The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

SAFETY MESSAGE

Safety reminders as we enter final days of this assignment.

COMPLACENCY: We have had a couple days of more moderate fire behavior. This is not the time to be lulled into a false sense of security. There are important objectives to be safely met before we get another change in the weather. Keep your situational awareness and be prepared for potential increases in fire behavior.

HYDRATION: It has been fairly mild, and we need to keep focusing on staying hydrated throughout the shift. It is important to take advantage of periods of slower activity to maintain your hydration and energy levels as you may not have the time when things get hectic.

PERSONAL HYGIENE: We have been out here for several long, dirty days. Try and maintain personal hygiene as possible. Wash face and hands as much as you can and take advantage of the shower unit and hand washing stations. By doing this, it makes you feel better, but it also helps prevent sickness or sores.

10 STANDARD FIRE FIGHTING ORDERS:

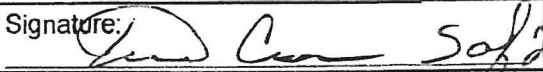

- 6. BE ALERT, KEEP CALM, THINK CLEARLY. ACT DECISIVELY**
- 8. GIVE CLEAR INSTRUCTIONS AND BE SURE THEY ARE UNDERSTOOD**

Remember: Slow and Steady, Safe and Sure.

Have a good safe day !!!!

Team Safety Officer: *Tim Crosmer*
