Ridge Creek

Incident Action Plan

Operational Period

Monday, August 28, 2023 0600-2200

> ID-IPF-000447 P1QG9D (0104)

INCIDENT OBJECTIVES

1. Incident Name
Ridge Creek Fire

2. Date 8/27/23

3. Time 2000

4. Operational Period:

8/28/2023 0600

to

8/28/2023 2200

5. General Control Objectives for the Incident

- Protection of human life is the highest priority. Utilize a deliberative risk management process when
 mitigating risk to the public and incident resources. Implement actions where there is a high probability of
 success.
- Keep Fire within current planning area with actions based on prioritized Values at Risk.

Prioritized values are:

- Private property and residences
- Hayden Creek and Hayden Lake Water Quality
- o Industrial timber lands, plantations, and Bottom Canyon Timber Sales (Idaho Forest Group) and other planned timber sales
- o Bonneville Power Administration Transmission Line
- Hudlow Warming Hut
- o Chilco Mountain National Recreation Trail
- Protect infrastructure, private residences, private inholdings, and businesses within and near the planning area from negative impacts by fire and mitigate smoke impacts when possible.
- Coordinate and communicate with all partners, cooperators, stakeholders and forest visitors as appropriate
 and as needed. Provide accurate and timely information as well as build and maintain the ongoing high
 trust environment,
- Minimize fire and suppression impacts to timber values on private industrial timber lands and National Forest System lands.
- Minimize potential fire impacts to critical community infrastructure and follow established management action points / requirements found in the Ridge Creek WFDSS decision.

Incident Weather Forecast

FORECAST NO: 19 NAME OF FIRE: Ridge Creek

SHIFT DATE: Monday 8/28/2023 SIGNED: /s/ Ryan Fliehman/Krista Carrothers IMET/IMET(t)

UNIT: ID Panhandle NF ryan.fliehman@noaa.gov / (240) 205-6805

<u>WEATHER DISCUSSION</u>: Today brings the hottest and driest day of the string with temps at or above 90 for most elevations. Humidity will also dip into the teens. The limiting factor for a critical day will be the lack of wind as we only expect lighter winds. Humidity recovery overnight will continue to diminish leading to poor values for tonight. Tuesday is the transition day with mostly sunny skies in the morning giving way to showers and storms by the afternoon. Cool, damp and breezy conditions are expected for Wednesday before they moderate for the tail end of the week.

WEATHER FORECAST: Hot and Dry under sunny skies. Hottest day of the week.

WEATHER FORECAST: Hot and Dry under sunny skies. Hottest day of the week.						
	Ridge Creek Fire	Farragut ICP (2,400ft)				
TEMPERATURES (Trend):	86-91° (+2)	91-96° (+2)

CHANCE OF RAIN:	0	0				
LIGHTNING (LAL):	1	1				
RH RECOVERY TONIGHT:	30-40% (Poor)	60-70% (Good)				
OVERNIGHT WINDS:	Downslope/downvalley 1-3 mph/ L	ight northeast winds on the ridges				

^{***}Trend based on yesterday's observed values.***

<u>TUESDAY OUTLOOK:</u> Transition day for the incident as we move from hot and dry, to showers and storms and finally cool, breezy and rain. A lot to digest in a day I know. Abundant sun and light winds are expected in the morning before clouds move in midday and showers and storms arrive by the afternoon. Some of these storms could bring severe characteristics with gusty winds, lightning, periods of heavy rain and small hail all on the table. Behind the storms will likely be a period of more steady rain and cooling temperatures. Breezy winds are expected with any storms and will persist into Wednesday.

EVITABLE CORECAST. We decoder, will be easily and breeze, with rain to period off throughout the day.

EXTENDED FORECAST: Wednesday will be cooler and breezy with rain tapering off throughout the day. Temperatures will increase slightly each day through the end of the week with light winds and no additional precipitation expected. As of now, we are not seeing any indicators of temperatures rising or humidity dropping to current levels.

EXTRA INFORMATION: Coeur d'Alene (2,320ft): High temp: 93°. Low RH: 16%.

Spades IRAWS (4,678ft): High temp: 88°. Low RH: 17%. **MaGee Peak RAWS (4,720ft):** High temp: 81°. Low RH: 19%.

Please send us your observations! Text photos or obs to the phone number above.

FIRE BEHAVIOR FORECAST						
FORECAST NUMBER: #19 TYPE OF FIRE: Wildland						
FIRE NAME: Ridge Creek OPERATIONAL PERIOD: 8/28/23 Day Shift						
DATE ISSUED: 08/27/23	TIME ISSUED: 2000					
UNIT: Idaho Panhandle NF	WRITTEN: Kelly Cagle - FBAN					

FUELS: The major fuel type found on the Ridge Creek fire is mixed conifer (fuel models 10/TU1/TU5). There are areas of open canopy conifer with grass and shrub understory on the south and west facing slopes, and there also areas of closed canopy conifer – mostly on the north and east facing slopes. Additionally – areas of subalpine fire are present in the higher elevations. Live fuels have not been a huge driver of fire spread thus far – in fact – they are a bit of a deterrent on north and east facing slopes.

WEATHER SUMMARY: Fire weather is in place over the fire today. Poor recovery last night coupled with hot temperatures and low RH's will provide for an enhanced fire environment today. Fortunately, winds are expected to be very light. See fire weather forecast for more specifics.

General Fire Behavior Forecast: Hot weather and low humidities will create fire prone conditions today. Fine fuel moistures will be very low and fuels are expected to be more receptive to embers and to fire spread than recent days. Smoldering and creeping fire behavior is expected today. Moderate intensity fire spread could occur late day. Isolated torching – single or group- is possible. Small scale, short runs are possible if fuel and slope align. Any torching near a containment line could cause control issues today.

Critical fire behavior thresholds for Idaho Panhandle NF:

RH below 20% Winds greater than 20 Daytime temp > 80 Haines 5 or 6

Specific:

Division Echo – Smoldering and creeping fire behavior is likely today. Active fire spread possible. Isolated torching probable. Models suggest fire could back down the east facing slope and cross the drainage bottom. If so, slope reversal would then be likely.

Division Kilo – Smoldering and creeping fire behavior is probable -especially in the "horseshoe" area. Active flame and spread are possible. Isolated torching possible. If fuel and slope align at the bottom of the "horseshoe" drainage, fire could make a push uphill today.

Division Alpha – Expect smoldering and creeping inside containment line and the potential for single and group torching.

Division Zulu – Smoldering and creeping will continue, especially near the Kilo break. Light smoke production will likely remain visible. There is at least the potential for open flame/active spread today particularly in and on the flanks of the horseshoe. Small scale uphill run would be possible today.

Initial Attack – Increased risk of initial attack today due to very low fuel moistures. Fires that originate in lower elevations on south and west slopes could organize quickly and begin to move with elevated intensity today -especially during midafternoon.

Fine fuel moisture today is - 6 shaded/3 Unshaded Rates of Spread in Timber- 2-6 chains/hour

Probability of Ignition today - 56% shaded/86% unshaded Rates of Spread in Grass- 15 chains/hour

Max Spotting Distance Today- < 300 feet Flame Lengths- 3 to 7 feet as an average

AIR OPERATIONS: Light inversion expected early morning. Should break early and clear skies will be in place for the remainder of the day. Winds will be light and conducive to aviation operations.

FIRE BEHAVIOR SAFETY: Today is a day with increased fire potential. Ponder attack options and thoroughly assess any direct attack at the head of a fire.

Task - Utilize full range of suppression tactics to construct, improve and hold manmade, natural features, and established fire lines for containment within DIV A/E.

Purpose - To prevent fire spread east of River road and established containment lines, within DIV A/E.

End State - Fire spread remains within established containment lines, preventing fire spread east of FSR 209, south of FSR 406, and minimizing impacts to the Little North River Corridor.

8. Special Instructions:

Continue to construct, secure, mop-up, monitor fire lines within DIV A/E.

Utilize field maps to drop points, safety zones, and potential helispots.

Ensure that communications are functional throughout the entire division.

Maintain situational awareness around heavy equipment operations.

Inventory all pumping operations supplies.

Ensure all fire lines have established water-bars.

^{7.} Control Operations:

Task - Utilize full range of suppression tactics to construct fireline, improve roads, handlines, and natural features for use as control lines.

Purpose - To prevent fire spread to the west and north of Bunco Road and limit fire impacts to the Sage Creek Area and private and Forest Service Boundaries

End State- Limited fire impacts to private and industry timber lands.

8. Special Instructions:

Continue Prep along Bunko Road, improve handline, and continue to assess opportunities to change tactics when necessary. Utilize field maps for drop points, safety zones, and potential helispots.

Ensure that communications are functional throughout the entire division.

Ensure all fire lines have established water-bars.

Task - Utilize full range of suppression tactics to construct fireline, improve roads, handlines, and natural features for use as control lines.

Purpose - To prevent fire spread to the west and north of Bunco Road and limit fire impacts to the Sage Creek Area and private and Forest Service Boundaries

End State- Limited fire impacts to private and industry timber lands.

8. Special Instructions:

Continue Prep along Bunko Road, improve handline, and continue to assess opportunities to change tactics when necessary. Utilize field maps for drop points, safety zones, and potential helispots.

Ensure that communications are functional throughout the entire division.

Ensure all fire lines have established water-bars.

Task - Mop-up, patrol, and secure fire lines utilizing full range of suppression actions throughout the Division.

Purpose - To prevent fire spread outside of current fire control lines.

End State - Fire spread is limited to the north and east of FSR206 and Hayden Creek road.

8. Special Instructions:

Secure fire-line from the heal to north to division break.

Utilize field maps for drop points, safety zones, and potential helispots.

Ensure that comms are functional throughout the entire division.

Maintain Situational Awareness around heavy equipment operations.

Ensure all fire lines have established water-bars.

Task - Identify, Implement and coordinate structure protection needs with fire resources and interagency cooperators for protection of structures within the fire area.

Purpose - Ensure the development, and prioritization of a cohesive strategy to implement an adequate response for structure protection needs.

End State - Structures are protected from the Fire impacts and future plans have been developed.

8. Special Instructions:

Coordinate with cooperators to build a strategic assessment of the surrounding communities.

Identify trigger points for engagement and disengagement of structure protection resources.

Maintain a presence and ensure equipment is operational in Trapper Creek and Nunn Rd areas.

Ensure all fire lines have established water-bars.

TASK - Respond to new fire starts within TFR initial attack area.

PURPOSE - Suppress new fire starts within the TFR initial attack area.

END STATE - New fire starts are suppressed in initial attack.

8. Special Instructions:

Assist divisions with resource needs when able.

Ensure all fire lines have established water-bars.

Serve as IA resource under the Ridge Creek TFR and forest service land adjacent to.

Be ready to break away from incident tasks as needed for IA.

*** Special Note: IA Repeaters (channels 9, 10, 11) are for use outside of TFR ONLY. ***

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

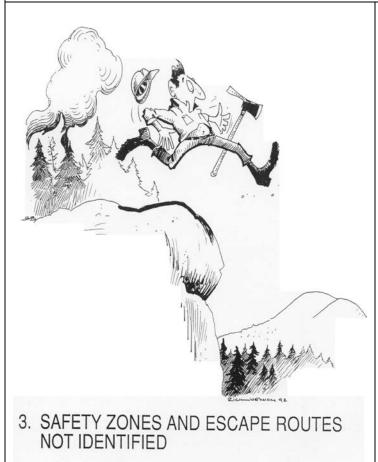

INCIDENT: **Ridge Creek Fire** DATE: August 28, 2023

Major Hazards and Risks: Driving, Hazard Trees, and Heavy Equipment

Hazard Trees: Work is shifting into new areas of the fire. **Check these new areas for snags and mitigate them before engaging in work.** Some of these snags are not visible from roads but could easily reach you if they fall.

Driving: New work assignments may take you on new roads with hazards you have not seen before. Some of the incident roads are narrow with limited visibility and few pull-outs. **Be sure to contact Division Sup before entering their Division to ensure road is clear before proceeding.** Adjust your driving for smoke, dust and traffic. Watch out for wildlife and livestock.

Heavy Equipment: Dozers, Excavators, feller-bunchers, and skidders are working on this incident. Don't approach heavy equipment until you are certain they have seen you and signaled for you to continue. **Give them sufficient space on roads and in work areas.**

Communicable Diseases

Camp situation brings a lot of people together in close quarters. We share a lot of air, surfaces and places.

Let's not share diseases. Wash your hands often and use hand sanitizer, especially before entering the food area and before leaving the latrine area.

Safety Officers: Buddy Kelley, Paul Churchill, Larry Holsomback and Steve Gray (T)

Human Resource Message

The mission of the Gold Team is to safely, effectively and efficiently manage the Ridge Creek Fire by maintaining a team of skilled and productive personnel. During this incident we will strive to successfully complete our mission and achieve our objectives while creating a positive, work environment for all assigned incident personnel. Consumption of drugs that alter decision making abilities on the job, such as marijuana and alcohol, is prohibited. The Gold Team fully supports every assigned personnel's right to have a safe and enjoyable assignment. ANY form of harassment or discrimination will not be tolerated. All inappropriate behavior will be dealt with promptly. Disciplinary action and reporting back to an individual's home unit will be initiated as necessary.

Please report any incidents of inappropriate behavior to your supervisor or any member of the Gold Team

Debbie Beard, Incident Commander

Finance Message

THINGS TO REMEMBER

- IF YOU ARE ASSIGNED TO "DIVISION K", PLEASE NOTE THIS IN THE REMARKS ON YOUR CTR'S OR SHIFT TICKETS
- PLEASE ENSURE THAT YOUR CTR'S AND SHIFT TICKETS HAVE YOUR <u>RESOURCE ORDER</u>
 NUMBER and <u>DATE</u>

FOR ASSISTANCE WITH CLAIMS, PLEASE CONTACT TERRI MCDONALD AT terri mcdonald@firenet.gov, or leave a voice mail at 352-454-5385.

2023.ridgecreek.finance@firenet.gov

ALL RESOURCES ARE WELCOME TO HAVE A IN-PERSON FINANCE DEMOB

But if you prefer remote Finance demob, please follow directions below

**** REMOTE DEMOB FOR HUDLOW SPIKE CAMP ****

ANY RESOURCES WANTING TO REMOTE DEMOB FROM HUDLOW SPIKE CAMP, PLEASE SEE <u>ITSS - JOHN EDWARDS</u>, LOCATED ON SITE IN ITSS-YURK.

RESOURCES CAN DEMOB ANYTIME BETWEEN 1000 TO 1400.

**** REMOTE DEMOB FOR BASE CAMP ****

PLEASE SCAN THE QR CODE ABOVE. SEND AN EMAIL WITH YOUR CONTACT INFORMATION REQUESTING REMOTE DEMOB. A FINANCE SPECIALIST WILL CALL YOU BACK AND WALK YOU THROUGH THE PROCESS.

Limited contact Demob process is Available

- Note your demob date listed in the IAP. Inform your incident supervisor if that date is wrong, so they can contact demob/checkin to update.
- Crew Swaps If you have relief operators replacing operators, use the QR code below. We will adjust the last work day for that equipment.
- Air Travel Use the QR code below or call demob to schedule a flight. Please do this at least 3 days before your demob date. You may need to plan on an early departure on your last work day for an RON at your departure airport in order to travel on your DEMOB date.
- Driving home Use the QR code below to provide travel info before leaving ICP to travel home. We need you to provide your ETD/ETA, and RON city, if taking more than one day to drive home.

Steps to take when checking out during Demob, no checkout sheet required:

Feel free to stop by any Section or Unit if you need assistance.

- 1. All CTR and Shift Tickets should be turned in before initiating the demob process.
- **2.** Return all property to Supply and/or Communications; they will notify demob that you returned all items.
- **3.** Have equipment inspected at Ground Support and submit inspection form to finance as required.
- 4. If you are a trainee see the Training Message to close out with the Training Specialist..
- **5.** FINALIZE your OF-288/OF-286 with Finance; they will notify demob that you are cleared.
- **6.** Go through Weed Wash on your way out of camp, they will notify demob, no need to return to ICP. Be sure to submit travel info using QR code below.

Demob Contact: 208-891-6074

Email: 2023.ridgecreek.demob@firenet.gov

Training Message

Coaching

Evaluating

Coaching

Focuses on the individual to develop greater expertise in his or her job. A coach provides immediate instructions and feedback on job tasks; before, during, and after the task is being performed.

Evaluating

Focuses on determining what level the individual performing the task is at. Evaluators only provide feedback after the task has been performed.

Evaluation sessions **NOT Coaching** sessions are recorded in Task Books.

If you are a trainee or working on a position Task Book (PTB) be sure to Check-in and Check-out with one the Incident Training Specialist!

Lucas Hunkler, TNSP(t) 912-464-7067 or Al Hoke, TNSP 678 232-7107

Check-in

Check-out

Ridge Creek Fire Public Information

We are now working remotely! Please feel free

to contact us at: 208-953-7022

Or email your photos/questions to:

2023.ridgecreek@firenet.gov

The Gold Team is still running a photo contest. A Gold Team Challenge Coin will be presented at the morning briefing on 8/29 for best photo! Include with your phone WHERE it was taken, who took it, who is photographed and be sure everyone is wearing PPE.

Ridge Creek Documentation Process

1.Name files in accordance with the standardized NWCG naming conventions: {DocType}_{Version}_{IncidentNumber}

EXAMPLE: UNIT DAILY LOGS - ICS 214

214_SpiessLisa_20230825_000447

EXAMPLE: GENERAL MESSAGES – ICS 213

213 DOCL Spiess 20230825 000447

*Reminder: For 213's, use SENDER's UNIT NAME and SENDER's Last Name if known

2. Upload your files in one of two ways:

A. Drop them daily into the <u>eDoc</u> <u>INBOX</u> in Teams, General Channel files, or use <u>SharePoint</u> location.

B. Email them daily to 2023.ridgecreek.docs@firenet.gov

All documentation will be filed electronically in TEAMS. There are no paper copies or paper doc boxes. If you need to scan files, there is one available in the Plans room at ICP. Not sure which documents are Permanent Records? Check out page 4 of PMS 277. If you have questions about what to file or how, please reach out!

Need help? Ask!

Lisa Spiess – Virtual DOCL-t

lisa spiess@firenet.gov or 601-812-7819

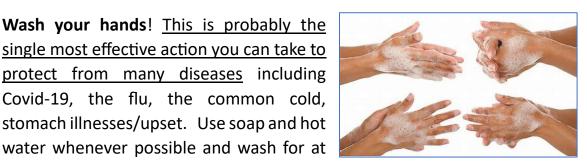

You can also catch me in Teams chat!

Infectious Disease Prevention Reminders

Protect your best resource....your health!

1. Wash your hands! This is probably the single most effective action you can take to protect from many diseases including Covid-19, the flu, the common cold, stomach illnesses/upset. Use soap and hot

least 20 seconds. If you can't get access to soap and water, hand sanitizer remains your next choice. Note that it may not be as effective as soap and water especially if your hands are grimy. Try to flush away most of the grime with water first before using hand sanitizer. Wash or sanitize frequently.

2. Maintain distance. While it can be difficult to implement, it's still a good practice to maintain "social distancing". While most diseases are spread from contact to hand then to mouth or eyes, many are still spread through aerosolized droplets. Adding some distance can help!

- 3. Wipe down surfaces. Many diseases can live on surfaces for some time. Frequently wipe contact surfaces with disinfecting wipes and allow surfaces to dry.
- 4. Cough or Sneeze into your elbow, not into your hands. If you forget, be sure to immediately wash your hands.
- 5. Consider wearing a mask, especially if you feel ill.
- 6. Take good care of yourself. Rest when able, hydrate, eat well, and overall support your immune system!

If you feel sick, please self-isolate and notify your immediate supervisor.

Laundry Procedures

Separate your laundry by Nomex and Regular clothes and place in separate bags with labels.

Bags and labels will be provided at the drop off location in Supply.

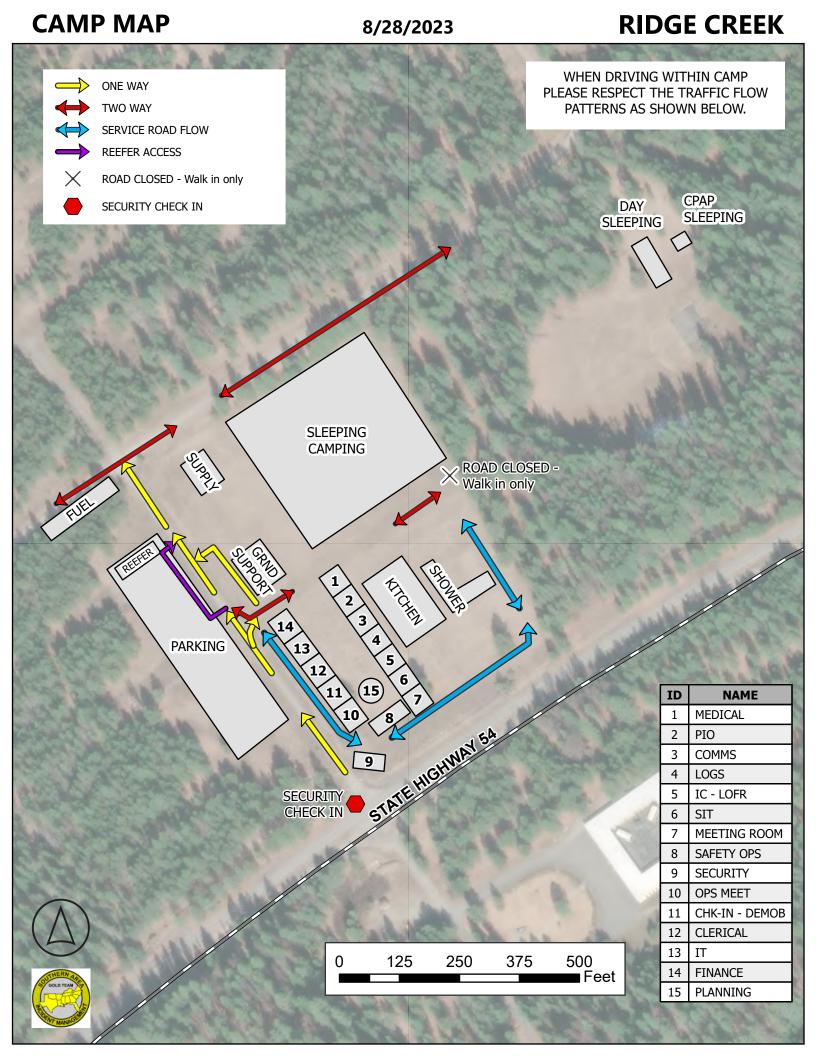

Fill out a laundry slip, Red for Nomex and White for regular laundry.

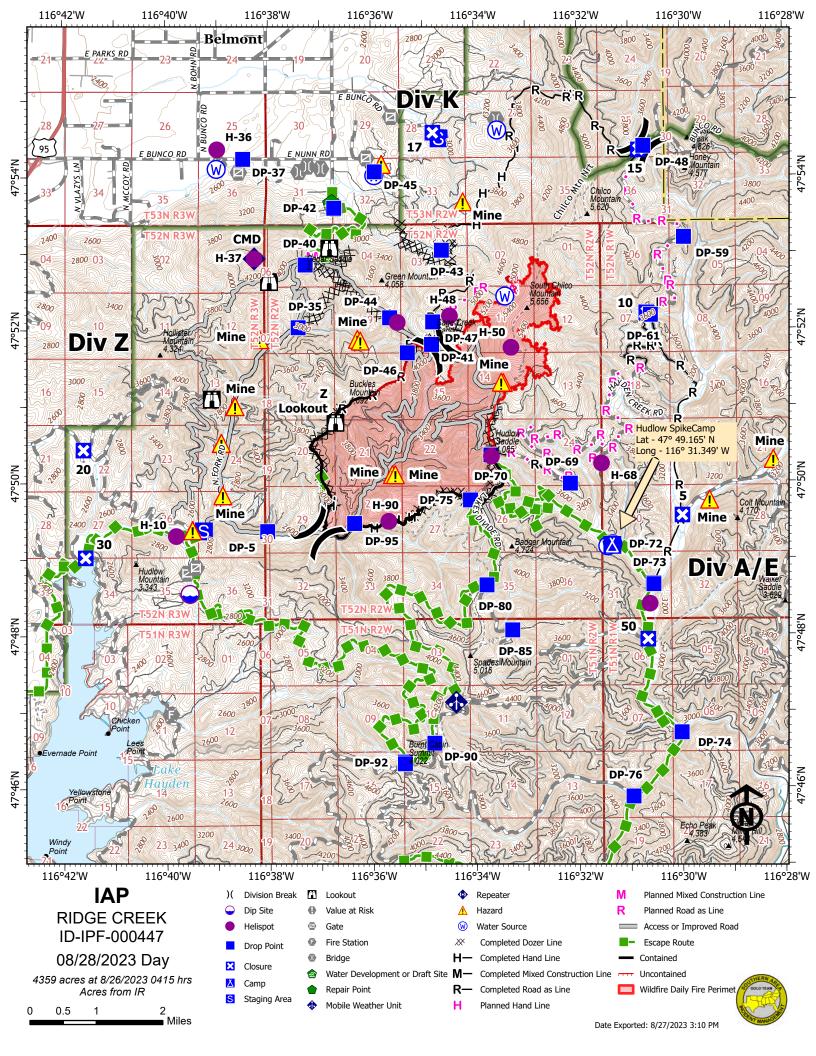

Place slip in bag with laundry and drop it off at Supply.

Laundry dropped by 0900 will be ready in 48 hours.

If you are within 72 hours of Demob, DO NOT TURN IN YOUR LAUNDRY!
