior in fuels treatment areas (type converted fuel beds). Plan for the strong West winds to materialize in the Hungry Horse Creek drainage. Anticipate fire intensity to increase once the inversion has lifted.  
**Division DD: Doris Fire,** Moderate fire behavior, The North flank will continue to move towards the summit against the wind, flanking into Doris Creek (North) and Lost Johnny drainage (South). The East flank will continue to move toward the reservoir.

#### Aviation Safety/ Watchout:

How can high altitudes and/or high temperatures affect helicopter performance capabilities?

#### Safety Message/ Watch Out Situations:

Building indirect fireline, or unburned fuel remains between you and the fire.

**\*\*\*RED FLAG WARNING\*\*\*** High risk burn environment due to critical fire weather, gusty winds and low RH. With clear air, expect fire behavior to increase, anticipate single/group torching, surface fire and spotting. Topographical features will increase wind and/or create eddying effects.

### SPECIFIC FIRE BEHAVIOR:

**Sullivan Fire:** Active fire behavior, West Flank, surface runs, torching and spotting. Flanking into Branch Creek, Westerly movement on both sides of the ridge. North Flank, backing and spotting into Ball/Branch Creek. East Flank, potential for short crown runs and spotting onto the leeward side of Kah Mt. South Flank, backing into Sullivan Creek and possible slope reversal. Anticipate active fire behavior in the South Fork Connector drainage.

**Bruce Fire:** Active fire behavior. West Flank, backing. North and East Flank, single/group torching, spotting and surface runs on Stony Hill. South Flank, backing into Bruce Creek and potential for slope reversal.

### Aviation Safety/ Watchout:

How can high altitudes and/or high temperatures affect helicopter performance capabilities?

### Safety Message/ Watch Out Situations:

Building indirect fireline, or unburned fuel remains between you and the fire.

# Ridge / Tin Soldier Fire – Safety Message

INCIDENT #MT-FNF-000518

DATE: 8/18/2023 TIME: 0600-1800 Day Shift

## Situational Awareness

In the wildland fire environment, "SA" is a requirement

- Driving: Maintain safe driving practices
- Trees: Gravity always wins. Look up, down and around
- Steep Terrain: Look for rolling material
- Fatigue: Monitor your health and that of those around you
- Concentrate: Stay focused on the task at hand
- Communications: Be clear, be concise, be accurate
- Smoke: Recognize the effects of long-term smoke exposure and mitigate

## General Safety Concerns

- Driving – Narrow dusty roads, others driving faster than we do... HEADS UP!
- New Resources – Conduct more specific briefings on potential fire behavior.
- Hazardous Conditions – Use all available assessment tools; Heads up for fire behavior, Ensure LCES is in place; Take extra time to ensure it is safe to engage! Use extra caution all the time.
- All trees can be dangerous – They don't have to be leaning, dead, burned or gnarly. Perform adequate assessments and minimize exposure to risk around all trees.
- Line Construction – Use all of the safety protocols concerning line construction. Watch the spacing, footing and other firefighters down slope.

### End of assignment watch outs

- Not mentally engaged in the task at hand
- Your driver is driving faster than when you got here
- Not giving good, thorough briefings
- Your hardhat and web gear are still on the truck
- Assuming all is good because you worked this piece of ground yesterday
- All the conversations are about what you are going to do when you get home
- You and your folks are tripping and stumbling more than usual
- It is taking you longer to get out of camp and out to the line
- No AAR after each shift

### Factors that contribute to fatigue

- Carbon Monoxide
- Dehydration
- Heat Stress
- Poor fitness level can reduce resistance to fatigue.
- 24 hours awake affects your decision-making capability like .10 blood alcohol content

### **Keep Your Head in the Game**

The demands expected of the people assigned to incidents are complex, different, exhausting, and exciting. No matter what our particular assignment to the incident is, there is a common expectation placed on each of us - our readiness to take on the assignment.

To maintain this readiness throughout the incident, we need to continue focusing on the objectives. We must not be distracted by detours that can take us out of the game and impact our readiness to complete the mission.

"Get on the field! Let's go! Get your heads in the game!!"
