<b>Comments /notes on tonight's mission and this interpretation:</b> Heat perimeter has grown in all directions since last IR flight. Fire is located 0.75 miles south of U.S. Highway 12 and the Lochsa River, between river mile 65 and 70. It is bounded by Robin Creek to the west, the ridge overlooking Walton Creek to the east, is 0.5 miles north of Goat Roost to the south, and has crossed into the National Recreational Area along the Lochsa River on the northern side. Perimeter has burned over the Jay Point electronic site and lookout. There are multiple heat sources outside the heat perimeter, primarily on the eastern side. There were two heat sources detected over 2.5 miles east of the fire. The points are in the isolated heat shapefile but not shown on the map. Their coordinates are: 114.63635 W 46.49899 N 114.64102 W 46.46131 N
