Subject: Initial Attack Frequency Zones naming convention in the Southwest Interagency Coordination Center (SWICC)

Area of Concern: All Aviation Users

ISSUE: It has been brought to our attention that there are errors in the naming convention in the Southwestern Interagency Coordination Center. The specific error is in NM03 Zone (Southwestern New Mexico) with 2 (two) specific frequencies that have tones associated with those frequencies.

The NIICD/CDO has updated the IA/EA Air-to-Ground FM frequency map to version 3 with the new naming convention to reflect the changes (attached). Please ensure that this new information is shared with all parties that utilize the A/G FM frequencies in NM03 zone. The new naming convention is as follows:

A/G46 167.7000 Tone 110.9 TX/RX has changed to **A/G89 167.7000 tone 110.9 TX/RX**

A/G60 169.1250 Tone 110.9 TX/RX has changed to **A/G88 169.1250 Tone 110.9 TX/RX**

CONTACT: Questions or concerns should be forwarded to the NIFC/NIICD/CDO Coordinator Garold (Gary) Stewart at 208-387-5718 or the on Duty CDO at 208-387-5644. The NIFC National Interagency Incident Communications Division (NIICD), Communications Duty Officer (CDO) is the coordination point for all IA/EA Air-to-Ground FM frequencies.
