36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

The Fisher fire will continue to consume unburned pockets of fuel in the canyons which have proved to be resistant to control and containment in steep, rocky slopes. The Municipal fire has areas of unburned fuels that continue to creep through the interior. The Old Greer fire is expected to not make any further advancements and remains in a patrol status.

²⁴ hours: Interior burning on all fires in the complex will continue. On the Fisher fire, unburned locations within Big Canyon will continue to consume and fill in between control lines and the main fire.

48 hours:

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Protection of human life and safety is the first priority. Keep fires within existing control lines. Implement full suppression strategy using direct and indirect tactics for all initial attack and ongoing fires within the Complex. Provide point protection to homes and other values. Coordinate with County Sheriffs' Departments for recommendations of any future evacuations. Contain the Municipal fire to the North of Upper Fords Creek Road to prevent advancement towards numerous homes and to prevent the compromise of potential evacuation routes. Confine the Fisher fire to the canyons and prevent further spread onto surrounding agricultural lands. Complete burnout operations in Big Canyon on the southern end of the Fisher fire.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Several residences are located within 1/2 mile of the fire perimeter to the South of Upper Fords Creek Road. Addtionally, the town of Orofino is within 1/10th mile of the fire perimeter to the north. On the Fisher fire,

Incident: MUNICIPAL COMPLEX

scattered homes and improvements exist in close proximity to the fire's perimeter. Additionally, town of Craigmont is located 5 miles south of the Fisher fire. Several areas of cultural resources sacred to the Nez Perce Tribe exist throughout the fire area and special concern is to be given to protect and prevent damage to any sites. 24 hours: 24 hours: 27 hours: Anticipated after 72 hours: 39. Incident: MUNICIPAL COMPLEX

1. Protect sensitive Nez Perce cultural resources that exist or may be encountered. Sites of concern should be undisturbed and avoided consistent with reporting to tribal agency administrator or resource advisor.

2. The Incident Management Team has completed a wildfire protection assessment plan for the Pierce, Idaho area focusing on the lands between the Forest Service Boundary and the town of Pierce. In the event the Motorway Fire approaches the Forest Boundary, the Blue Team will initiate suppression action to stop westward movement of the fire and protect the Pierce area structures. This will be done in concert with CPTPA and the IMT that is responsible for the Motorway Fires. Initial coordination meetings have taken place between IMT's and cooperators. Public scheduled tonight at 1800 in the community of Pierce.

41. Planned Actions for Next Operational Period:

Strengthen control lines where available resources are capable of being productive. Employ extensive mopup to mitigate opportunity for escape with forecasted wind event on Friday. Continue deploying hose lays along control lines on the Municipal fire to support mopup to areas inaccessible by engines.

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$2,980,832.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

This complex contains the Old Greer, Fisher and Municipal Fires as of 8/22/2015.

Incident Name	Suppression Strategy	Size	MMA	Cost to Date
Municipal	Full Suppression	1,770	60 %	\$1,255,300.00
Old Greer	Full Suppression	73	95 %	\$69,800.00
Fisher	Full Suppression	21,640	75 %	\$1,655,732.00

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):

53. Additional Cooperating and Assisting Organizations Not Listed Above:

Clearwater County Sheriff and Emergency Management, Clearwater Potlatch Timper Protection Association, Nez Perce Tribe
