Incident: MUNICIPAL COMPLEX

N	a	r	ra	٩t	'n	v	6

Interior heat still exists on all three fires in the Complex.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)
Brush (2 feet)
Medium Logging Slash

Narrative:

Needle cast is beginning to occur an all three fires in the Complex.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

In addition, 1 historic homestead destroyed, All damage

In addition, 1 historic homestead destroyed. All damage assesments conducted and confirmed by Clearwater County Sheriff on the Municipal Complex.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

33. Life, Safety, and Health Status/Threat Remarks:

Very dense concentrations of smoke continue to pose a significant air quality concern throught the Clearwater Valley especially in the community of Orofino. On the Fisher fire, a number of homes have potential to be affected should the fire make an advance out of Big Canyon. Cattle and agricultural enterprises are at highest risk with loss of grazing ground, crops and damages to farm machinery.

34. Life, Safety, and Health Threa	t
Management:	
	Active?
A. No Likely Threat	
B. Potential Future Threat	х

Incident: MUNICIPAL COMPLEX

35. Weather Concerns (synopsis of current and predicted weather; discuss		Active?
related factors that may cause concern):	C. Mass Notifications in Progress	
Tuesday - Mostly sunny with smoke. High 83 to 93 in the valley, 75 to 80 on the ridges. Min Humidity - 13 - 18% in the valleys, 15 - 23% on the ridges.	D. Mass Notifications Completed	
20 Foot Winds : Ridges - Southwest 7 - 15 mph. Valleys/Slope - Upslope 4 - 8	E. No Evacuation(s) Imminent

	M. Quarantine in Progress	
	N. Area Restriction in Effect	
	O. Road Closure	
	P. Trail Closure	
	Q. Area Closure	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

The Fisher fire will continue to consume unburned pockets of fuel in the canyons which have proved to be resistant to control and containment in steep, rocky slopes. The Municipal fire has reduced areas of unburned fuels that continue to creep through the interior. The Old Greer fire is nearing full containment and is not expected make any further advancements. The Old Greer fire remains in a patrol status.

24 hours: All fires are expected to be in limited mopup and patrol status with suppresion repair initiated.

48 hours: 72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Protection of human life and safety is the first priority. Keep fires within existing control lines. Implement full suppression strategy using direct and indirect tactics for all inital attack and ongoing fires within the Complex. Provide point protection to homes and other values. Coordinate with County Sheriffs' Departments for recommendations of any future evacuations. Contain the Municipal fire to the North of Upper Fords Creek Road to prevent advancement towards numerous homes and to prevent the compromise of potential evacuation routes. Confine the Fisher fire to the canyons and prevent further spread onto surrounding agricultural lands.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Several residences are located within 1/2 mile of the fire perimeter to the South of Upper Fords Creek Road. Additionally, the town of Orofino is within 1/10th mile of the fire perimeter to the north. On the Fisher fire,

12 hours: scattered homes and improvements exist in close proximity to the fire's perimeter. Additionally, town of Craigmont is located 5 miles south of the Fisher fire. Several areas of cultural resources sacred to the Nez Perce Tribe exist throughout the fire area and special concern is to be given to protect and prevent damage to any

Incident: MUNICIPAL COMPLEX

sites.

The Incident Management Team has identified resources to respond for initial attack to support the local Idaho Department of Lands district and the Clearwater Potlatch Timber Protection Association from both the Municipal and Fisher fires. The Incident Management Team has identified a Suppression repair Group to assess

and implement stabilization and rehabilitation effors.

48 hours:

24 hours:

72 hours: Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

6 TFLD's to manage complexity and supervise resouces to assure adequate supervision to mitigate safety
12 hours: concerns. Currently DIVS are beyond their span of control and have difficulty providing safe and efficient oversight of mutiple resources deployed over large geographical locations.

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Overall strategy is to contain and mopup existing fire perimieters to prevent opportunity for any future advancements.

Management objectives are as follows:

- 1. Protection of human life and safety is the first priority for all actions and may override all incident and strategic operational objectives.
- 2. Keep fires within existing control lines
- 3. Protect waterways and riparian areas
- 4. Provide and conduct Initial Attack (IA) on new fires if requested by the districts or association..
- 5. Provide accurate and timely information to public through media release, public meetings and social media.
- 6. Ensure suppression strategies consider cost containment and most efficient organization to minimize impacts to landowners.
- 7. Implement full suppression strategy using direct and indirect tactics to contain fire. Provide point protection when necessary.

Municipal and Old Greer:

1. Involve Clearwater, Lewis, and Nez Perce County officials in the decision making processes as appropriate to jurisdictions and responsibilities.

Implement full suppression strategy using direct and indirect tactics to protect and prevent further damage to structures.

2. Using the risk management process to identify values at risk and risk mitigation measures to manage risk and exposure to first responders and the public.

Fisher:

- 1. Protect sensitive Nez Perce cultural resources that exist or may be encountered. Sites of concern should be undisturbed and avoided consistent with reporting to tribal agency administrator or resource advisor.
- 2. The Incident Management Team has completed a wildfire protection assessment plan for the Pierce, Idaho area focusing on the lands between the Forest Service Boundary and the town of Pierce. In the event the Motorway Fire approaches the Forest Boundary, the Blue Team will initiate suppression action to stop westward movement of the fire and protect the

Incident: MUNICIPAL COMPLEX

Pierce area structures. This will be done in concert with CPTPA and the IMT that is responsible for the Motorway Fires. Initial coordination meetings have taken place between IMT's and cooperators.

41. Planned Actions for Next Operational Period:

Strengthen control lines where available resources are capable of being productive. Employ extensive mopup to mitigate opportunity for escape. Continue to utilize hose lays along control lines on the Municipal fire to support mopup to areas inaccessible by engines. Continue assessments and planning for suppression repair.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"):
- 43. Anticipated Incident Containment or Completion Date:
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$3,902,628.00
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):

This complex contains the Old Greer, Fisher and Municipal Fires as of 8/24/2015. At the time of report, intial attack resources from the Municipal fire were assisting the Idaho Department of Lands and Clearwater County with a new start in close proximity to the Old Greer fire. The Incident expects to order miscelaneous heavy equipment resources for suppression repair within the next 48 hours. Reduced acreage on the Fisher fire due more accurate mapping.

Incident Name	Suppression Strategy	Size	ММА	Cost to Date
Municipal	Full Suppression	1,770	80 %	\$1,712,800.00
Fisher	Full Suppression	18,889	80 %	\$2,097,828.00
Old Greer	Full Suppression	73	95 %	\$92,000.00
