Date and Time Imagery Received by Interpreter: 09/07/2016 @ 2055 MDT		Type of media for final product: PDF map, zipped shapefiles and KMZ files	
Date and Time Products Delivered to Incident: 09/07/2016 @ 2225 MDT		Digital files sent to: ftp://ftp.nifc.gov/incident_specific_data/n_rockies/2016_fires/2016_Freeman/IR/20160908	
Comments /notes on tonight's mission and this interpretation: Fire is located in the Selway Bitterroot Wilderness. Since the last IR flight on 9/3, the perimeter has grown to the north along Freeman Creek and is 0.3 mile from the confluence of Freeman and East Fork Moose Creeks. An isolated heat source was detected outside of the perimeter 3.5 miles northeast of the fire, approximately 0.5 miles upstream of the confluence of Battle and East Fork Moose Creeks. These points are in the shapefile but not shown on the map.
