INTERAGENCY AVIATION MANAGEMENT COUNCIL

To: User of the *Interagency Airspace Coordination Guide*

From: Interagency Aviation Management Council

Date: July 29, 2003

Subject: Publication of 2003 *Interagency Airspace Coordination Guide* (IACG)

The purpose of the IACG is to promote safe, consistent, and standardized approaches to resolving airspace conflicts. Agency personnel will be able to deal with airspace issues using procedures designed to enhance the coordination of agency flights within the National Airspace System.

The Office of Aircraft services and the Forest Service tasked the Interagency Airspace Natural Resource Coordination Group to revise the 1991 IACG.

Subsequent meetings with the Department of Defense, Federal Aviation Administration, DOI Bureaus and the Forest Service led to a complete rewrite of the original Guide. We are confident that the 2003 version provides the necessary changes as identified by field personnel and agency program managers. The IACG is a dynamic document and revisions will be posted as necessary.

All participants in the re-write and review of the IACG are to be commended for their participation.
