The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# **SAFETY MESSAGE**

**Driving:** Drive defensively with SLOW speeds, lights on and be *courteous*. Always expect a vehicle around every corner. You can NOT possibly drive, talk on the radio to communications, listen to AM/FM, look at a GPS Unit and chew gum safely while at the same time driving.

**Fireline:** **SNAGS** need to be a focus in Fireline Safety. Look for and identify the dangerous trees (burning root structures or tree boles). The wind and fire have weakened a lot of them. Minimize the exposure, mark if possible so others know where they are.

**FOOTING** is treacherous so go slow, take good routes, maintain spacing, rolling rocks, watch where you are walking, go around objects not over them, no walking on down logs. "Simple Falls" have resulted in numerous back injuries, twisted knees & ankles, and broken bones. Be especially careful when carrying much weight on your back.

**Strategy, tactics, and hazards.** Always keep others informed what your actions are or going to be. Have them do the same to you. Close the communications loop constantly with others.

**Maintain Your Health:** If you are not feeling well let your supervisor know. Practice good hygiene - it is especially important to eat right, drink enough liquids, get rest, and wash your hands frequently.

**“Routine?? - Just another Day??”**  
**Every Day is Different - Every Fire is Different**

**Trust Safety - Not Luck!**  
*Attitude is a BIG deal in being Safe*

***Do not be stupid, think before you act!!!!***

Safety Officer: *Tim Crosmer*
