

Miller Peak Fire Incident Action Plan

**Friday July 19
Day Operations 0700-2100**

P1R3H4 (0116)

904208

MT-LNF-240427

for check-in, IAPs and Maps

INCIDENT OBJECTIVES	1. Incident Name MILLER PEAK FIRE	2. Date Prepared July 18, 2024	3. Time 2100
----------------------------	---	--	------------------------

4. Operational Period: **July 19 2024 Day Operations 0700-2100**

Incident Objectives

1. Protect the population and private residences in Miller and Swartz Creek drainages to avoid negative impacts from the fire for the duration of the incident.
2. Protect the critical values present within the I-90 corridor including, but not limited to, the population, private residences, power infrastructure, and the railroad to avoid negative impacts from the fire for the duration of the incident.
3. Protect isolated critical values at risk including the BPA transmission infrastructure to the south south west of the fire and Miller Peak communications site to avoid negative impacts from the fire for the duration of the incident.
4. Execute aggressive initial attack, commensurate with critical values at risk, of any new wildfire starts within the incident TFR and support additional local initial attack activity as requested for the duration of the delegated authority to the IMT.
5. Coordinate all fire management activities throughout the life of the incident with assigned resource advisors to help avoid negative impacts to sensitive cultural resources within the fire area.

Incident Requirements

- Incorporate sustainable operations into all incident management activities where feasible.
- Coordinate with the Resource Advisor on vehicle and equipment weed washing and AIS requirements and protocols.
- Keep all local stakeholders including Tribal partners, the Missoula County Sheriff's Offices, local fire agencies, internal staff, external partners, business leaders, and the public informed on incident progress.
- Maintain a zero-tolerance policy for harassment, alcohol, or illegal drug use during the incident.
- Coordinate all closures and evacuations with law enforcement personnel.
- Utilize local trainees to the extent feasible.
- Practice proper food and garbage storage to avoid conflicts with grizzly and black bears.

Fire Weather Forecast

FORECAST NO: 03
PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Friday 7/19/2024

INCIDENT: Miller Peak Fire

UNIT: Lolo NF

SIGNED: Trent Smith *Trent R. Smith*

TIME AND DATE ISSUED: 7/18/2024 1900 hrs

Incident Meteorologist (IMET)

Discussion: Ridge of high pressure will be the dominant feature over the fire the next several days. Hot and dry conditions will persist. Winds in the drainages will be terrain driven, while the ridges experience northerly winds during the late afternoon and evening today.

WEATHER FORECAST FOR TODAY:

Sky/Weather: Mostly sunny becoming partly cloudy in the afternoon.

Max Temperature: Lower Elevation 88-93 and 79-84 mid-slopes/ridges.

Min RH: 13-18 percent.

20 ft Winds:

Valleys/Lower Slopes: Terrain driven winds 3-8 mph.

Ridges: Southwest 3-8 mph becoming north 5-10 mph gusts to 18 mph by 1600 MDT.

Haines Index: 5 Moderate because Stability: 3 & Moisture: 2 **Transport Wind:** NW 10 mph.

Inversion: 500 ft inversion starting to lift at 0900 reaching 9000 ft by 1600 MDT.

TONIGHT:

Sky/Weather: Partly cloudy to clear after midnight.

Min Temperature: 48-53 lower elevations and 59-64 mid-slope/ridges.

Max RH: 58-63 percent lower elevations and 32-37 percent mid-slope/ridges.

20 ft Winds:

Valleys/Lower Slopes: Terrain driven 3-8 mph.

Ridges: North 5-10 mph gusts to 18 mph becoming south 2-6 mph after midnight.

Inversion: Developing after 2000 hrs near 500 ft by sunrise.

SATURDAY:

Sky/Weather: Mostly sunny becoming partly cloudy in the afternoon.

Max Temperature: 90-95 lower elevations and 81-86 mid-slopes/ridges.

Min RH: 12-17 percent.

20 ft Winds:

Lower Valleys: Terrain driven 3-8 mph .

Mid-slopes and Ridges: South 2-6 mph becoming northeast 5-10 mph with gusts to 15 in the afternoon.

Haines Index: 5 Moderate.

Transport Wind: NW 8 mph.

Aviation Wx: Inversions around 500 ft starting to lift by 0900 and reach a max of 9000 ft by 1600. North winds 5-10 g 18 mph by 1600 MDT. 5000 ft AGL temperature 30°C.

Weather observations can be texted to 406-360-6330 or emailed to trent.smith@noaa.gov

FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: 3	TYPE OF FIRE: Wildland Fire
FIRE NAME: Miller Peak	OPERATIONAL PERIOD: Wed, 07/19/2024
DATE ISSUED: July 18, 2024	TIME ISSUED: 1900
UNIT: MT-LNF	SIGNED: Mike Pagoaga - FBAN
WEATHER	
Temp: 88-93 RH: 13-18% Haines: 5 Wind: Terrain driven winds becoming N 5-10, gusts 18 mph <i>Local Weather Thresholds that shout WATCH OUT</i> <i>Temperatures above 80°, Relative Humidity below 20%,</i> <i>20' winds above 15 mph, 1000-HR below 12%</i>	
FUELS	
Heavy fuel loading onsite with an absence of fire disturbance or fuels treatments ahead of the fire. Predominant fuels are traditional high load, timber understory (TU5), and moderate load, timber understory (TU2) in continuous mixed conifer. Fuels Moistures at critical levels with 100-hour and 1000-hour fuel moistures at 8 and 9 percent. ERC values approaching the 97th percentile.	
FIRE BEHAVIOR	
General Fire Behavior: General surface fire spread continues to the east through heavy fuels. Due to complex terrain, the potential for rollout is high. This could cause the fire to spread to the bottom of the drainages. <i>Fine Dead Fuel Moisture: 2% unshaded, 5% shaded</i> <i>Probability of Ignition 70%, Spotting Distance less than 1/4 mile</i>	
Specific Fire Behavior: DIV A: Pockets of unburned remain from yesterdays burn operations, isolated torching possible in areas with high accumulated fuels. DIV K: Backing fire continues into Greenough Creek. Heavy fuels will continue to consume, surface fire spread not expected. DIV M: The fire will continue to try to work to the east and into Moccasin Creek, especially where it finds continuous fuels. DIV Z: Expect increased fire activity around 1600 when the winds shift to the north. This area of the fire will be in alignment with wind and slope.	
Safety	
Watchout #11: Unburned fuel between you and the fire. Due to the way this fire is now burning, there are many areas that are not clean black.	

Fire Behavior observations can be texted to 413-800-6517 or emailed to michael_pagoaga@fws.gov

Safety Message

Your Life First

Life First -Everyone Goes Home. We cannot accept any loss of life; while we are all aware of the challenges and hazards our people face every day in the fire environment, together we can work to eliminate unnecessary exposure and increase the odds that everyone goes home in 2024.

- It means knowing the dangers we face and that we still expect that our personnel will not engage unless they can do so with the greatest margin of safety.
- We expect our emergency responders to refuse assignments where hazards cannot be satisfactorily addressed.
- We ask people to take risks in fire every day, sending them to work in environments that are known to be hazardous, but we should only do so where the values we have determined threatened justify the risks and the probability of success is high.

The way to achieve our goal of zero fatalities is to train, to practice risk management, to think, to communicate, and to foster a learning environment to seek smarter ways to meet our objectives in every situation, and to learn and improve every day.

**Team Safety Officers: Leroy Holguin
Jonathan White (T)**

Safety is your Responsibility!

Northern Rockies Complex Incident Management Team

ASSIGNMENT LIST				1. Branch I		2. Division/Group A

7. Control Operations								
<p>Task: Continue direct line construction from the A/Z break north towards upper Road 2132. Continue to scout and plan line location to the A/K division break.</p> <p>Purpose: Minimize impacts to the Miller Creek and Miller Peak communications site.</p> <p>End State: Miller Creek infrastructure and Miller Peak communications are protected.</p>								
8. Special Instructions:								
* Identified for initial attack								
<p>1) If fire crosses to the west of sub-ridge between Park and Plant Drainages (M.A.P. 1). Notify DIVS A & OSC. Evaluate the need for population and structure protection along Miller Ck. Rd. to protect Miller Ck. Homes. Evaluate need to raise current evacuation warning to evacuation order. Coordinate with Local Emergency Services, County fire officers, & Missoula Co. Sheriff.</p> <p>2) If fire crosses north of Park Creek (M.A.P.4). Notify DIVS A & OSC. Evaluate the opportunity for air resources to limit impacts to the Miller Peak comms site. IC and LOFR will notify local Emergency Management.</p>								
Radio Reclone required

TRAINING MESSAGE

Requirements for Trainees with a Position Task Book (PTB)

1. Ensure your trainer(s)/evaluator(s) has/have initialed completed tasks in your PTB;
2. Obtain an Incident Performance Rating (ICS-225 or ICS-226) signed by your trainer(s)/evaluator(s);
3. Obtain an Evaluation Record (located in the back of your PTB), and
4. If evaluator initialed #1 on the Evaluator's Recommendation, ensure he/she signs as final evaluator (located on the backside of your PTB cover page),
5. If you complete a PTB on this assignment, please email me a copy of page 2, with the Final Evaluator's Verification for the Miller Peak Fire documentation package.

If you have questions regarding the process, or need an electronic ICS-225 or ICS-226, Evaluation Record, Task Book or other assignment documentation please contact me via email. Include your name, position on assignment, and put Miller Peak Fire in the subject line. Thanks!

John Gubel, PSCC
Northern Rockies Team 5

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT Med Unit/ Communications (Verify correct frequency prior to starting report)

Ex: Med Unit Lead Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: Med Unit Lead I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
