

Clark Fork Complex Incident Action Plan Sunday, August 30, 2015

Day 0600-2000 PDT

Night 1800-0800 PDT

ID-IPF-000923

P1J10X (0104)

NO COMMUNICATION LINK
WITH CREW MEMBERS, SUPERVISORS AND
ADJOINING FORCES

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communications be established?
 - Talk about how communications are set up on fires.
 - Review situations where communications were a problem and what was done to fix the problem.
 - Do you need a repeater setup or can an experienced firefighter act as a human repeater?
- Is the communication triangle complete?
 - Review the communication triangle and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
 - Discuss ways that firefighters can maintain the communication triangle on the fireline.
- Reduce the risks
 - If the situation is complex, wait until communications are in place.
 - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.

INCIDENT OBJECTIVES	1. Incident Name Clark Fork Complex	2. Date 08/29/15	3. Time 1800												
4. Operational Period: 08/30/15 Day: 0600-2000 PDT Night: 1800-0800 PDT															
<p>5. General Control Objectives for the Incident (include alternatives)</p> <p>Strategy Utilize a combination of confine/contain and point protection strategies to protect identified Values at Risk, given resources available.</p> <p>Incident Objectives</p> <ol style="list-style-type: none"> 1. Firefighter, aviation and public safety is the highest priority. Use sound risk management and hazard mitigation processes that weigh probability of success against human life exposure for EVERY management action taken. 2. Minimize threats/loss to all identified values including private property; public and private improvements; electronic and communication facilities; T&E species; watershed, riparian and wilderness areas; archeological and historical sites. 3. Monitor current area, road and trail closures and provide recommendations to modify closures as warranted to ensure public safety. 4. Create and implement a Long Term Plan in coordination with the Forest(s) that protects Values at Risk, emphasizes firefighter and public safety and is commensurate with available resources. 5. Provide accurate and timely information to agencies, stakeholders and the public, through meetings, news releases, website updates, reports and personal contacts. 6. Keep costs commensurate with resource objectives through regular and ongoing cost analyses. 7. Coordinate initial attack response within the TFR area on the Idaho Panhandle and Kootenai National Forests. <p>Incident Requirements</p> <ol style="list-style-type: none"> 1. Minimize firefighter exposure in areas of standing dead timber throughout the fire areas. 2. Coordinate with the Agency Administrator or their representative when considering dozer line construction. 3. As can be accomplished safely, use minimum impact suppression tactics to maintain wilderness character and protect resources. Complete documentation of all intrusions (chainsaw use, pump use, helicopter landings/bucket drops) in WSAs. 4. All incoming crews, equipment, and vehicles must utilize a weed wash to prevent the introduction of invasive species. In addition to the equipment, crews will remove off-site soil and organic debris. All water delivery equipment will be cleaned prior to use and water sources must be approved by READS prior to cross-use. 5. All food and food waste must be stored in bear proof containers. All fire management activities will follow most recent Interagency Grizzly Bear Guidelines. 6. Maintain and enhance working relationships with partners, cooperators and stakeholders. 7. Coordinate with READS on the rehabilitation of areas impacted by fire management operations. 															
6. Weather Forecast for Period See Attached Weather Forecast															
<p>7. General Safety Message:</p> <p style="text-align: center;"><i>Gusty winds remain in the forecast: Look up and all around for snags, dead limbs and diseased or fire weakened trees.</i></p>

Clark Fork Complex Weather Forecast

FORECAST NO: 09 **NAME OF FIRE:** Clark Fork Complex
PREDICTION FOR: DAY SHIFT **UNIT:** Idaho Panhandle National Forest
SHIFT DATE: Sunday, August 30, 2015 **SIGNED:**

TIME AND DATE **Incident Meteorologist**
FORECAST ISSUED: 2030 Saturday, August 29, 2015 **Scott J. Carpenter**

WEATHER DISCUSSION: Another cold front will move through the area today and will bring better chances for wetting rainfall (greater than 0.10 inch). Gusty southwest winds will again be a concern, especially on unsheltered west and southwest exposures and aligned valleys.

WEATHER FORECAST: Much cooler and windy with rain likely and a chance for afternoon thunderstorms with another cold front moving across the complex.

HIGH TEMPERATURES: 2300-4000 ft. 54°-62° (Much cooler)
 4000-6000 ft. 47°-54°

MINIMUM HUMIDITY: 2300-4000 ft 55%-65% (Much higher)
 4000-6000 ft 60%-70%

20 FT WINDS:
SHELTERED AREAS: Downslope/Down-Valley 4-8 mph, then SW 6-10 mph with gusts to 16 mph after 1100.
RIDGETOP/UNSHelterED AREAS: SW 13-20 mph with gusts 25-35 mph.

HAINES INDEX (High Level): 2 (Very Low)

CWR (>0.10 Inch): 60%

LAL: 2

INVERSIONS/MIXING HEIGHT: Inversion around 3000 ft deep with smoke in the valleys, but mixing will improve after 1100 with frontal passage and increased rainfall.

OUTLOOK:

SUNDAY NIGHT: Mostly cloudy, scattered showers in the evening. Areas of smoke. CWR 20%. Low temperatures Sunday night 38-45°F with humidity recoveries to 75-90%. 20 ft. winds terrain driven at 3-6 mph below 3000 ft, and breezy above 3000 ft SW 6-10 mph with gusts to 15 mph. Ridgetop and west and southwest exposed mid-slope areas will have SW winds 10-15 mph gusts to 25 mph.

MONDAY AND MONDAY NIGHT: Mostly cloudy with a slight chance of rain showers. Areas of smoke. High temperatures 60-68°F below 4000 ft, 54-64°F above 4000 ft. Minimum humidity 32-42% below 4000 ft, and 37-50% above 4000 ft. Low temperatures Monday night 45-55°F with recoveries to 65-80%. 20 ft. winds terrain driven at 4-8 mph in sheltered areas. Ridgetops and unsheltered west and southwest exposures will have SW 8-14 mph. with gusts to 22 mph.

TUESDAY AND TUESDAY NIGHT: Partly cloudy with a slight chance of rain showers. Areas of smoke. High temperatures 66-72°F below 4000 ft., and 58-66°F above 4000 ft. Minimum humidity 28-35% below 4000 ft. 35-45% above 4000 ft. Low Temperatures 44-50°F with humidity recoveries to 65-80%. 20 ft. winds terrain driven at 4-8 mph in sheltered areas. Ridgetops and unsheltered west and southwest exposures will have SW 8-14 mph. with gusts to 22 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #10	TYPE OF FIRE: Wildland Fires
FIRE NAME: Clark Fork Complex	OPERATIONAL PERIOD: Day 08/30/15
DATE ISSUED: 08/29/15	TIME ISSUED: 2020 hrs
UNIT: Sandpoint RD/Idaho Panhandle NF/ID & Cabinet RD/Kootenai NF/MT	SIGNED: Risa Lange-Navarro, FBAN <i>/s/ Risa Lange-Navarro</i>

INPUTS

WEATHER SUMMARY: Much cooler, rain likely, chance of thunderstorms and breezy.
 See Attached Spot Weather Forecast for further information.
 North ID/Southern Mtns ERC **Observed** for 8/29/15 **79**, 97th percentile is 79
 Kootenai NF ERC **Observed** for 8/29/15 **59**, 90th percentile is 61

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Available fuels include moose moss, lichen, beargrass, some brush, Lodgepole pine, Whitebark pine, Subalpine fir, White fir, Douglas-fir, Western Larch, Ponderosa pine, Western Red Cedar and Western Hemlock. Bug-killed trees & snags with jackpots of heavy dead/downed and/or rotten fuels and snags are numerous. Marsh & valley bottoms burning readily and not a barrier. Fuel model 2, 8, 9 & 10. Fuels are extremely dry for this time of year and burning as if it was mid-September. Estimated 1000 hrs fuel moistures 10-13% & live fuel moisture 90%.
- Topography consists of steep, rocky drainages along Bull River & Clark Fork River with flat valley bottoms.
- Main fire behavior has surface fire (head, backing, flanking, creeping & smoldering), very isolated single tree torching, rollouts are possible. Burning out of heavy fuel jackpots and very minimal spotting. Spotting distance potential <0.1 mile mostly from tree to tree. Snags & fire weakened trees falling down. Reburn potential still high even though recent precipitation has dampened the effect of the 1 hr and 10 hr fuels.
- Watch for alignment of slope, winds and fuels for most active fire behavior. This is especially critical during thunderstorm downdrafts and indrafts.
- Burn period has been from 1000 to 2030 hrs with the main peak hours from 1700-2000 hrs for Bull River fires, 1300-2030 hrs for Whitetail.
- Probability of ignition about +/-35% on Unshaded South aspects with Fine Dead Fuel Moisture 8%.
- **Develop trigger points for your disengagement BEFORE fire behavior threatens your safety.**

SPECIFIC: Ensure lookouts are in a good safe spot where they can observe the fire activity/weather. Take hourly weather observations & bring them to Clark Fork ICP at end of shift.

Rates of Spread (ch/hr): Fuel Models (FM) 8 / 9 / 10

	<u>Head</u>	<u>Flanking</u>	<u>Backing</u>
20 ft winds 8 mph	2 / 6 / 8	1 / 5 / 6	<1 / <1 / 1
20 ft winds 20 mph	3 / 18 / 19	3 / 16 / 16	2 / 13 / 12

Flame Length (ft): Fuel Models (FM) 8 / 9 / 10

	<u>Head</u>	<u>Flanking</u>	<u>Backing</u>
20 ft winds 8 mph	1 / 2 / 5	<1 / 2 / 4	<1 / 1 / 2
20 ft winds 20 mph	1 / 4 / 7	1 / 4 / 7	1 / 3 / 6

Div A/Z: Mop-up a worthy option today. Expect minimal fire spread on the upslope sides in Star & Hamilton Gulches, Napoleon Creek and south of Pillick Ridge into Gin Gulch with head, flanking & backing fire and the southwest corner which is spreading downslope in Blacktail Cr. Expect little surface fire spread, most spread will be from the burnout of jackpots in heavy dead/downed fuels; very limited if any single tree torching and spotting. Rollouts still possible. Watch for spots in areas where the smoke column has laid over yesterday and during the night.

Div P: Unstaffed

Div S: Monitor status. Moderated fire spread today given the predicted precipitation. Flanking & backing fire spread on the west, south, east & northeast sides into the West Fk of Blue Cr to continue. Minimal surface fire & burnout of jackpots of heavy dead/downed fuels.

Div T: Fire spread will be very moderated today due to predicted precipitation, the direction of spread continues to be north, south & east in the Ross Cr drainage both downcanyon and upcanyon with the southeast spot spread to the east. Fire has crossed Ross Cr increasing the chance of more spots becoming established across Ross Creek or down drainage from Ross Pt, however with yesterday's precipitation; spread from these areas will be toned-down considerably. Fire behavior that can be expected is surface fire (flanking & backing), burning jackpots of heavy dead/downed fuels and rollouts possible.

Div W: Great mop-up opportunity with precipitation and higher RHs predicted. With predicted precipitation spread will be minimal on all parts of the fire; on the west flank mostly backing/flanking downslope, on the south end look for spread along ridgetop and downslope to the E/SE down into Whitetail Cr, and flanking to the E/NE toward the head of Blacktail Cr and downslope into Blacktail Cr. Expect negligible surface fire to spread into jackpots of heavy dead/downed fuels, rollouts and very limited if any single tree torching and/or spotting. Rollouts still possible. Watch for spots in areas where burnout operations occurred, and where the smoke column has laid over to the northeast during the day and downslope during the night.

Div X: Monitor status.

Div Y: Predominant spread has been to the east toward Basin Cr and downslope onto the flats toward the Bull River. With predicted precipitation expect very little if any spread. Flanking & backing fire with predominant spread into Basin Cr with slope reversals. Surface fire spreading into jackpots of heavy dead/downed fuels with very minimal spotting. Mop-up a good option all day. Watch for spots in areas where the smoke column has laid over yesterday and downslope overnight.

Night Operations: See the above Division breakout above for information on your location throughout the night. Winds will continue throughout the evening hours so expect activity accordingly. Watch for fire weakened trees and snags coming down. Thermal belts that form overnight may have active fire with jackpots burning out. Watch the areas where the smoke has started to lay over the firelines with winds. Be aware of smoky conditions from the day's fire activity which may obscure your vantage points.

AIR OPERATIONS: Look for inversion to lift in the morning but settle back in mid-afternoon. Improved visibility from yesterday. Chance of thunderstorm in the afternoon, otherwise breezy.

SAFETY

Even though we got a bit of cooler/wetter weather, it's not enough to squash the fire activity especially the heavier fuels which are still really dry. Great chances for mop-up but be situationally aware of fire weakened trees and snags coming down just on their own or with winds.

PLEASE GIVE FEEDBACK, it's greatly appreciated!

AIR OPERATIONS SUMMARY

Prepared By: Steve Croy – ASGS(t)

08/29/2015

Prepared Time: 20:00

1. INCIDENT NAME: Clark Fork Complex	2. OPS PERIOD DATE: 08/30/2015	START TIME: 0600	END TIME: 2000	SUNRISE: 05:59 PDT 06:59 MDT	SUNSET: 19:30 PDT 20:30 MDT
3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment): - Communicate known flight hazards to your pilot: wires, towers, snags, other aircraft. - Aircraft requests will be made thru Line Operations. - AFTER Aug 15: Fed aircraft will cease tactical operations after sundown, flight after sunset shall be ferry back to base only. - Continuing winds with showers expected likely limiting air operations. - Available aircraft will come from Shoshone, Libby, or Coeur D'Alene when ordered.			4. READY ALERT AIRCRAFT MEDEVAC – Contact Clark Fork Complex ICP Communication with Request.		5. TFR's: 5/7406 5nm centered Whitetail Peak A/A freq 124.650, Surface to 7000' MSL

NOTE:

10. TASK/ MISSION/ ASSIGNMENT (Type/ function includes: Air Tactical, Retardant, Recon, Personnel Transport, Bucket Operations, SAR, etc.)
Missions: OPS, FBAN/LTAN recons; bucket work possible; Support Zone IA

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Clark Fork Complex Fires	DATE: August 30, 2015	Operation period: 0600-2000 hrs. 1800-0800 hrs.
------------------------------------	-----------------------	--

Major Hazards and Risks:

- Speeding on wet black top or muddy roads is dangerous- obey posted speeds, stay in control of your vehicle at all times by reducing speeds and driving according to road conditions.
- Deer and bear are crossing the roads and being hit. Slow down below posted speeds at dusk and dawn. Passengers need to help look for animals and other hazards like trees in the roads.
- SNAGS are being pushed over by winds in the black or green, Helicopter bucket drops may occur near you and that could blow over snags as well. So stay well away from these trees when wind comes up. Check for snags, hung up branches (Widow Makers) and avoid them when you take a break, when you park your vehicle or set up a tent. Gravity will win every time if you let it.

Every person deserves a good briefing – every shift. Keep up the good, safe work.

Watch Out Situation of the Day

18. TAKING A NAP NEAR THE FIRELINE

Directing Helicopter Bucket Drops

- ⇒ Give general location on the incident.
- ⇒ Finalize location with: Pilots Clock direction – straight in front of the aircraft is 12 o'clock; the right door is 3 o'clock; the tail is 6 o'clock; and the left door is 9 o'clock. When giving directions, remember that helicopters generally orbit in a clockwise pattern. Describe prominent landmarks – don't say "I'm wearing a yellow shirt", "I'm by a big tree", etc. Use a signal mirror (a compass works fine) or a 2-3 foot piece of flagging tied to a long stick. Stand in drop location (when safe) for ID, then move away before the drop.
- ⇒ Visualize what the pilot sees from the air and describe the target. Use orange panels or large amounts of bright flagging.
- ⇒ Describe the target from your location and explain the mission. The pilot will decide drop technique and flight path, or you can ask the pilot for a hover drop or line drop in a given direction.
- ⇒ Assure pilot that all personnel are safe and they know the aircraft's intentions before the drop.
- ⇒ Give feedback to the pilot about drop accuracy. Be honest and constructive. Let pilot know if drop is early, late, uphill, downhill, etc. The pilot wants to provide you with the best support possible.

Remember: The Pilot Has Final Say On Drops

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.
--	--

Clark Fork Complex

Incident within an Incident Emergency Action Plan

In the case of a serious accident requiring patient transport to a medical facility:

- The closest ranking Operations Leader (i.e. Division Supervisor) at the accident scene will take charge and be the Point of Contact (POC).
- Mobilize the closest paramedic/EMT to the scene by ground or air to treat the patient(s) and package for transport.
- Use the Medical Plan ICS 206WF and Incident Medical Report Form (Nine Line) in the IAP to collect and document patient information, communicate with ICP Communications and plan for two types of transport (ground and air).
- Operations Section Chief (Line or Plans) will direct medical emergency response from ICP or on-scene.
- Upon notification of a serious accident, the Incident Commander, Safety Officer, Operations Section Chief (Plans), Air Support Group Supervisor and Medical Unit Leader will report to the ICP Communications.
- Incident Communications will notify Coeur d' Alene Interagency Dispatch Center (CDC) (208-772-3283) and coordinate patient transportation.
- All other Command and General Staff will go to ICP communications to monitor the situation and be available if needed to assist.
- Incident Radio traffic will be monitored 24 hours a day at the Clark Fork ICP.
