<b>INCIDENT OBJECTIVES</b> <small>ICS-202</small>	INCIDENT NAME	DATE PREPARED	TIME PREPARED
	<b>RIDGE AND DORIS POINT FIRES,          TIN SOLDIER COMPLEX</b>	8/23/2023	2000

OPERATIONAL PERIOD (DATE/TIME)  
**WEDNESDAY, August 24, 2023 DAY Operational Period: 0700 – 2000**

GENERAL CONTROL OBJECTIVES

**Leader's Intent**

- Effectively implement a value-driven strategy that utilizes a mix of tactics (direct, indirect, and point-protection) when and where the probability of success is high, and the risk is commensurate with the identified values. Success is defined as safely achieving objectives with the least firefighter exposure necessary while enhancing stakeholder support and adhering to the core values of **Duty, Respect and Integrity**.

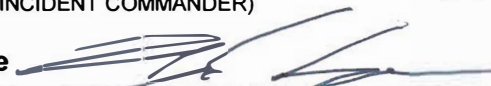

**Control Objectives**

- Ridge Fire is a Full Suppression Fire. The Doris Point Fire/Tin Soldier Complex are Point Protection Fires.
- Minimize loss of our most Highly Valued Resources and Assets including private residences and infrastructure in the communities of Martin City, Hungry Horse, Coram, West Glacier, Hungry Horse Dam and other outlying private property, South Fork Abbot Creek, improvements, and infrastructure in and directly adjacent to the planning area. Additionally, minimize impacts to communication infrastructure on Desert Mountain and Firefighter Lookout.
- Unless human life is at risk, and to the extent possible, prevent retardant use in identified retardant avoidance areas.
- Provide initial attack for new wildland fire starts within the designated Temporary Flight Restriction areas. Coordinate with Kalispell Dispatch.
- Ridge Fire. Keep fire:
  - North of Forest Road 38
  - South of the Great Bear Wilderness
  - East of the communities along Highway 2
  - West of the Tiger River
- Doris Point and Tin Soldier Complex (Sullivan and Bruce Fires):
  - Keep fires west of the western side of Hungry Horse Reservoir (NFSR 895) and Meadow Creek (NFSR 2826) roads.
- Implement suppression repairs as identified in the approved Suppression Repair Plan.

**Management Objectives**

- Manage risk to incident personnel by ensuring hazards are identified, assessed and where possible mitigated. Accept only necessary risk when values threatened warrant action and the probability of achieving objectives is high.
- Create and maintain a supportive, positive, and harassment free work environment in which people are treated with respect and dignity. Create a "no tolerance" atmosphere for harassment, alcohol or illegal drug use.
- Maintain and develop relationships with stakeholders, cooperators, community leaders, tribal representatives, elected officials, private landowners, and livestock permittees. Ensure timely and accurate information and sharing coordination with local authorities.
- Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.

# Ridge/Doris Point/Tin Soldier Fire Weather Forecast

**FORECAST NO:** 16  
**PREDICTION FOR:** Thursday  
**SHIFT DATE:** 08/24/23  
**FORECAST ISSUED:** 08/23/23 at 1930 MDT

**NAMES OF FIRES:** Ridge, Doris Point, Tin Soldier  
**UNIT:** MT-Flathead National Forest  
**SIGNED:** Trent Smith- **Incident Meteorologist**  
 text/email obs: 406-360-6330/trent.smith@noaa.gov

**WEATHER DISCUSSION:** A ridge of high pressure will become the dominant feature over the fire today with the winds being mainly terrain driven. A front from the eastside of the Continental Divide will push through the fires tonight into Friday. This front will cause easterly winds, but will have little to no effect on temperatures.

### TODAY:

**SKY/WEATHER:** Mostly sunny.

**Max Temperature:** 75-80 lower elevations (below 4500 ft) and 66-71 mid-slopes to ridges.

**Min RH:** 26-31% lower elevations (below 4500 ft) and 37-42% mid-slopes to ridges

**20 ft WINDS: Slope/Valley** – Upslope/up-drainage to 8 mph.

**Doris/Ridge Ridgetop** – Northwest 5-10 mph with afternoon gusts to 15 mph.

**Tin Soldier Ridgetop** - West 5-10 mph with afternoon gusts to 15 mph.

**LAL:** 1                                      **Chance of Wetting Rain (0.10"):** 0%                                      **HAINES INDEX:** 3 (Low)

### TONIGHT:

**SKY/WEATHER:** Mostly clear.

**Min Temperature:** 43-48.

**Max RH:** 70-75% lower elevations (below 4500 ft) and 60-65% mid-slopes to ridges. .

**20 ft WINDS: Slope/Valley** – Terrain up to 7 mph, becoming northeast 3-8 mph after 2100.

**Ridgetop** – Northwest 5-10 mph turning northeast to 7-12 mph gusts to 20 mph after 2100.

**LAL:** 1                                      **Chance of Wetting Rain (0.10"):** 0%

### Outlook for FRIDAY:

**SKY/WEATHER:** Mostly sunny becoming partly cloudy in the afternoon.

**Max Temperature:** 81-86 lower elevations (below 4500 ft) and 72-77 mid-slopes to ridges.

**Min RH:** 29-34% lower elevations (below 4500 ft) and 41-46% mid-slopes to ridges

**20 ft WINDS: Slope/Valley** –East 3-8 mph.

**Ridgetop** – East 5-10 mph gusts to 20 mph.

**Extended Forecast Discussion:** The ridge of high pressure will continue to be the dominant feature over the fire this weekend into the first part of next week. A warming and drying trend will continue over the fires, with the warmest and driest conditions occurring on Monday and Tuesday. A cold front is still anticipated to impact the fire on Wednesday.

**Haines 3 (Low) LAL 1**

**FUELS:** The major fuel types, found in and around the fire area include compact timber stands, timber, understory, brush and heavy down and dead.

**Ignition Receptiveness: ERC:** 20 well below the 90<sup>th</sup> percentile.

**Probability of Ignition:** 53% **Spotting distance:** Ridge top timber .1-mile, brush .2-mile

**Dryness:** Dead and down fuel moistures: **1 hour** – 6% **10 hour**-17 %, **100 hour** -23%, **1000 hour**–18%.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:**

Some of the heavy fuels will continue to smolder. Expect to see more smoldering as the fuels dry. No perimeter growth is anticipated.

**SPECIFIC:**

**Sullivan Fire:** Smoldering fire behavior.

**Bruce Fire:** Some of the sheltered and protected heavies will smolder.

**Ridge Fire:** No growth is expected. Low fire behavior.

**Doris Point Fire:** Smoldering will continue in the heavy fuels. Low fire behavior with little growth.

**AIR OPERATIONS:**

No limitations to air operations.

## SAFETY

*Common Denominators of fire behavior on tragedy fires:*

- *Most incidents happen on the smaller fires or on isolated portions of larger fires.*
- *Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in “flare-ups” or “extreme fire behavior.” In some cases, tragedies occur in the mop-up stage.*

**CONTROL OPERATIONS:**  
 Task: Continue indirect line construction from 5360 road north to Emery Creek while scouting for potential direct line construction opportunities. From DP 16 to R/W break, secure and monitor fire including any spot fires outside of control lines.  
 Purpose: To prevent fire from crossing established control lines and potentially impacting values at risk.  
 End State: New fire line is constructed in areas with a high probability of success to meet the purpose ensuring existing fire line is secured, fire and spot fires remain at their existing size.

# SHORT-HAUL OPERATIONS

## CAPABILITIES

- During an operational Short-Haul the helicopter is capable of inserting Short-Haulers into an area with tight canopy cover and/or technical terrain.
- Haul line lengths range from 100 feet to 350 feet.
- Short hauler and/or medical gear can be delivered to the medical scene even if extraction by short-haul is not necessary.

## ORDERING

- EMT or Medical Incident IC determines medical extraction is required.
- Follow local established procedures and/or Medical Incident Report (MIR) in the IRPG.
- Confirm aircraft type, call sign, estimated time of arrival and frequency.
- Give site selection information when ordering: hazards (i.e. ash, smoke, snags, aerial), tree height, terrain, and patient transport configuration (supine or seated position). Repeat hazards and give updated weather conditions as well as brief patient update to responding helicopter.

**PROCESS:** The helicopter will fly to the coordinates provided. They will make contact with ground personnel on scene with the patient using an identified air-to-ground frequency. The helicopter will complete a short-haul recon and size up, gather patient update information and then fly to a landing zone (LZ) to configure for short-haul operations. The helicopter will be monitoring the appropriate air-to-ground, air guard and victor frequencies. From this point, ground resources should only contact the helicopter in case of an emergency. During the insertion and extraction process ground personnel must be clear of the area.

## ON SCENE – EXPECT THE FOLLOWING

- 1 or 2 rescuers (at least one qualified as an EMT or higher)
- Backboard (if needed and not already on scene)
- All equipment necessary for patient extraction

The Patient Extraction Bag accommodates most backboards.

- A patient on a backboard, TRS, SKED or litter will be inserted into the bag.

The Seat Harness is used for patients not requiring the use of a backboard.

# SAFETY/RISK MESSAGE

<b>Incident Name:</b> Ridge / Doris Point Tin Soldier Complex	<b>Date:</b> 8/24/2023	<b>Signed:</b> <i>Jim Burton</i> SOF1
--	------------------------	---------------------------------------

## Safety Discussion

The chain of events that leads to accidents and injuries that we have the most control over is ourselves. The vigilance in which we continually assess our environment and identify hazards and threats is what makes the difference every minute of the day. This arms ourselves with the information we need to make decisions as we navigate our tasks. What is your process for identifying and communicating hazards? Do you make hazards known to those next to you? What way do you communicate these hazards?

## Significant Risks

Aviation Use Hazards	<b>Moderate Risk</b>	Is this flight necessary? What other means are available to accomplish the mission?
Driving Hazards	<b>Moderate Risk</b>	Muddy roads are improving, do your speeds increase too? Why, what's the rush? Be mindful of other traffic and eliminate distractions.
Fire Entrapment Hazards	<b>Low Risk</b>	Minimal threat. LCES can be used for many different threats.
Hit by Hazards	<b>Moderate Risk</b>	Weakened trees and rolling material will continue to be a concern. Do not lose focus on these hazards. A lapse in your awareness or momentary distraction could be the last.
Environmental Hazards	<b>Moderate Risk</b>	The bears are real and pose a threat to all incident personnel. Take the time to read the bear insert on the next page. It could save your life.

### NIOSH Heat Safety Tool

### Mission Risk Assessment (GAR 2.0)

#### Step 1: Identify, Assess, & Mitigate Risk Elements

<b>Instructions:</b> To determine the level of risk for each element below, estimate the risk level based on the Low/Medium/High scale. If your perceived rating is Medium or High, explore mitigations. Mark the element that corresponds to the mitigated risk level and document the perceived risk(s) and mitigation(s).	<b>THESE ELEMENTS ARE IDENTIFIED AS CONTRIBUTING TO A LARGE PORTION OF RISK. RATE EACH ELEMENT BELOW</b>		
<b>Planning</b> - Enough time and information for thorough planning, briefing and implementation. Consider: Completeness of mission information and on-scene details/hazards, contingency plan discussed, LCES.	<b>Complete</b> Low	<b>Partial</b> Medium	<b>None</b> High
<b>Event</b> - Refers to mission complexity. Consider: task duration, overextended, air support or logistics dependent, accessibility (remote location, access), urban interface, public evac, coordination, etc.	<b>Routine</b> Low	<b>Infrequent</b> Medium	<b>Abnormal</b> High
<b>Assets</b> - Proper number and skill set for the mission. Consider: qualifications, experience, familiarity w/ task, physical/mental state (fatigue, stress, etc.), adequate supervision (span of control), organization.	<b>Excellent</b> Low	<b>Marginal</b> Medium	<b>Poor</b> High
<b>Communications/Supervision</b> - Ability to maintain communication throughout mission. Consider: availability & quality w/command & adjoining forces, clear task - purpose - end state, backup comms, limited comms.	<b>Excellent</b> Low	<b>Partial</b> Medium	<b>None</b> High
<b>Environment</b> - Conditions surrounding mission. Consider: weather, vegetation, temperature, night/day, rugged terrain, visibility, etc.; physical hazards, road conditions, vapors, ongoing ops, snags, wildlife, etc.	<b>Ideal</b> Low	<b>Marginal</b> Medium	<b>Extreme</b> High

#### Step 2: Determine Overall Risk Level

Consider: 1) the rating for each element above, 2) the importance of the element for mission execution, 3) how elements may interact. Rate the perceived Overall Risk Level when considering this info.	Low	Medium	High
---	-----	--------	------

#### Step 3: Determine Risk vs. Gain: Do gains warrant the risk?

Step 3a. Enter the Overall Risk Level (Step 2) in the RISK box (Low, Medium, or High). Step 3b. Review the definitions for Gain below and enter the level in the GAIN box. (Low, Medium, or High).		← RISK VS. GAIN →	
<b>Low Gain</b> - Situation with unclear benefits or a low probability for providing concrete results. Examples: no threat to public safety, minor impact to livelihood, low environmental impact, minimal public interest/concern, non-urgent/time sensitive activity.			
<b>Medium Gain</b> - Situation that provides immediate and real benefits. Examples: minor threat to public safety, medium impact to livelihood, significant environmental impact, public interest/concern.			
<b>High Gain</b> - Situation that provides immediate and real benefits that if ignored could result in loss of life. Examples: significant threat to public safety or security, urgent SAR, major impact to livelihood, significant environmental impact, high public interest.			

### Incident Response Pocket Guide (IRPG)

# NOTICE

## You're in Bear Country

- DO NOT bring food, toiletries, or scented items into your tent.
- Sleep at least 100 yards away from the kitchen/food prep area.
- Secure food attractants properly in a bear resistant bin or in a secured building.
- Stay alert and look for bear activity, especially where visibility or hearing is limited (thick vegetation, streams).
- Make noise whenever possible to avoid surprising a bear, especially where visibility or hearing is limited. The human voice is the best deterrent, be loud.
- Travel in a group and keep members together.
- Never run from a bear.
- If a bear is hanging around, alert others, and from a safe place make it leave. Yell, set off car alarms, air horns, bang pots and pans, etc.
- If you experience any type of conflict with a bear or have any questions/concerns, immediately contact Bear Specialist Justine Vallieres at (406)250-1265.

## TALKING POINTS FOR AUGUST 23, 2023

- Ridge Fire: Crews on the western and northern area of the fire continued to address areas of heat, mop up, and back hauled excess equipment.
- Doris Point Fire: Crews are maintaining confinement.
- Tin Soldier Fire: Yesterday, crews held and secured Meadow Creek Road.
- Crews will maintain point protection strategy on the values at risk in coordination with the Flathead National Forest.
- Heavy equipment will be constructing indirect line through dense vegetation.
- Aviation will be utilized if the weather and winds allow.
- Steady rain has ended but elevated moisture lingering across the area will result in the development of showers and thunderstorms at times

### Evacuation Changes:

The Flathead County Sheriff's Office has rescinded the pre-evacuation notice from the east side of Spotted Bear Road to West Glacier. An evacuation order has been issued by the Flathead County Sheriff for Heinrude community. Visit the Flathead Sheriff's office for details <https://www.facebook.com/flatheadsheriff>

**FIRE** The Hungry Horse Reservoir is closed to all public access, including both the east and west side roads. As firefighting efforts continue on the Ridge Fire, the Tin Soldier, and other fires in the area, the closure is in place to provide for public and firefighter safety. <https://www.fs.usda.gov/alerts/flathead/alerts-notices/?aid=82283>

**CLOSURES:**

**No Drone Zone:** A temporary flight restriction is in place over the Ridge, Doris Point, Tin Soldier Fires. <https://tfr.faa.gov/tfr2/list.html>

To interact: If you have photos/videos you'd like to share for Inciweb to help tell the story of the fire and help the public understand what you're doing on the line, you can email them to [2023.Ridge@firenet.gov](mailto:2023.Ridge@firenet.gov). It's helpful to know what date the photo was taken, where and by whom.

# HUMAN RESOURCE MESSAGE

## Civility and Respect

**Civility** is an essential behavior of all employees and refers to how we relate to each other, our contractors, and our stakeholders. These civil relations and interactions include the fundamental attributes of courtesy, politeness, and consideration.

**Respect** connects us at a personal level. Treating everyone with respect is one of the incident's core values. It honors all the participants in an interaction by creating a safe place to have sometimes difficult conversations and leads to an environment of honesty and mutual trust.

Because there have not been any reportable HR issues since the start of this incident, I'm assuming you all have been civil and respectful. Thank you for that, it makes my job a lot easier!

We urge you to continue acting in a manner which demonstrates respect for yourself and respect for others. Take advantage of every opportunity to be proactive in promoting civility and respect.

Feel free to reach out to me if you have any questions, concerns, or have an answer to my riddle.

**Yesterday's Riddle:** What word can be written forwards, backwards or upside down, and can still be read from left to right? **Answer: NOON**

**Today's Riddle:** Does the law allow a man to marry his widow's sister? Why?

**(REMEMBER – Please don't use the internet, use your smart brain instead!)**
