INCIDENT OBJECTIVES

ICS-202

INCIDENT NAME

SUNSET

DATE PREPARED

8/29/2025

TIME PREPARED

2000

OPERATIONAL PERIOD (DATE/TIME)

August 30, 2025 0600 – 2200**INCIDENT OBJECTIVES:**

Implement risk management practices to provide for firefighter and public safety.

Implement the full suppression strategy to keep the fire North of Sunset Road, East of Cross White Road, South of Talache Road, and West of Lake Pend Oreille.

Utilize tactics to protect prioritized values, commensurate with responder risk:

- 1) Private residences and property
- 2) Critical infrastructure and communications sites
- 3) US Navy Infrastructure
- 4) Private, State and Federal timber lands
- 5) Developed recreation infrastructure on Forest Service and BLM lands
- 6) Heritage sites on Forest Service and BLM lands

Manage incident costs commensurate with the values at risk.

INCIDENT REQUIREMENTS:

Preserve, maintain and foster interagency relationships.

Coordinate routine messaging to the public and identified incident cooperators.

Minimize suppression impacts to heritage resources through coordination with assigned Resource Advisors.

FORECAST NO. 13

NAME OF INCIDENT: Sunset

FORECAST FOR: Saturday Aug 30, 2025

UNIT: IDL-Pend Oreille

TIME AND DATE

FORECAST ISSUED: 1800 Fri Aug 29, 2025

SIGNED: Bob Hoenisch (406) 899-4112

Incident Meteorologist

WEATHER DISCUSSION:

Warmer and drier conditions are expected Saturday as an upper level high pressure ridge begins to build across the Northwest U.S. and Great Basin. Scattered clouds Saturday morning thin by the afternoon with general winds from the south to southwest across ridgetops and slope-driven winds dominating in steeper terrain.

WEATHER: Partly cloudy.

MAX TEMPERATURES:

2000 FT: 85 – 90

4000 FT: 80– 85 (Up 4 - 8)

MINIMUM RELATIVE HUMIDITY:

2000 FT: 23 – 28%

4000 FT: 27 – 32% (Down 8- 12%)

20 FOOT WINDS:

Slope/Lakeshore: Light morning winds, becoming up-slope 3-7 mph afternoon.

Ridgetop: Light and variable winds in the morning, becoming southwest 5-10 mph in the afternoon with gusts to around 16 mph.

STABILITY: Morning inversion dissipating by 1100 with afternoon mixing to 9500 ft .

CHANCE OF WETTING RAIN: 0% **SMOKE TRANSPORT WIND:** Southwest 10-15 mph

SATURDAY NIGHT:

WEATHER: Partly cloudy.

MINIMUM TEMPERATURE: 52-59 valleys...60-65 mid-slopes to ridgetops. .

MAXIMUM RELATIVE HUMIDITY: 60-55%...50-60% mid-slopes to ridgetops.

20 FOOT WINDS: Becoming down-slope/down-drainage 3-5 mph.

STABILITY: Becoming stable after 2100.

CWR: 0%

SUNDAY:

Additional warming and drying is expected Sunday with afternoon max temperatures around 90 at lower elevations and minimum humidity as low as around 20%. General winds continue from the southwest with a few afternoon gusts up to 15 mph on ridgetops while lighter slope-driven winds prevail in steeper terrain and in drainages.

OUTLOOK FOR MONDAY THROUGH WEDNESDAY:

Upper level high pressure continues to strengthen early next week with temperatures peaking well above seasonal averages on Monday and Tuesday. Afternoon humidity values may fall below 20% at some locations with overnight humidity recovery declining each day. General daytime winds will primarily be slope/terrain driven with northeast winds on ridgetops and along the lakeshore Monday and Tuesday, particularly during the overnight and morning periods.

FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: 13	TYPE OF FIRE: Wildland Fire
FIRE NAME: Sunset	OPERATIONAL PERIOD: Saturday, Aug. 30
DATE ISSUED: August 29, 2025	TIME ISSUED: 1800
UNIT: ID-POS	SIGNED: Mike Pagoaga - FBAN
WEATHER	
*** SEE IMET FORECAST ***	
Local weather thresholds that shout WATCH OUT : Temperatures over 85, Relative Humidity below 20%, 1000-hr fuel moisture below 15%, Eye level winds over 10mph, 20 ft winds over 15 mph.	
FUELS	
The area comprises a mix of fuel models: TU5 (very high load, dry climate timber-shrub), TU2 (moderate load, humid climate timber-shrub), and SH2 (moderate load, dry climate shrub). Fuels are mid-way through their curing phase of growth and will provide little resistance to fire spread. Overall conditions align with seasonal averages. Fire Danger Conditions = MODERATE 100-hr Fuels = 13% 1000-hr fuels = 13% Energy Release = 89% Burning Index = 78%	
FIRE BEHAVIOR	
General Fire Behavior: Smoldering and creeping will continue until fuels are completely consumed, mopped up or until conditions prevent further combustion. Increased instability today compared to past days, however, the risk to containment lines is minimal due to few remaining heat sources. Active fire conditions: Temp greater than 80, Rh less than 30, full sun exposure. Initial Attack: Initial fire behavior will be creeping through dead down and light litter fuels. Spread rates will be around 4 ft per min with flame lengths around 5 feet. Under strong winds spread can be as much as 20 feet per minute <i>Probability of Ignition 60-70% with full exposure</i> <i>Short range spotting with peak wind gusts</i>	
Specific Fire Behavior: DIV A/Z: Fuels will continue to smolder, additional smoke will be visible today with warmer and dryer conditions but all will be well within containment lines. DIV F/M: Patchy burned or unburned fuels will continue to be the primary source of heat along the upper slopes south of Maiden Creek. Risk to containment lines is minimal. DIV R/T: Scattered heat in Pearl Creek and No Name creek will continue to require monitoring and mop up. Expect smoldering and creeping as minimal fire behavior is expected. Afternoon winds may cause additional smoke to appear in previously worked areas.	
Safety	
Ensure every incident, task, or assignment is briefed and sized up. Continuous situational awareness ensures that evolving conditions are met with appropriate tactical adjustments.

Sunset Incident

August 30th, 2025

Sunset Fire – Day 14 Safety Message

August 30, 2025

We're two weeks into the Sunset Fire, and thanks to your grit and teamwork, suppression efforts have transitioned into mop-up, patrol, and back haul operations across several divisions. This phase is quieter—but no less critical. Complacency is our new adversary.

Mop-Up & Patrol Priorities

- Work systematically from the black inward. Use sight, touch, smell, and sound to detect hidden heat sources.
- Turn every log, check under every root ball, and probe deep duff layers.
- Patrol lines thoroughly—especially near structures, drainages, and wind-exposed ridges.
- Reassess escape routes and safety zones as terrain and visibility shift.

Back Haul Operations

- Secure all tools, hose, and equipment before transport.
- Watch for trip hazards and unstable footing, especially near burned snags and ash pits.
- Communicate clearly with logistics—double-check manifests and staging areas.
- Use proper lifting techniques and buddy systems to prevent strain injuries.

Situational Awareness Reminder

- Fire is still active in pockets. Stay alert for flare-ups, rolling debris, and snag hazards.
- Maintain PPE discipline—gloves, eye protection, and helmets are your responsibility.
- If something feels off, speak up. Safety is a shared responsibility.

Crew Cohesion & Mental Health

This phase can feel anticlimactic, but it's where we lock in the win. Keep morale up. Check in with your crew. Celebrate progress. And remember—every hose roll, every cold trail walked, every tool packed out is a step toward containment and closure.

Be Mindful About Safety in all Your Actions

MEDICAL PLAN (ICS 206)

1. Incident Name: Sunset		2. Operational Period: Date From: 08/30/25 Date To: 08/30/25 Time From: 0600 Time To: 2200					
3. Air Ambulances:							
Name	Location	Contact Number(s)/Frequency	Paramedics on Site?

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Evacuation Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + Medical (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
