## Ridge/Doris Point Fire Weather Forecast

FORECAST NO: 14

PREDICTION FOR: Tuesday

**SHIFT DATE: 08/22/23** 

FORECAST ISSUED: 08/21/23 at 2000 MDT

NAMES OF FIRES: Ridge, Doris Point UNIT: MT-Flathead National Forest

SIGNED: Bob Hoenisch - Incident Meteorologist

text/email obs: 406-899-4112/robert.hoenisch@noaa.gov

<u>WEATHER DISCUSSION:</u> Steady rain has ended but elevated moisture lingering across the area will result in the development of showers and thunderstorms at times today, especially this afternoon and evening. The unusually high moisture content will support heavy downpours with some showers and all thunderstorms that develop today. Brief heavy rainfall rates with storms today could pose a risk for mud/debris flows in drainages that saw high fire intensity.

#### TODAY:

**SKY/WEATHER:** Mostly cloudy with some breaks of sun. A few showers in the morning with showers and thunderstorms likely in the afternoon.

Max Temperature: 72-77 lower elevations (below 4500 ft) and 66-71 mid-slopes to ridges.

Min RH: 45-50% lower elevations (below 4500 ft) and 50-55% mid-slopes to ridges.

20 ft WINDS: Slope/Valley - Southwest 4-9 mph.

Ridgetop - Southwest 6-11 mph with gusts to around 18 mph.

LAL: 3

Chance of Wetting Rain (0.10"): 60%

HAINES INDEX: 2 (Very Low)

#### TONIGHT:

SKY/WEATHER: Mostly cloudy. Showers likely with a chance of thunderstorms, mainly in the evening.

Min Temperature: 50-55.

Max RH: Greater than 90%.

20 ft WINDS: Slope/Valley - Southeast up to 7 mph, becoming southwest after midnight.

Ridgetop - Southeast 6-11 mph with gusts to 16 mph, becoming southwest after midnight.

LAL: 3

Chance of Wetting Rain (0.10"): 40%

#### Outlook for WEDNESDAY:

**SKY/WEATHER:** Partly cloudy. Slight chance of afternoon showers and thunderstorm. **Max Temperature:** 70-75 lower elevations (below 4500 ft) and 64-69 mid-slopes to ridges.

Min RH: 38-43% lower elevations (below 4500 ft) and 43-48% mid-slopes to ridges

20 ft WINDS: Slope/Valley - Upslope/up-drainage to 7 mph, becoming southwest 4-9 mph in the

afternoon

Ridgetop – Southwest 8-13 mph with afternoon gusts to 25 mph.

**Extended Forecast Discussion:** A Pacific weather system lifting out across western Canada will keep temperatures somewhat below seasonal averages on Wednesday and bring breezy southwest winds to the area. A drying and warming trend begins Thursday with temperatures warming above seasonal averages this weekend.

8/21/2023 observations thru 1900	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation

#### WEATHER SUMMARY

**WEATHER:** Mostly cloudy with some breaks of sun. A few showers in the morning with showers and thunderstorms likely in the afternoon

MAX TEMP: 72-77 lower elevations (below 4500 ft) and 66-71 mid-slopes to ridge Humidity: 45-50% lower elevations (below 4500 ft) and 50-55% mid-slopes to ridge

20 FOOT WINDS: Valleys/Lower Slope: Southwest 4-9 mph

Ridge/Upper slope: Southwest 6-11 mph with gusts to around 18 mph

Chance of Wetting Rain (0.10"): 60%

Haines Index: 2 (Very Low) LAL 2

**FUELS:** The major fuel types, found in and around the fire area include compact timber stands, timber Understory, brush and heavy down and dead.

Ignition Receptiveness: ERC: down 13 from yesterday 21 Burn Index: Down 6 from yesterday 21

Probability of Ignition: 0-30% Spotting distance: Ridge top timber 0-mile, brush 0-mile <u>Dryness:</u> Dead and down fuel moistures: 1 hour -28% 10 hour-23 %, 100 hour -26%, 1000 hour-15%.

#### FIRE BEHAVIOR

Rain and shower condition will have limited and reduce fire activity. Fuels remain dry and receptive but, as rain continues the fuels will become increasingly resistance to ignitions and growth. Fire behavior will continue to minimize and reduce as moisture limits behavior. Some ground fire movement can occur if the fuels have a significant amount of heat, sheltered and or in a heavy dead and down fuel loading fuels profile. Overall fire behavior will be creeping and smoldering. Southwest wind is forecasted for today's shift. Be mindful of how your work location may be affected as wind orientation is transitioning.

#### SPECIFIC FIRE BEHAVIOR:

Division Alpha, Division Mike, Division Romeo, Division Whiskey, and Division Delta-Delta: Doris Fire, Minimal fire behavior is expected even as the rains diminish in the morning. Minimal drying of fuels with possible rain setting back in for the afternoon. Fuels will continue to be resistant to new ignitions and spread. Overall fire behavior will be creeping and smoldering with possible backing with wind, slope and sheltered fuels align.

#### Aviation Safety/ Watchout:

Low level clouds can impact visibility and limit operations to higher elevations in mountain terrain.

#### Safety Message/ Watch Out Situations:

Don't let complacency cloud your judgement with regards to making tactical decisions based on fire behavior, activity, and expected activity.

# TIN SOLDIER

#### Tin Soldier Fire Weather Forecast

FORECAST NO: 05

PREDICTION FOR: Tuesday

**SHIFT DATE:** 08/22/23

FORECAST ISSUED: 08/21/23 at 2000 MDT

NAMES OF FIRES: Bruce, Sullivan UNIT: MT-Flathead National Forest

SIGNED: Bob Hoenisch - Incident Meteorologist

text/email obs: 406-899-4112/robert.hoenisch@noaa.gov

<u>WEATHER DISCUSSION:</u> Steady rain has ended but elevated moisture lingering across the area will result in the development of showers and thunderstorms at times today, especially this afternoon and evening. The unusually high moisture content will support heavy downpours with some showers and all thunderstorms that develop today. Brief heavy rainfall rates with storms today could pose a risk for mud/debris flows in drainages that saw high fire intensity.

#### TODAY:

**SKY/WEATHER:** Mostly cloudy with some breaks of sun. A few showers in the morning with showers and thunderstorms likely in the afternoon.

Max Temperature: 69-74 lower elevations (below 5500 ft) and 63-68 mid-slopes to ridges.

Min RH: 45-50% lower elevations (below 5500 ft) and 50-55% mid-slopes to ridges.

20 ft WINDS: Slope/Valley - Southwest 4-9 mph.

Ridgetop - Southwest 6-11 mph with gusts to around 18 mph.

LAL: 3

Chance of Wetting Rain (0.10"): 60%

HAINES INDEX: 2 (Very Low)

#### TONIGHT:

**SKY/WEATHER:** Mostly cloudy. Showers likely with a chance of thunderstorms, mainly in the evening.

Min Temperature: 48-53. Max RH: Greater than 90%.

20 ft WINDS: Slope/Valley - Southeast up to 7 mph, becoming southwest after midnight.

Ridgetop - Southeast 6-11 mph with gusts to 16 mph, becoming southwest after midnight.

LAL: 3

Chance of Wetting Rain (0.10"): 40%

#### Outlook for WEDNESDAY:

**SKY/WEATHER:** Partly cloudy. Slight chance of afternoon showers and thunderstorm. **Max Temperature:** 67-73 lower elevations (below 5500 ft) and 62-67 mid-slopes to ridges.

Min RH: 38-43% lower elevations (below 5500 ft) and 43-48% mid-slopes to ridges

20 ft WINDS: Slope/Valley - Upslope/up-drainage to 7 mph, becoming southwest 4-9 mph in the

afternoon

Ridgetop - Southwest 8-13 mph with afternoon gusts to 25 mph.

**Extended Forecast Discussion:** A Pacific weather system lifting out across western Canada will keep temperatures somewhat below seasonal averages on Wednesday and bring breezy southwest winds to the area. A drying and warming trend begins Thursday with temperatures warming above seasonal averages this weekend.

8/21/2023 observations thru 1900	Min Temp	Max RH	Max Temp	Min RH	Peak Wind	Precipitation

#### WEATHER SUMMARY

**WEATHER:** Mostly cloudy with some breaks of sun. A few showers in the morning with showers and thunderstorms likely in the afternoon

MAX TEMP: 69-74 lower elevations (below 4500 ft) and 62-67 mid-slopes to ridge **Humidity**: 45-50% lower elevations (below 4500 ft) and 50-55% mid-slopes to ridge

20 FOOT WINDS: Valleys/Lower Slope: Southwest 4-9 mph

Ridge/Upper slope: Southwest 6-11 mph with gusts to around 18 mph

Chance of Wetting Rain (0.10"): 60%

Haines Index: 2 (Very Low) LAL 2

**FUELS:** The major fuel types, found in and around the fire area include compact timber stands, timber Understory, brush and heavy down and dead.

Ignition Receptiveness: ERC: down 13 from yesterday 21 Burn Index: Down 6 from yesterday 21

Probability of Ignition: 0%-30% Spotting distance: Ridge top timber 0-mile, brush 0-mile <u>Dryness:</u> Dead and down fuel moistures: 1 hour -28% 10 hour-23 %, 100 hour -26%, 1000 hour-15%.

#### FIRE BEHAVIOR

Rain and shower condition will have limited and reduce fire activity. Fuels remain dry and receptive but, as rain continues the fuels will become increasingly resistance to ignitions and growth. Fire behavior will continue to minimize and reduce as moisture limits behavior. Some ground fire movement can occur if the fuels have a significant amount of heat, sheltered and or in a heavy dead and down fuel loading fuels profile. Overall fire behavior will be creeping and smoldering. Southwest wind is forecasted for today's shift. Be mindful of how your work location may be affected as wind orientation is transitioning.

#### SPECIFIC FIRE BEHAVIOR:

**Sullivan Fire:** While rain showers diminish the rain fall amounts will significantly impact fire behavior, West Flank, surface fire burning in heavy or sheltered fuels. North Flank, creeping and smoldering in Ball/Branch Creek. South Flank, creeping and smoldering in Sullivan Creek. Anticipate minimal fire behavior in the South Fork Connector drainage and into the Solider Creek drainage.

**Bruce Fire:** Minimal fire behavior will continue as the rain shower diminish. West Flank, East Flank, North Flank and South Flank, creeping and smoldering will be the predominate fire behavior expected. It is possible to see open flame and some fire movement in sheltered and or heavy dead and down fuels.

#### Aviation Safety/ Watchout:

Low level clouds can impact visibility and limit operations to higher elevations in mountain terrain.

#### Safety Message/ Watch Out Situations:

Don't let complacency cloud your judgement with regards to making tactical decisions based on fire behavior, activity, and expected activity.

NOTES: What was the highest altitude ever recorded by a helicopter in flight?		
"The helicopter appeared so refuctort to fiv forward that we even considered turning the pilot's seat ground and letting it fly backward"loor Sikorsky		

# Safety Message

INCIDENT: Ridge/Doris Point/ Tin Soldier

DATE: 08/22/2023 TIME: 0600-1800 Day Shift

## **Drive Safely and Arrive**

- Continue to drive at reduced speeds with heightened awareness on incident roads.
- Use caution around vehicle parking areas, equipment loading areas and staging areas.
- Watch for fire equipment working on roadways.
- Be aware of road graders working on incident roads.
- And please ... SLOW DOWN!

#### "SEE SOMETHING......SAY SOMETHING!"

If you see a hazard or a dangerous situation developing, tell your supervisor and those around you.

## Recognize the Signs of Fatigue

# The effects of fatigue can directly hinder our abilities to:

- Perform various tasks, maintain a positive and supportive attitude
- Maintain situational awareness and a high degree of alertness
- React appropriately in a timely manner and in fashion
- Retain a sharp memory and recollection of information

### **Communication Responsibilities**

All firefighters have five communication responsibilities:

- 1. Brief others as needed
- Debrief your actions
- Communicate hazards to others
- 4. Acknowledge messages
- 5. Ask if you don't know

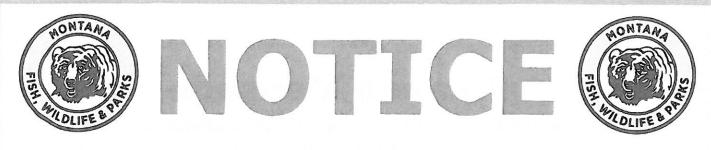

Prepared by:

CIIMT 4 Safety Group

#### **INCIDENT RISK ANALYSIS**

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER	<ul> <li>Maintain continuous Situational Awareness based on the fire environment, observed fire behavior, hazards, and incident objectives.</li> <li>Take weather throughout the shift to get timely and accurate information.</li> <li>Is what we predicted what you are observing?</li> <li>Request spot weather forecasts if you notice a notable change in the weather.</li> <li>Communicate any weather changes with your crew and adjacent resources.</li> <li>Be prepared for rainy weather conditions.</li> </ul>
ALL	TRAFFIC HAZARDS AND DRIVING	<ul> <li>Use extreme caution on wet clay roads during rain events.</li> <li>Take extra precautions when entering or exiting the roadways.</li> <li>Maintain high visibility when in the operational area and use warning lights whe working on roads or traveling in smoke.</li> <li>Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around.</li> <li>Be alert for wildlife. Dusk to dawn poses the greatest potential for accidents.</li> <li>Be aware of and take precautions around logging truck traffic.</li> <li>When traveling between Tin Soldier and Ridge Fires, include a passenger or travel in a caravan. Select safest route of travel based on fire activity.</li> </ul>
ALL	HAZARD / DANGER TREES	<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG p.20)</li> <li>Limit the number of personnel around snags and their exposure time.</li> <li>Fallers must be qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees.</li> </ul>
DD, CCC, NNN	POINT PROTECTION	<ul> <li>Establish and maintain LCES.</li> <li>Monitor fire progress, current and expected fire behavior.</li> <li>Park vehicles pointing toward escape routes.</li> <li>Maintain a minimum of a quarter tank of water in all engines at all times.</li> </ul>
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Do not work above any personnel.</li> <li>Evaluate the necessity to send personnel into areas with limited access.</li> </ul>
ALL	AVIATION OPERATIONS	<ul> <li>Conduct thorough mission assessments before starting work. Follow the guidelines in the SHO and other aviation guidelines and reference materials.</li> <li>Ensure coordination and communication are in place and understood by all resources involved in the mission.</li> <li>Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.</li> </ul>
ALL	MOP UP	<ul> <li>Establish LCES.</li> <li>Maintain 8-10 foot spacing when working with tools.</li> <li>Wear proper PPE.</li> <li>Use caution around stump holes.</li> <li>Identify and mitigate snags and hazardous fire weakened trees.</li> </ul>
ALL	FIRE BEHAVIOR	<ul> <li>Are you seeing what we have predicted?</li> <li>Conduct thorough assessments before starting work. Ensure LCES is in place.</li> <li>Plan &amp; communicate your exit strategy with your crew and adjacent resources.</li> <li>Provide additional briefing for new resources and maintain communications.</li> </ul>
ALL	DIRECT/ INDIRECT FIRELINE CONSTRUCTION	<ul> <li>Establish and maintain LCES.</li> <li>Utilize favorable locations when constructing control features; i.e. lighter fuels, natural or existing barriers, and ridgelines.</li> <li>Watch out if there is unburned fuel between you and the fire.</li> <li>Monitor weather conditions and fire behavior.</li> </ul>
ALL	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operators.</li> <li>Use hand signals if other communications are unavailable.</li> <li>Maintain a 50'-100' exclusion area around equipment.</li> <li>Use road guards as needed to control traffic.</li> </ul>
ALL	COMMUNICATIONS	<ul> <li>Share your Situational Awareness (hazards, changes, etc.) with those who also have a need.</li> <li>Answer questions and/or ask for intel when you do not know the plan.</li> <li>Ensure all personnel are familiar with the incident and IA communications plans</li> <li>Ensure radios are cloned and include Ridge, IA and Tin Soldier Groups.</li> </ul>
ALL	WILDLIFE	<ul> <li>High concentration of wildlife in the area.</li> <li>Backhaul garbage from drop points. Do not keep food inside your tent.</li> <li>Do not feed bears or other wild animals. Never approach bears or cubs.</li> <li>If encountering a bear, make noise, travel in a group and keep members together. Do not surprise the bear. DO NOT RUN!</li> </ul>
Ridge	INCIDENT NAME:	OPERATIONAL PERIOD: 0600 – 1800  AUGUST 22, 2023  Date/Time Prepared: 08/21/2023 – 1530

# You're in Bear Country

- DO NOT bring food, toiletries, or scented items into your tent.
- Sleep at least 100 yards away from the kitchen/food prep area.
- Secure food attractants properly in a bear resistant bin or in a secured building.
- Stay alert and look for bear activity, especially where visibility or hearing is limited (thick vegetation, streams).
- Make noise whenever possible to avoid surprising a bear, especially where visibility or hearing is limited.
   The human voice is the best deterrent, be loud.
- Travel in a group and keep members together.
- Never run from a bear.
- If a bear is hanging around, alert others, and from a safe place make it leave. Yell, set off car alarms, air horns, bang pots and pans, etc.
- If you experience any type of conflict with a bear or have any questions/concerns, immediately contact Bear Specialist Justine Vallieres at (406)250-1265.

# **Finance Message**

Please use the QR code on front page of IAP to submit your time to

2023.ridge.finance@firenet.gov

If you need assistance with electronic submission, there will be a Finance presence at briefing to assist those in need.

We now are accepting Time documents for THREE different fires:

RIDGE- P1QGT5
TIN SOLDIER-P1QGH4
DORIS POINT-P1QJ6J

Please note on CTR or Shift Ticket which fire you are working on.

Turn all time in through the firenet email above.

- FOR CTR SUBMISSION, PLEASE PUT CTR and RO# IN SUBJECT LINE OF EMAIL.
- FOR SHIFT TICKETS, PLEASE PUT ST AND RO# IN SUBJECT LINE OF EMAIL.
- IF TURNING IN FINAL CTR OR SHIFT TICKET, PLEASE ALSO PUT FINAL IN SUBJECT LINE.
- PLEASE MAKE EVERY EFFORT TO TURN IN ALL CTR's AND SHIFT TICKETS DAILY.
- PLEASE INCLUDE YOUR RESOURCE ORDER # ON ALL DOCUMENTATION SUBMITTED, INCLUDING RECEIPTS.
- AUTO RESPONSE IS SET UP TO LET YOU KNOW THAT DOCUMENTS WERE RECEIVED.
- FOR DEMOB: Finance will email the Draft OF-288 or OF-286 to employee for their review and approval. If everything is correct, Finance will reply with FINAL OF-288/OF-286.
- CONTRACTORS: Be sure to get Performance Evaluation before demobilization.

#### **FINANCE CHECK IN:**

 PLEASE ENSURE THE BELOW DOCUMENTS ARE EMAILED TO FINANCE WITH RESOURCE ORDER NUMBER NOTED:

#### OTHER / NOTES:

# Incident Replacement Process

Try not to break or lose your toys but in the event... Submit your paperwork early!

This process is based on Region 1 USFS Incident Operating Guidelines

- > Request for incident replacement must be documented on a 213 AND OF-289.
- Must have all required signatures.
- > Submit paperwork to SPUL and COMP for review.
- > ORDM will send request to expanded dispatch for S#.
- > Upon approval by the Incident Business Advisor the S# will be emailed.
- > EXPECT at least 48-72 hours for response!

#### Please note:

Replacement shall not be authorized using incident funds for loss or damage from normal wear and tear.

NORTHERN ROCKIES GEOGRAPHICAL AREA SUPPLEMENT TO THE PROPERTY LOSS/DAMAGE REPORT (OF-289)

2017 VERSION

**FIRE INFORMATION CONTACT** – Please direct any public or media inquiries to the Information Center at: **406-998-6074** (staffed from 0800-1930) or 2023.ridge@firenet.gov

Please email/text your photos to: 406-998-6074 or 2023.ridge@firenet.gov

Remember we are all an Information Officer - here is some helpful tips:

#### Fire Information is Everyone's Job

Notify chain of command and incident Public Information/ Affairs Officer (PIO/PAO) if media arrives unescorted. Provide for their safety until an escort arrives.

#### Media Interviews:

- Develop and deliver key factual messages; anticipate tough questions.
- Give simple answers (10-20 sec.) and avoid using jargon or acronyms.
- Stick to your knowledge and avoid speaking for other incident personnel.
- Never speak off the record, exaggerate, or try to be cute or funny.
- Keep quiet in between questions; if you misspeak, ask to start again.
- Be personable, professional, and presentable (remove sunglasses and hat).
- Conclude with a safety or wildfire prevention message.

#### Social Media - PAUSE Before Posting:

- PERCEPTION You are representing the jurisdictional agency and your home unit.
- <u>A</u>UTHORITY Be aware of federal and host agency social media policies.
- UNDERSTANDING Know the incident objectives. Never post negative, controversial, or unsafe messages to personal accounts. Ask a PIO/PAO or supervisor for clarification.
- SAFETY Do not compromise your safety while taking photos and always wear proper PPE. Never post photos of children, inmates, investigations, or cultural sites; be sensitive to burned structures and private information.
- EXPECTATION Share relevant content or photos with PIOs/PAOs to help tell the incident story.

# **Transitions & Reunions**

As you reunite with loved ones, friends, and co-workers, consider a smooth transition.

You've been gone for a while, and they've done a good job handling things in your absence. If possible, slowly assert yourself as you reestablish your position.

# Smooth Transitions & Reunions Involve:

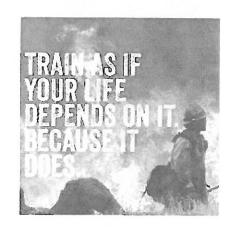

- HOME NEXT EXIT
- Appreciating the efforts of others
- Communicating to understand the current state of things
- Trusting in one another
- © Rebuilding relationships

Thank you all for your cooperation During this assignment. We appreciate your effort.

Adam Alvarez-3HRSP- 707-373-8715

#### Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)

\*This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

	1 -820 ( 88188574 4 1	DO 10 1 Ab 1 1								
Severity of Emergency		DRED / PRIORITY 1 Life or limb threatening injury or lineas. Creasion need is IMMEDIATE  Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented								
AND		DVELLOW / PRIORITY 2 Serious injury or illness. Everywiten may be DELAYED II percentary.								
Transport Priority		Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.								
(priority 1, 2, 3)		GREEN / PRIORITY 3 Minor Injury or Illness. Number 2005 transport  Ex: Sprains, strains, minor heat-related illness.
