| Intent, Objectives | | | |
| <u>Commander's Intent</u> | | | |
| <p>Success is defined as prioritizing fire fighter safety, minimizing potential impacts/threats to human populations, private land, infrastructure and other identified values by effective risk management and enhanced coordination.</p> <p>Ensure that all incident actions reflect a commitment to aviation, responder and public safety utilizing the risk management process outlined in the IRPG, adherence to the 10 Standard Firefighting Orders, mitigation of the 18 Situations That Shout Watch Out and LCES. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action until such time as the risk can be satisfactorily mitigated before re-engaging. Ensure this Commander's Intent is clearly communicated and understood by all resources.</p> <p>Treat all Incident Management personnel, cooperators, contractors and the local public with dignity and respect, creating a "no tolerance" atmosphere for harassment, discrimination, alcohol, or federally prohibited substances.</p> | | | |
| <u>Operational Objectives</u> | | | |
| <ol style="list-style-type: none"> Execute a full suppression strategy utilizing direct, indirect, confine/ contain and mixed tactics to minimize impacts to values at risk and firefighter exposure both in the near- and long-term timeframe of the incident. Prevent or minimize fire impacts to these prioritized critical values: Highway 12 corridor, Weir Cr. trail and hot springs area, Forest Service infrastructure (bridges, campgrounds, kiosks, etc.), Ashpile Outfitter Camp, Western Pacific Timber lands, and natural resources (cultural/ heritage sites, aquatic species, etc.). Provide Initial Attack within the planning area. Consider operational strategies and tactics that minimize impacts to sensitive areas and anadromous fisheries. | | | |
| <u>Management Objectives</u> | | | |
| <ol style="list-style-type: none"> Provide timely and accurate dissemination of information to fire-adjacent residences and the jurisdictional agencies. Keep these entities informed of management goals, objectives, successes and challenges on the incident. Manage and/or mitigate impacts to the identified values at risk as prioritized by the jurisdictional agencies. Operations personnel should coordinate with appropriate READ(s) to document, and, if necessary, coordinate mitigation measures related to threatened and endangered species, cultural sites, and minimize introduction and spread of noxious/exotic weeds and aquatic species. Ensure costs related to incident management actions are commensurate with the values at risk. | | | |

FIRE BEHAVIOR FORECAST

| | |
|----------------------------|---------------------------------------|
| FORECAST NUMBER: 5 | TYPE OF FIRE: Wildland Fire |
| FIRE NAME: POST | OPERATIONAL PERIOD: Thur., 06/19/2025 |
| DATE ISSUED: June 18, 2025 | TIME ISSUED: 1900 |
| UNIT: ID-NCF | SIGNED: Mike Pagoaga - FBAN |

WEATHER

Temp: 85-90 RH: 19-24%
Wind: Terrain driven shifting to west and increasing 5-10,
gusts up to 15

*Local Weather Thresholds that shout **WATCH OUT**
Temperatures above 85°, Relative Humidity below 20%,
20' winds above 5 mph*

FUELS

Predominant fuels are traditional high load, timber understory (TU5), and moderate load, timber understory (TU2) in continuous mixed conifer. Fuels Moistures at critical levels with 100-hour and 1000-hour fuel moistures near 14%. ERC values approaching the 90th percentile.

Be aware of profuse spotting potential of sub-alpine fir and lichen growing thick on limbs

FIRE BEHAVIOR

General Fire Behavior

Conditions remain hot and dry. Active burning will continue through the heavy fuels. Fire growth is not anticipated. Outflow winds from afternoon thunderstorm buildup can cause areas that were relatively cool to be more active today. Expect additional smokes in previously quiet areas.

ERC: 91% Fine Dead Fuel Moisture: 7%
Probability of Ignition 50%

Specific Fire Behavior

Division A:

Any threat to containment in this division will come from interior residual heat sources. Out flow winds from passing thunderstorms may cause additional snags to fall.

Division Z:

Containment actions have been successful along the southern edge of the division. Limited fire behavior is expected throughout the rest of the division with improving weather conditions.

Division G:

This division will still have the greatest potential due to residual heat. However, fire behavior will be limited with improving fire weather conditions.

Division D:

Minimal fire behavior is expected in the division. Any remaining heat is likely from individual fuels continuing to consume, posing very little threat to containment.

Safety

Outflow thunderstorm winds can come from various directions and put different stresses on already weakened trees. Keep you head up and communicate and mitigate overhead hazards.
