### Provide an Effective Briefing

Providing an effective briefing is extremely important, especially when information needs to be conveyed in an accurate and timely fashion. Effective briefings also provide a sense of purpose, confidence, and inspiration to your audience. It supports organizational leadership and maximizes team performance.

#### Objectives of a Briefing

- To support standard operating procedures (SOPs);
- To define and communicate work objectives and special instructions;
- To communicate personal expectations; and
- To promote inquiry, advocacy, and feedback.

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>Clearwater Complex Fisher Branch</b>	2. Date Prepared <b>8/16/2015</b>	3. Time Prepared <b>2000</b>

5. General Control Objectives For The Incident (Include Alternatives)															
<u><b>Leaders Intent</b></u>															
<ol style="list-style-type: none"> <li>1. Reduce and /or eliminate impacts caused by the Fisher Branch of the Clearwater Complex to residents, businesses, and critical infrastructure ensuring public, firefighter, and aviation safety. Ensure that all incident actions reflect this commitment to safety through sound risk assessment, adherence to the 10 standard firefighting orders, mitigation of the 18 situations that shout watch out and LCES. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action. Do not let cost objectives minimize safety and risk management. Ensure that Leader's Intent is clearly communicated and understood.</li> <li>2. Coordinate incident branch management activities with Idaho Department of Lands, US Forest Service, Nez Perce Tribe, Bureau of Indian Affairs, County/Municipal entities and Greg Poncin's Type I IMT, including but not limited to; suppression actions, support needs, and rehabilitation. Tactics will be most aggressive where values at risk are high. Take advantage of natural features such as breaks in fuels, topographic features, or changes in weather.</li> <li>3. Treat all Incident Management personnel, cooperators, contractors and local publics with dignity and respect. Ensure prompt and accurate communication that fosters discussions, embraces local knowledge, and encourages interactions with the hosting agencies, local cooperators, and private landowners.</li> <li>4. Coordinate closely with resource advisors to ensure that suppression impacts to natural and cultural resources are kept to a minimum.</li> </ol>															
<u><b>Operational Objectives</b></u>															
<ol style="list-style-type: none"> <li>1. Check the fires' growth and provide for point protection where structures are threatened.</li> <li>2. Recognize that priorities within the Clearwater Complex are Lawyer 2, Lolo 2, Fisher, Syringa and Pilot Knob. Provide assistance as needed, and request assistance as needed with other IMT resources assigned within the Complex.</li> <li>3. Reduce the probability of fire disrupting or making undue impacts to infrastructure such as roadways (especially Highways), power lines (prioritize transmission over distribution), and communication sites.</li> <li>4. Develop contingency plans that identify locations and specific actions to be taken in the event that the fire threatens to or moves significantly.</li> </ol>															
<u><b>Management Objectives</b></u>															
<ol style="list-style-type: none"> <li>1. Provide assistance for initial attack as requested, coordinating all IA activities with Grangeville Dispatch.</li> <li>2. Provide for the orderly transition of knowledge and resources to the incoming Type I team that will take over the Fisher fire.</li> </ol>

## FIRE BEHAVIOR FORECAST #1

### Fisher Fire: Day Shift Monday 8/17/2015

DATE/TIME ISSUED: 8/16/2015-1900hrs

FIRE BEHAVIOR ANALYST: \_\_\_\_\_

\_\_\_\_\_ Bill Wilkinson \_\_\_\_\_

---

#### WEATHER SUMMARY:

For Monday: See Incident Weather Forecast included in this IAP

#### Long Term:

---

#### FIRE BEHAVIOR:

##### Short Range:

Extremely dry fuels along with steep topography and wind will support rapid fire spread.

Expect torching and spotting.

##### FIRE BEHAVIOR SPECIFIC:

**Six mile drainage:** Expect the fire to continue to spread up-drainage to the northwest and the C/E division break. Drainage winds will affect the rate of spread. The fire will back into the down-drainage flow early. Winds are expected switch to up slope up drainage flow around 1000hrs. Spread on croplands above the canyon will be affected by northwest winds at 5-10mph.

**Big Canyon Cr/Southwest corner:** Expect the fire to continue to spread up-drainage to the southwest and the C/W division break. Drainage winds will affect the rate of spread. Spread on croplands above the canyon will be affected by northwest winds at 5-10mph.

#### AIR OPERATIONS:

Aerial resources should have no significant issues today.

---

#### SAFETY

- **Pace yourself.** Remember there will be many fire assignments to come, and managing fatigue and firefighter health now and as the season progresses will result in increased safety and efficiency.

# Safety Message

## Managing Change

Change occurs at every moment of every day. Transitions between work shifts, personnel, line assignments, fuels, weather, topography, and other variables are prime opportunities for accidents to occur. Recognizing change and managing it appropriately is every fire fighters responsibility.

Three Techniques for Managing Change:

- **Anticipate** - Look for it. Maintain your situational awareness throughout your shift and anticipate change at all times.
- **Ask Questions** - Understand it. Get more information and ask questions. Remember to include all personnel, including subordinates, when information gathering.
- **Take Action** - Address it. Take the time to mitigate all hazards and make them known. Stay flexible to adjust your tactics as necessary.

Communication is the best tool to begin understanding and addressing change appropriately. Include all personnel and means necessary to fully identify and communicate change.

**Change is Here Now – Be Mindful and Act Appropriately**

## 7. Control Operations

Continue to hold and secure Big Canyon near the Chad Knolten residence. Assess structure protection needs. Continue to hold and secure fire spread to agriculture land as it comes out of the timbered draws and canyons. Continue to burnout and secure north side of Six-mile Canyon towards C)(E break.

Start mop up activities when fire activity allows; mop up in a distance commensurate with values at risk and the potential for the fire to escape containment

## 8. Special Instructions:

Mitigate hazard trees as necessary depending on the mop up standards.

\*\* Denotes Resources is associated with Grangeville Taskforce.

**FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use items one through nine to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS/DISPATCH**

*Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)*

**2. INCIDENT STATUS: Provide incident summary and command structure.**

<b>Nature of Injury/Illness</b>		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.**

**Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

**REMEMBER:** Confirm ETA's of resources ordered  
Act according to your level of training  
Be Alert. Keep Calm. Think Clearly. Act Decisively.

# MEDICAL PLAN

## ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

### Pre-Planning for today's assignment – See Page 2 IRPG

What are the likely hazards that could cause injuries? What kind of severe injuries?		
Who is the likely in-charge DIVS or overhead for an emergency in your assigned area today? (i.e. "Division Zulu")		
Who are the Medical personnel assigned to your part of the incident? What are their capabilities?		
Other Emergency Responders: fire dept, crash rescue, ambulance?		
Communications: Command channel, Air to Ground, Medical helicopters, local rescue/medical?		
Transportation methods available	Ground vehicle, drop point, coordinates, travel route?	
	Aircraft I.D, helispot names, coordinates? Hoist capable, internal transport	
	Other available methods - contingency	
Most likely workforce for evacuation		

### Response checklist

#### **Who takes charge?**

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

#### **Response sequence:**

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.

#### **Information for Communications: (See Medical Incident Report, page 108, IRPG)**

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
- Medical Emergency Responders confer with Medical Unit Leader and DIVS or designated Overhead to determine if this is a critical emergency and what type of transport is needed.
