Incident: CLEARWATER/MUNICIPAL COMPLEX

<p>33. Life, Safety, and Health Status/Threat Remarks: Remote locations, steep narrow roads, vehicle and machinery traffic associated with public hunting, agriculture, and salvage logging are creating hazards to resources traveling to and from and working the firelines. Resources are exercising extreme caution as they work on critical areas from hazards of falling trees in very steep and remote terrain.</p> <hr/> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): WEATHER FORECAST SATURDAY:</p> <p>WEATHER: Quite chilly with on-and-off showers. Isolated rumble of thunder possible.</p> <p>MAX TEMPERATURE: Plateaus/Ridges 45° to 53°F, Valleys 53° to 62°F.</p> <p>MIN HUMIDITY: Plateaus/Ridges 60% to 70%, Valleys 50% to 60%.</p> <p>20 FT WINDS: -PLATEAUS/RIDGES - Southwest to West 6-12 mph. -SLOPE/VALLEY - Variable to Southwest 3-7 mph.</p> <p>HAINES INDEX: 3 very low</p> <p>LAL: 2</p> <p>CWR: (> 0.10 Inch): Likely occurred overnight; 80% chance for additional wetting rain daytime.</p> <p>STABILITY/INVERSION: Weak inversion; still plenty of clouds and moisture through the day.</p>	<p>34. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p style="padding-left: 40px;">The presence of forecasted cloud cover and higher humidities should keep potential for increased fire activity to a minimum. If thunderstorms should develop and lightning ignite new fires, there is potential for large fire growth in the event the storms do not produce ample precipitation. The Clearwater Complex is still mainly smoldering as well as each of the fires in the Municipal Complex.</p> <p>12 hours:</p> <p>24 hours:</p> <p>48 hours:</p> <p>72 hours:</p> <p>Anticipated after 72 hours:</p>

<p>37. Strategic Objectives (define planned end-state for incident):</p> <ol style="list-style-type: none"> 1. Protection of human life and safety is the first priority for all actions and may override all incident and strategic operational objectives. 2. Keep fires within existing control lines 3. Protect waterways and riparian areas 4. Provide and conduct Initial Attack (IA) on new fires if requested by the districts or association..

Incident: CLEARWATER/MUNICIPAL COMPLEX

5. Provide accurate and timely information to public through media release, public meetings and social media.
6. Ensure suppression strategies consider cost containment and most efficient organization to minimize impacts to landowners.
7. Implement full suppression strategy using direct and indirect tactics to contain Lost Hat and Musselshell fires. Remaining fires on the Motorway North are implementing point protection for values at risk.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
12 hours: **Close attention is focused in the Lolo drainage area of the Clearwater Complex for any potential flare ups. Citizens from the local communities continue to show a high level of interest concerning the fires as they**
24 hours: **become more visible. New fire starts may result in a significant commitment of resources to respond to initial attack.**
48 hours:
72 hours:
Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
12 hours:
24 hours:
48 hours:
72 hours:
Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.
Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.
Local communities remain concerned with continued potential risks from the Clearwater Complex, especially after sustaining significant structural losses in their respective communities earlier.

41. Planned Actions for Next Operational Period:
Clearwater Complex: Concentrating resources on DIV A (Woodland Community). Suppressing hotspots near homes and control lines. Patrol perimeter of DIVs E/X, F/R, and T. Continuation of suppression repair activities. Respond to Initial Attack fires.
Municipal Complex - Patrol perimeter. Continuation of suppression repair activities on Fisher Fire. Respond to Initial Attack fires.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$25,342,334.00**

46. Projected Final Incident Cost Estimate:
