12. Prepared By: Print Name: <b>Steve Smith - SITL</b>  Date/Time Prepared: <b>08/21/2015 0500 PDT</b>		13. Approved By: Print Name: <b>Mike Wilkins - ICT1</b>  Signature: _____											
14. Date/Time Submitted: <b>08/21/2015 1806 PDT</b>	15. Primary Location, Organization, or Agency Sent To: <b>NRCC</b>												
16. State: <b>ID</b>	17. County / Parish / Borough: <b>Clearwater</b>	18. City: <b>Orofino, ID</b>											
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction):											
22. Latitude/Longitude: Latitude: <b>46° 28' 2"</b> Longitude: <b>116° 14' 22"</b>	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township:      Range:      Section: 1/4 Sec: of 1/4 Sec:											
25. Short Location or Area Description (list all affected areas or a reference point): <b>Clearwater, Lewis and Nez Perce Counties in Idaho</b>		26. UTM Coordinates: Zone:      Easting: Northing:											
27. Note any geospatial data available (indicate data format, content, and collection time information and labels):													
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):  <b>Moderate</b> <b>Flanking</b> <b>Backing</b>													

## Incident Status Summary (ICS-209)

Incident: MUNICIPAL COMPLEX

**Creeping**  
 Narrative:  
**Observed fire behavior on the Fisher and Municipal fires has been associated with consumption of interior fuels. The Old Greer Fire is mostly smoldering in the heavy fuels. Fire spread has been primarily terrain driven. Where wind and slope align, faster rates of spread and higher intensities are being experienced.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):  
**Timber (Grass and Understory)  
 Dormant Brush, Hardwood Slash  
 Medium Logging Slash**  
 Narrative:  
**The additional fuel model of medium logging slash is to represent scattered locations throughout the areas in and adjacent to the fire area that have been logged and have residual activity fuels.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): <b>In addition, 1 historic homestead destroyed. All damage assessments conducted and confirmed by Clearwater County Sheriff on the Municipal Complex.</b>	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	200	0	4
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	0	0	0
	I. Other Minor Structures	120	0	8

## Incident Status Summary (ICS-209)

Incident: MUNICIPAL COMPLEX

<p>pose a threat to the towns of Orofino on the Municipal fire and Craigmont on the Fisher fire. Very dense concentrations of smoke still pose a significant air quality concern throught the Clearwater Valley especially in the community of Orofino. On the Fisher fire, a number of homes have potential to be affected should the fire make a advance out of Big Canyon. Cattle and agricultural enterprises are at highest risk with loss of grazing ground, crops and damages to farm machinery.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Red Flag Warning in Effect from 10:00 to 16:00. Current winds are gusting well over 20 mph and will likely result in intensified burning conditions and contribute to increased initial attack. Saturday; Mostly sunny. Areas of smoke in the morning. High 82 to 92 in the valley, 68 to 78 on the ridges. Min Humidity 10 to 20% in the valleys, 15 to 25% on the ridges. 20 Foot Winds: Ridges to North to Northwest 5 to 10 mph. Valleys/Slope to Upslope 4 to 8 mph. Haines 4 to Low LAL 1 CWR:0%</b></p>	Active?	
	A. No Likely Threat	
	B. Potential Future Threat	X
	C. Mass Notifications in Progress	
	D. Mass Notifications Completed	
	E. No Evacuation(s) Imminent	
	F. Planning for Evacuation	
	G. Planning for Shelter-in-Place	
	H. Evacuation(s) in Progress	
	I. Shelter-in-Place in Progress	
	J. Repopulation in Progress	X
	K. Mass Immunization in Progress	
	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	X
O. Road Closure	X	
P. Trail Closure		
Q. Area Closure		

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p>Should high winds today compromise lines on the Municipal or Fisher fires, fire advancement could be fairly significant with potential for wind driven runs to the east and southeast associated with the frontal passage. Otherwise expectations are the Fisher fire will continue to consume unburned pockets of fuel in the canyons which have proved to be resistant to control and containment in steep, rocky slopes. The Municipal fire has areas of unburned fuels that continue to creep through the interior. The Old Greer fire is expected to not make any further advancements and remains in a patrol status.</p> <p>Interior burning on all fires in the complex will continue. On the Fisher fire, unburned locations within Big Canyon will continue to consume and fill in between control lines and the main fire. If opportunity exists for burnout operations, interior unburned fuels will be consumed in Big Canyon along the fire's southern perimeter.</p> <p>12 hours: 24 hours: 48 hours: 72 hours: Anticipated after 72 hours:</p>
--

37. Strategic Objectives (define planned end-state for incident):  
**Protection of human life and safety is the first priority. Keep fires within existing control lines. Implement full suppression strategy using direct and indirect tactics for all initial attack and ongoing fires within the Complex. Provide point protection to homes and other values. Coordinate with county Sheriffs' departments for recommendations of any future evacuations. Contain the Municipal fire to the North of Upper Fords Creek Road to prevent advancement towards numerous homes and to prevent the compromise of potential evacuation routes. Confine the Fisher fire to the canyons and prevent further spread onto surrounding agricultural lands. Monitor weather closely for windows of opportunity to conduct burnout operations in Big Canyon on the southern end of the Fisher fire.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other

## Incident Status Summary (ICS-209)

Incident: MUNICIPAL COMPLEX

critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Several residences are located within 1/2 mile of the fire perimeter to the South of Upper Fords Creek Road. Additionally, the town of Orofino is within 1/10th mile of the fire perimeter to the north. On the Fisher fire, scattered homes and improvements exist in close proximity to the fire's perimeter. Additionally, town of Craigmont is located 5 miles south of the Fisher fire. Several areas of cultural resources sacred to the Nez Perce Tribe exist throughout the fire area and special concern is to be given to protect and prevent damage to any sites.**

24 hours: **The Incident Management Team has identified task force resources, from the existing complex resources, to respond for initial attack that will have common communications to support the local primary suppression response agencies.**

48 hours:

72 hours:

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **6 TFLD's to manage complexity and supervise resources to assure adequate supervision to mitigate safety concerns.  
11 Type 6 Engines remain unfilled and are needed for critical mopup to prevent fire escape and anticipated initial attack on new fire starts. Type 6 engines required to safely maneuver and access narrow and steep roads.  
2 SOF2 or Line Safety Officers to maintain an acceptable level of oversight to ensure safety of resources assigned to multiple fires over a large geographic area.**

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**Overall strategy is to contain and mopup existing fire perimeters to prevent opportunity for any future advancements. Management objectives are as follows:**

1. **Protection of human life and safety is the first priority for all actions and may override all incident and strategic operational objectives.**
2. **Keep fires within existing control lines**
3. **Protect waterways and riparian areas**
4. **Provide and conduct Initial Attack (IA) on new fires if requested by the districts or association..**
5. **Provide accurate and timely information to public through media release, public meetings and social media.**
6. **Ensure suppression strategies consider cost containment and most efficient organization to minimize impacts to landowners.**
7. **Implement full suppression strategy using direct and indirect tactics to contain fire. Provide point protection when necessary.**

**Municipal and Old Greer:**

1. **Involve Clearwater, Lewis, and Nez Perce County officials in the decision making processes as appropriate to jurisdictions**

## Incident Status Summary (ICS-209)

Incident: MUNICIPAL COMPLEX

and responsibilities.

Implement full suppression strategy using direct and indirect tactics to protect and prevent further damage to structures.  
 2. Using the risk management process to identify values at risk and risk mitigation measures to manage risk and exposure to first responders and the public.

Fisher:

1. Protect sensitive Nez Perce cultural resources that exist or may be encountered. Sites of concern should be undisturbed and avoided consistent with reporting to tribal agency administrator or resource advisor.
2. The Incident Management Team has developed a wildfire protection assessment plan for the Pierce, Idaho area focusing on the lands between the Forest Service Boundary and the town of Pierce. In the event the Motorway Fire approaches the Forest Boundary, the Blue Team will initiate suppression action to stop westward movement of the fire and protect the Pierce area structures. This will be done in concert with CPTPA and the IMT that is responsible for the Motorway Fires.

41. Planned Actions for Next Operational Period:

Strengthen control lines where available resources are capable of being productive. Employ extensive mopup to mitigate opportunity for escape with forecasted wind event on Friday. Continue deploying hose lays along control lines on the Municipal fire to support mopup to areas inaccessible by engines. Prepare for and conduct burnout operation in Big Canyon on the southern end of the Fisher fire if conditions allow.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”):

43. Anticipated Incident Containment or Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$2,978,432.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

This complex contains the Old Greer, Fisher and Municipal Fires as of 8/21/2015. The Municipal Complex provided initial attack assistance on a new fire near Grangemont, ID today at the request of Clearwater Potlatch Timber Protection Association.

Incident Name	Suppression Strategy	Size	MMA	Cost to Date
Municipal	Full Suppression	1,770	40 %	\$1,255,300.00
Fisher	Full Suppression	21,640	65 %	\$1,655,732.00
Old Greer	Full Suppression	73	90 %	\$67,400.00
