<b>Comments / notes on tonight's mission and this interpretation:</b>  <p><b>Moss Creek: Minimal acreage growth. No intense heat detected, but small to moderate amounts of head holding close to the fire edge and in some interior pockets. No isolated heat readings detected outside the main fire perimeter.</b></p> <p><b>Vermillion: Minimal acreage growth. Heat prevalent in the north half of the fire and near the fire edge on the southern perimeter. No intense heat readings detected. No isolated heat readings detected outside the main fire perimeter</b></p>
