Date and Time Products Delivered to Incident: 08/31/2016 @ 0615 MDT		Digital files sent to: ftp://nifc.gov/incident_specific_data/n_rockies/2016_fires/2016_Moose/IR/20160831 askinner@fs.fed.us, idgvc@fs.fed.us	
Comments / notes on tonight's mission and this interpretation: Started with 08/28/2016 IR heat perimeter. <ul style="list-style-type: none"> • The fire had growth almost around the entire perimeter since the last IR on 08/28. • Most of the growth was on the north and northwest side of the fire with scattered heat and some intense heat at the very north part of the fire and the very west side of the fire. There are open pockets in the perimeter I could not fill in probably because those areas have cooled down and are not showing heat on the IR.
