PART 2: PUBLICATIONS

(available on line only at www.nwccg.gov)

The National Wildfire Coordinating Group (NWCG) has developed this information for the guidance of its member agencies and is not responsible for the interpretation or use of this information by anyone except its member agencies. The use of trade, firm or corporation names in this publication is for the information and convenience of the reader and does not constitute an endorsement by the NWCG of any product or service to the exclusion of others that may be suitable.

This catalog is an annual publication jointly produced by the National Fire Equipment System (NFES) Committee and the NFES National Interagency Support Caches (NISC). Comments regarding this publication may be directed to any of the Cache Managers or members of the NFES Committee.

Additional copies of this publication (NFES #000362) may be ordered from the USDI BLM Great Basin Cache Supply Office, National Interagency Fire Center, 3833 S. Development Ave., Boise, ID 83705

INTRODUCTION

The National Fire Equipment System (NFES) is part of the National Wildfire Coordinating Group's (NWCG) Fire Equipment Working Team (FEWT). The NFES was created to provide standards for fire supplies and equipment as well as an organized method for ordering and stocking those items. This catalog, national in scope, reflects the items admitted to the NFES and the cache locations where they are stocked.

The NWCG NFES Catalog consists of two parts. This publication contains Part 1: Fire Supplies & Equipment.

Part 2: Publications is available on line only at www.nwcg.gov.

- Part 1 pertains to incident fire supplies and equipment stocked by/ordered from the National Interagency Support Caches (NISC). Ordering from Part 1 is limited to federal and state agencies via the NISC located within their respective geographic areas.
- Part 2 contains the NWCG publications and wildland fire training course materials, which are stocked at/ordered from the Great Basin Cache (GBK), located at the National Interagency Fire Center (NIFC) in Boise, ID. All parties may order from Part 2. **Please refer to the instructions in Part 2 when ordering publications and/or course materials, as they are different than for Part 1.**

All NISCs perform an inventory once a year. The time frame varies among the caches. During inventory, resource orders for active incidents are the only orders processed. Routine orders are not processed during inventory. Call the NISC within your geographic area for specific information.

NFES NUMBER ASSIGNMENTS

The NFES number assignments provide a standard system of identification. **Every item in this catalog is assigned a six digit NFES number which must be included when placing an order.**

FORMAT

For convenience Part 1 of the catalog has been separated into sections as follows:

- ALPHABETICAL INDEX
- NUMERICAL INDEX
- HAZMAT SHIPPING GUIDE
- SUPPLY
- FORMS
- SIGNS
- KITS
- COMMUNICATIONS
- BARCODE - ALPHABETICAL INDEX
- BARCODE - NUMERICAL INDEX

ITEM CATEGORIZATION

Cache Item Categories (i.e., trackable, durable, consumable) are provided in the Detailed Item Description section for return (loss tolerance/use report) and accountability purposes.

1. TRACKABLE ITEMS: Those items that a cache may track due to dollar value, sensitive property classification, limited availability, or other criteria set by each NISC.

Items that are considered trackable are usually engraved or tagged with a cache identification number. All trackable items are also considered durable.

These items must be returned to the NISC at the end of an incident. Appropriate documentation must be provided to the NISC for any losses.

Accountable property reports are included in the communications kits; use as necessary to report lost or damaged equipment.

100% accountability is expected for all trackable items.

2. DURABLE ITEMS: Those cache items considered to have a useful life expectancy greater than one incident.

High percentages of return for these items are expected. These items are not specifically cache identified, tagged or engraved.

Acceptable loss tolerance use rates for the following durable goods have been established:

10% loss tolerance use rate: water handling accessories, helicopter accessories, tents, camp items such as heaters, lights, lanterns, tables, chairs.

20% loss tolerance use rate: hose, tools, backpack pumps, sleeping bags, pads, and cots.

30% loss tolerance use rate: personal protective equipment.

3. CONSUMABLE ITEMS: Those items normally expected to be consumed during an incident.

Consumable items returned in serviceable condition will be credited to the incident.

Examples of consumable items are: batteries, plastic canteens, cubitainers, forms, MREs, fusees, hot food containers, petroleum products, and medical supplies.

ITEM LOCATION IDENTIFIERS

The location identifier (Loc:) shown with each item refers to the NISC(s) that stock the item. Please refer to these identifiers when placing an order. A reference list is provided below.

- NRK = Northern Rockies Area, Missoula, MT
- BFK = Billings, MT
- CDK = Coeur D'Alene, Coeur D'Alene, ID
- RMK = Rocky Mountain Area, Lakewood, CO
- PFK = Southwest Area, Prescott, AZ
- SFK = Southwest Area, Hurley, NM
- LSK = Southern California, Ontario, CA
- NCK = Northern California, Redding, CA
- CA = Both California Caches
- NWK = Northwest Area, Redmond, OR
- LGK = LaGrande, LaGrande, OR
- WFK = Wenatchee, Wenatchee, WA
- SAK = Southern Area, London, KY
- NEK = Eastern Area, Grand Rapids, MN
- GBK = Great Basin Area, Boise, ID
- AKK = Alaska Fire Service, Fairbanks, AK

UNIT OF ISSUE

There is an assigned national standard for the Unit of Issue (U/I) for every item in this catalog that must be used when placing an order.

Many item descriptions have a reference to a Standard Pack (Std Pk) amount. This reference is helpful when ordering large quantities of an item. For example, while the unit of issue for a Pulaski is EA, the standard pack is 10 per box. If the number of Pulaskis required on an incident were 45 it is highly recommended that the quantity requested be 50 EA. The incident would then receive 5 full boxes rather than 4 full boxes with 5 Pulaskis shipped amongst other items in another box.

Incidents that request U/I quantities equal to the "Std Pk" amounts significantly decrease the material handling time at the cache when filling the order as well as during the return and refurbishment process.

NFES CATALOG PART 1 • GENERAL INFORMATION

U/I abbreviations are as follows:

BD	Bundle	CN	Can	LB	Pound	QT	Quart
BE	Bale	CS	Case	LG	Length	RO	Roll
BG	Bag	DZ	Dozen	PD	Pad	RM	Ream
BK	Book	EA	Each	PG	Package	SE	Set
BT	Bottle	GL	Gallon	PL	Pail	SH	Sheet
BX	Box	HK	Hank	PR	Pair	SL	Spool
CL	Coil	KT	Kit	PT	Pint	TU	Tube

NATIONAL STOCK NUMBERS

A National Stock Number (NSN) is provided within the item description for those items purchased from General Services Administration (GSA) or Defense Logistics Agency (DLA).

ITEM PRICING

Prices are adjusted annually according to current costs and will not change unless a significant change in the cost of an item occurs during the year. ***Abbreviations to be aware of when looking at the cost of an item are \$na (cost not available) and \$nc (no charge).***

SUPPLY ORDERS

EMERGENCY ORDERS

Emergency orders for incidents must be submitted on a resource order as defined under the national mobilization plan process. All orders submitted to a NISC must contain the following **required information**:

1. Incident/Project Name **and** Incident Order Number
2. Office Reference Number (Accounting Data including Override Code)
3. Billing (Administrative) Address
4. Contact Name **and** Phone Number
5. Incident Jurisdiction/Agency **and** Ordering Office
6. Quantity **and** Unit of Issue (U/I) for each item
7. NFES Number **and** Brief Description for each item
8. Shipment Delivery Date/Time Needed; Realistic timeframes, ASAP will not be considered a priority
10. Shipping Address; **Do not use P.O. Box**
11. Shipping method; NISCs are able to ship by air or surface transportation; Priority Overnight must be requested specifically on the order; If there is not a physical address associated with the delivery point (e.g., ICP, Helibase, etc.), then driving directions and/or a map may be required

Do not hesitate to ask for shipping recommendations from the NISC to insure orders will be delivered on time to meet incident objectives. The servicing NISC will convey shipping information to the ordering office that will include the incident order number, the (S) numbers for the items shipped, items canceled, substitutions, the estimated or actual time of delivery and the shipping method used. If items are shipped to a destination for pick up by a designated person (i.e., "Hold & Call @ xxx airport"), that person must be provided with enough information to know what to look for, have the assigned tracking numbers and most importantly where to pick up the items.

Emergency resource orders for an active incident are processed as "**Fill or Kill**", meaning that if an item is not available or cannot be substituted, that item and the request number will be canceled. Items will not be back ordered on emergency supply resource orders.

PREPAREDNESS ORDERS

Preparedness (routine) fire supply orders should be directed to the source of supply (i.e., DLA, GSA or private vendors), *not* the NISC.

* There are a few supplies considered *sole-source items* that may be ordered by agencies in very limited circumstances.

* Contact the NISC in your geographic area for specific information regarding preparedness ordering procedures/policies, sole-source availability and/or private vendors.

Each preparedness order creates an account for which the ordering office is responsible for payment. Submission of any order constitutes an agreement that ordering offices will make payment for items ordered as well as the associated shipping charges.

Items returned by the ordering offices will receive credit for the serviceable items only. Many items can be refurbished to serviceable condition and credit will be given when such work has been completed. Refurbishment costs will be charged to the original ordering office.

INCIDENT REPLACEMENT ORDERS

THESE ORDERS ARE TO BE SUBMITTED WITHIN 30 DAYS OF CONTROL OF THE INCIDENT.

Government Property – The incident agency should limit replacement to NFES items that are consumed, lost, damaged or rendered unserviceable on the incident. These items can be replaced at the incident or the incident can approve an *Incident Replacement Requisition*, OF-315 for replacement of items by a cache or at the home unit. Replacement of NFES items not carried by the cache supporting the incident (e.g. Wildland Firefighting Pants, Type II) must be authorized using an *Incident Replacement Requisition*, and the items should be replaced through the DLA wildland fire equipment program.

Caches may only process requests for NFES items. Requests for non-NFES items should be requested on a separate incident replacement requisition to be processed by the home unit.

IMTs or other incident personnel (e.g., IBA) may authorize replacement of non-NFES (non-standard cache) items if delegated authority by the incident agency. If no delegation exists documentation is provided to the incident agency for review and determination. Written documentation is provided to the home unit, if authorized by the incident agency, for the replacement of government property items that have been destroyed or rendered otherwise unserviceable while being used on the incident.

Replacement of non-standard items not procured through mandatory sources of supply may be authorized up to a dollar limit identified through these sources; costs beyond this amount should be covered by home unit program dollars. Prototype equipment will not be replaced with suppression funds. The incident agency may require the damaged property be turned in before replacement is authorized.

Property numbered items must be carefully tracked and property records documented.

For the most up to date information on this process the IIBMH (PMS-902) can be found at:
<http://www.nwccg.gov/pms/pubs/large.html#IIBMH>

OF 315 Form - <http://www.gsa.gov/portal/forms/download/117014>

TYPE 1 and TYPE 2 INCIDENTS:

1. The incident Supply Unit Leader (SPUL) is responsible for handling the incident replacement requisitions when a TYPE 1 or TYPE 2 incident management team is assigned. The SPUL approves replacement requests based on Engine Accountability sheets or other fire equipment inventory documents approved by the requesting agency's home unit.
 - a. If equipment and supplies are available at the incident for replacement, the request is filled by the incident Supply Unit.
 - b. If equipment and supplies are unavailable at the incident, AND the requesting resource is not being immediately demobilized, the Supply Unit will submit a resource order through the appropriate channels to the servicing NISC. The order will be shipped to the incident and replacement will take place at the incident Supply Unit.
 - c. If equipment and supplies are unavailable at the incident for replacement, AND the requesting resource is being demobilized, an OF-315 Incident Replacement Requisition (NFES 001300) is to be completed by the SPUL and forwarded to the servicing NISC.
2. Authorized approvals and signatures **MUST** be included on the requisition. For TYPE 1 and 2 incidents, these approvals are limited to the incident Supply Unit Leader, Logistics Section Chief, Support Branch Director, Incident Commander or Agency Administrator/ Representative.

TYPE 3 and TYPE 4 INCIDENTS:

1. The host Agency Administrator/Representative, i.e. the Fire Management Officer, will be responsible for handling the incident replacement requisitions for these types of incidents. The agency representative approves replacement requests based on Engine Accountability sheets or other fire equipment inventory documents.
 - a. If equipment and supplies are available at the incident for replacement, the request is filled by the incident host unit.
 - b. If equipment and supplies are unavailable at the incident for replacement, AND the requesting resource is not being immediately demobilized, the host agency will submit a resource order through the appropriate channels to the servicing NISC. The order will be shipped to the incident and replacement will take place at the host agency.
 - c. If equipment and supplies are unavailable at the incident, AND the requesting resource is being demobilized, an OF-315 Incident Replacement Requisition (NFES 001300) will be completed by the host agency and forwarded to the servicing NISC.
2. Authorized approvals and signatures **MUST** be included on the requisition. For TYPE 3 and 4 Incidents, the approvals are limited to the Agency Administrator/Representative i.e., the Fire Management Officer.
3. The incident's servicing NISC may forward the requisitions to the requesting unit's NISC for processing. If a NISC is unable to fill a request, they will then forward it on to a NISC that can.

INCIDENT TO INCIDENT TRANSFERS

Transfer of supplies and equipment between incidents is not encouraged, due to the increased possibility of accountability errors.

In instances when it is determined to be economically feasible and operationally advantageous, the SPUL from the incident that is releasing the items must document the following on the *Interagency Incident Waybill* (NFES 001472) and send to the servicing NISC to maintain proper accountability recording:

1. NFES Number
2. Quantity
3. Unit of Issue
4. Item Description
5. Property number, if item is trackable
6. Receiving incident name, number and resource order request number

Hazardous material shipping regulations are to be strictly enforced when transferring hazmat items (see Hazmat Shipping Guide section)

RECEIPT OF ORDERS

All equipment and supplies shipped from NISCs are identified on the cache issue forms. A copy of this form is included in the shipment as a packing list.

Upon delivery, all equipment and supplies become the responsibility of the ordering entity. All applicable Agency Property Regulations as well as all Federal Property Management Regulations will apply upon receipt of said items.

Trackable items will be marked with the issuing NISC's identification. Equipment with small engines will also be marked with the proper gas to oil ratio. Users are required to adhere to this ratio.

Receipt of Defective Items

Call the servicing NISC.

On an incident:

1. Tag any broken or defective item with the problem if known.
2. Take the item to the supply area and let the Supply Unit Leader and/or Ordering Manager follow up by notifying the servicing NISC.
3. A similar process should be followed for items obtained from a local or district cache and followed through by the procurement or operations staff.

The NFES Committee issues NFES Memos regarding fire equipment defects, remedies, and other issues. The memos are posted at http://www.nifc.gov/nicc/logistics/cache_memo.htm

NFES Evaluations

Occasionally equipment items will be shipped with an evaluation. If you should receive this evaluation, please take the time to respond. The NISCs are continually updating items per field requests and evaluations.

The NFES committee and the caches are open to suggestions, complaints and comments regarding the NFES items and the overall effectiveness of the National Fire Equipment System. Do not hesitate to send comments or suggestions to any of the NISC managers or NFES committee members.

INCIDENT RETURNS

Returns to the issuing NISC should be made in the most expeditious manner available based upon cost.

All items must be identified with the returning agency/office, incident name and number to insure credit is applied appropriately per agency regulations. Use of the *Interagency Incident Waybill* (NFES 001472) is strongly encouraged for this purpose.

Consumable items returned in unused condition are credited to the incident, however, **used consumables should not be returned.**

Durable items in usable condition or economically repairable should be returned.

* All hose, both new and used, should be rolled before returning to the cache.

Trackable items must be returned to a NISC at the end of incident use, or documentation must be provided to the NISC as to why it was not returned.

* **Repair tags should be affixed to all power equipment.** If the equipment is not operating in a satisfactory manner, please make note of the possible cause of the problem on the tag.

Communications equipment must be returned to the National Incident Radio Support Cache (NIRSC) at the National Interagency Fire Center as soon as an incident or the requirement has ended.

* Before sealing the kit boxes assure the contents will not be damaged in transit. Damages will be charged to the incident.

* Accountable property reports are included in the communications kits and should be used as necessary to report lost or damaged equipment.

First aid kits and stations: NFES numbers 001617, 001727, 001728, 001760, and 001835 are maintained for all NISCs by the Northern Rockies Cache (NRK) in Missoula, MT.

* Each kit will have the required servicing date indicated on the container.

* After an incident, return the kits to the issuing NISC.

* Medical waste must be transported to a licensed facility for proper disposal. **Do not return medical waste to the NISC.**

Hazardous material shipping regulations are to be strictly enforced when returning hazmat items (see Hazmat Shipping Guide section).

Recycling of plastics, cardboard, etc., is strongly encouraged and is the responsibility of the incident or host agency.

FIRE LOSS TOLERANCE REPORTING

In order to assist managers in keeping incident-related equipment and supply loss to a minimum, Type 1 and 2 incident management teams are required to maintain accountability for these items.

* Guidelines and procedures for this accountability are provided in the Interagency Incident Business Management Handbook, Chapter 30.

To facilitate these procedures and provide oversight, a Fire Loss Tolerance Report is provided pertaining to NFES supply item usage on all Type 1 and 2 incidents, which has been accepted by the NWCG for all wildland fire agencies.

* These reports are compiled by the NISC providing primary support to the particular incident.

* ***Reports are forwarded to the responsible Agency Administrator within 60 days of the close of the incident.***

*The responsible Agency Administrator reviews the report and recommends appropriate follow-up action if losses are excessive. Those actions and recommendations are documented and filed with the final incident records.

The loss tolerance use rate is defined as all property and supplies lost, damaged or consumed on an incident.

* This rate is reported as a percentage of the total dollar amount for items issued compared to the amount for items returned.

* The reasonable anticipated fire loss/use rate is 15 percent for trackable and durable items only. Consumable items are not included in this total.

INTRODUCING NEW NFES ITEMS

Incident management and wildland fire suppression is an evolving technology. Field personnel who would like to suggest new items for the NFES should convey those suggestions to your area NISC manager. The NISC manager will then determine suggestion acceptance based on past and anticipated need, space and storage considerations as well as national applicability.

To initiate consideration of a new item into the NFES please write, fax or e-mail the following information to your servicing NISC Manager:

1. Name and description of item.
2. Use and/or application of the item on an incident.
3. Have you used the item?
4. How did the item perform?
5. Is it better than another item that is currently used?
6. Recommended unit of issue.
7. Recommended standard pack.
8. Estimated cost.
9. Is the proposed item cheaper than something currently used?
10. Is there a dollar benefit in the value of the item and work performance?
11. Is there a safety consideration that makes the proposed item helpful?
12. What is the supply source for the proposed item?
13. Are there many vendors or just one?
14. Name, address and telephone number of known vendor(s).
15. Is the item considered a hazardous material?
16. Add any additional information that would enhance consideration of this item.

Provide your name, address, phone/e-mail in case of further questions and also to advise you of the acceptance or non-acceptance of your suggestion.

DLA & GSA Ordering Info

The Most recent ordering instructions for DLA and GSA can be found at:

<http://www.nwcg.gov/pms/pubs/catalog.htm>

[NWCG Memorandum: M-14-07](#)

The GSA fire program is transitioning to the Defense Logistics Agency.

Federal Agencies are required to order thru DLA E-Mall:

[Instructions on registering on Federal E-Mall \(pdf\)](#)

DLA E-Mall instructions are available on the GSA Wildand Fire Program website:

http://www.gsa.gov/portal/content/104500?utm_source=FAS&utm_medium=print-radio&utm_term=fireprogram&utm_campaign=shortcuts

DLA specialized ordering support instructions are posted to the EMALL (pre-login) landing page. The instructions are posted on the right-hand side of the login page under: “Self Help.”

https://dod.emall.dla.mil/cms/display-content.action?contentPath=/public/Self_Help/Wildland+Fire+Protection+Program+Ordering+Instructions.pdf

State and Local customers will continue to use the traditional GSA ordering mechanism this fire season. The instructions are posted on the GSA website:

http://www.gsa.gov/portal/content/104500?utm_source=FAS&utm_medium=print-radio&utm_term=fireprogram&utm_campaign=shortcuts

NISC HAZARDOUS MATERIAL SHIPPING GUIDE

The hazardous material items listed in this section are stocked by the NISCs.

This information is intended as a convenience to help shippers comply with the limitations and other requirements of various federal and industry regulations.

* If shipped by agency transportation, all Department of Transportation (49 CFR Parts 171-180) regulations apply.

*** Anyone returning or transferring hazardous materials who is not familiar with hazmat shipping requirements should contact the servicing NISC for instructions.**

* Noncompliance may result in civil penalties of up to \$10,000 being assessed to the individual shipping the hazardous materials.

Use of the *OF-316 Interagency Incident Waybill* is encouraged to insure that hazardous materials are listed in the required format.

* The completion of this form is the responsibility of the "Ship From" unit and would be the Supply Unit Leader at an incident.

* Hazardous material must be entered as the first item or highlighted on this form.

The 24-hour **Emergency Response Phone Number 800-424-9300** can be used on all transactions involving NISC shipping and waybill documents. If circumstances necessitate calling this number, the customer identification to use is "National Interagency Support Caches"

49 CFR NON-BULK CHECKLIST

* **Identification** - Proper Shipping Name, Class, UN/NA Number, and Packing Group

* **Packaging** - Will depend on the quantity shipped, single or combination loads

* **Marking** - Proper shipping name, UN/NA number, and the name and address of recipient

* **Labeling** - Primary hazard and placement

* **Shipping papers** - Basic description and the emergency response telephone number

* **Placards**— As necessary

* **Emergency Response Information** - MSDS sheets or DOT Emergency Response Guide

Access to MSDS is available on line at <http://jrm.phys.k-state.edu/Safety/msds.html>

INCIDENT KIT SECTION

The kits shown in this section have been developed with input from field user groups and have been identified as a national standard. This means that the kit is stocked by each NISC and is used on an interagency basis. **When ordering from this section, the unit of issue (U/I) will be KT.**

Contact your servicing NISC with questions, comments or suggestions, including proposals for new kits and/or additions/deletions to existing kits. Requests for new kits and kit changes must be submitted using the Kit Change request form available at <http://www.fs.fed.us/fire/cache/kitchg.html>.

NISCs may update kits on an attrition basis during the year the changes are made. This insures the greatest economy of operations within the national cache system. For this reason, kits ordered from a NISC may or may not contain identical items to those listed during the early part of the fire season. As kits are returned and repacked, they will be packed to the identified standard.

During peak periods of incident support, kits may be shipped with shortages based on availability of components. The packing list enclosed with each kit will reflect applicable changes. Any discrepancies from the packing list upon receipt of a kit should be reported to the servicing NISC.

All kits containing hazardous materials will be appropriately labeled and identified according to 49 CFR Part 172. Hazardous materials may be removed from kits that are shipped by commercial air freight.

Weight and cubic feet information provided with each kit description should be considered an estimated average only.

002069 MOBILE CACHE SUPPORT VAN

\$112,010.39

WT: 21300.00 lbs (9661.51kg) · CU: 2295 ft (699.52m)

Loc: CDK, LGK, NWK, PFK, SFK, WFK

Remarks: PLEASE NOTE THE FOLLOWING INFORMATION. CACHE VANS ARE DESIGNED TO BE USED ON TYPE II OR LARGER INCIDENTS. THE CONTENTS OF THE MOBILE CACHE VAN ARE TO BE UNLOADED AT THE INCIDENT SITE SO THE VAN MAY RETURN TO THE ISSUING NISC FOR RESTOCKING. INCIDENTS SHOULD NOT HOLD THE VAN UNLESS PRIOR ARRANGEMENTS HAVE BEEN MADE WITH THEIR SUPPORTING NISC. THE CONTENTS LISTED BELOW ARE THE ITEMS THAT WILL BE SENT IF A MOBILE CACHE VAN IS ORDERED ACROSS GEOGRAPHICAL AREA BOUNDARIES AND SHOULD BE THE MINIMUM FOR ALL CACHE VANS. IF ADDITIONAL ITEMS ARE NEEDED, A RESOURCE ORDER LISTING ADDITIONAL ITEMS TO BE LOADED INTO THE CACHE VAN IS REQUIRED. EACH CACHE PROVIDING A MOBILE CACHE VAN WITHIN ITS GEOGRAPHICAL AREA WILL SEND ITEMS AND QUANTITIES AGREED UPON BY USERS WITHIN THAT AREA, SO CONTENTS MAY VARY FROM THE LIST BELOW.

008667 **MOBILE CACHE SUPPORT VAN (GBK SPECIFIC)**

\$130,771.99

WT: 10322.00 lbs (4681.98kg)

Loc: GBK

Remarks: PLEASE NOTE THE FOLLOWING INFORMATION. CACHE VANS ARE DESIGNED TO BE USED ON TYPE II OR LARGER INCIDENTS. THE CONTENTS OF THE MOBILE CACHE VAN ARE TO BE UNLOADED AT THE INCIDENT SITE SO THE VAN MAY RETURN TO THE ISSUING NISC FOR RESTOCKING. INCIDENTS SHOULD NOT HOLD THE VAN UNLESS PRIOR ARRANGEMENTS HAVE BEEN MADE WITH THEIR SUPPORTING NISC. THE CONTENTS LISTED BELOW ARE THE ITEMS THAT WILL BE SENT IF A MOBILE CACHE VAN IS ORDERED FROM THIS GEOGRAPHICAL AREA NISC. EACH CACHE PROVIDING A MOBILE CACHE VAN WITHIN ITS GEOGRAPHICAL AREA WILL SEND ITEMS AND QUANTITIES AGREED UPON BY USERS WITHIN THAT AREA. IF ADDITIONAL ITEMS ARE NEEDED, A RESOURCE ORDER LISTING ADDITIONAL ITEMS TO BE LOADED INTO THE CACHE VAN IS REQUIRED.

NIICD CDO: 208-387-5644

NIICD FAX: 208-387-5892

The USDA Forest Service (FS) and the Department of the Interior (DOI) maintain the National Incident Radio Support Cache (NIRSC) at the National Interagency Fire Center (NIFC). The NIRSC is a national interagency resource and is composed of multi-channel radio equipment that is available for all-risk, incident or project communications. Priority for the use of this equipment will be for active fire incidents.

► For assistance with system design, ordering, or equipment installation, call the Communications Duty Officer (CDO) at the National Interagency Incident Communications Division (NIICD). **NIICD CDO available 24 hours a day at 208-387-5644.** NIICD Fax number is 208-387-5892.

► All communications equipment must be ordered through the established mobilization procedures using a resource order as outlined in the National Interagency Mobilization Guide (NFES 002092). The Mobilization Guide is also available on line at <http://www.nifc.gov>

► All communications equipment and accessories are the property of the NIRSC and must be returned for refurbishment as soon as an incident has been demobilized. **Lost or damaged equipment must be properly documented. Lost or stolen radios must be reported immediately to the NIICD Chief Rework/Supply as well as Law Enforcement.** Contact the NIICD Chief Rework/Supply at 208-387-5866 or the NIICD CDO at 208-387-5644.

► All frequencies must be approved for use on all incidents and/or projects. Call the NIICD CDO for frequency authorization. Latitudes and longitudes of the incident must be provided at the time of the order to facilitate frequency planning.

► A NIRSC User's Guide (NFES 000968) can be found in the Command Repeater Kit. Refer to the section on batteries for information on the use of clamshells. The subkits listed define the costs for the different radio brands. The subkit numbers are for accountability purposes only and should not be used when ordering.

PROJECT REQUESTS:

Communications equipment for projects, e.g., Forest Health Protection (FHP), are shared with many users. For that reason, it is requested that required project use time frames be kept to a minimum. The equipment should be expedited back to the NIRSC at NIFC immediately upon completion. **The requestor (project) will pay for the shipping charges to and from NIFC as well as the equipment refurbishment costs.** Refurbishment costs pertain to the replacement of batteries used on the project. There will be no further costs unless the radios are lost, damaged or stolen.

The standard kits available to support projects are NFES #004381, #004312, #004300, and #004330. Other types of equipment may be available if the project should have unusual requirements. All orders for communications equipment must be submitted on a resource order per the established National Interagency Mobilization procedures.

GENERAL INFORMATION REGARDING RADIO BATTERIES:

▶ When ordering batteries, order by the “unit of issue” stated in this catalog, but round-up the order to equal the full STD PK quantity. Refer to the standard pack (STD PK) entry in the Radio Battery Matrix of this section. **The NIRSC does not stock batteries.**

▶ All of the radio batteries utilized by the NIRSC are of alkaline technology. Alkaline batteries normally have a shelf life of at least two years. Newer alkaline batteries now have a shelf life of up to 5 years. **Alkaline batteries are not considered hazardous waste, except in California and should be disposed of at the incident.**

▶ Repeater batteries should last 5 to 7 days under heavy usage. Disposable batteries on a two-watt radio should last a full shift. The clamshell battery life will depend entirely upon the AA cells installed. Fresh, quality AA cells should perform nearly as well as a disposable battery. As per Bendix-King, all NIRSC VHF King DPHx handheld radios must use 9-cell clamshell battery holders (NFES #001034).

▶ Using a voltmeter to determine the state of an alkaline battery can yield very inconsistent results. A battery that no longer works on a repeater and has not had a load placed on it for several days may give a reading of “good” on a voltmeter because the voltmeter does not apply the proper current load.

▶ **Check batteries with the transmitter keyed.** Replace the batteries on the Daniels repeaters if the voltage is at 10.5 volts with the transmitter operating. Starting voltage is about 15 volts when the transmitter is in operation. The transmit LED is the best indicator of battery life on the portable radios. If the light holds bright for 3 seconds while transmitting, the battery should be in good condition.

AIR ATTACK KIT \$27,888.44

NFES 004499

Loc: GBK
WT: 57 lb
CU: 5.1 ft
DIM: 32"x21"x13"

This kit will ONLY be installed in aircraft meeting National Air Tactical/Reconnaissance Standards and passing an avionics inspection by a qualified Forest Service/AMD Avionics Inspector.

The Air Attack Kit is built to supplement communications in contracted fixed-wing aircraft for missions ranging from reconnaissance to complex air attack. This kit can fit between the pilot and co-pilot seats in some aircraft (i.e. Cessna) and slightly behind the front seats in other aircraft. This kit creates an interface between the aircraft's existing audio system /radios and the Air Attack kit radios. All kits have the capability to operate two (2) Technisonic Industries radios. Each kit will have two (2) TDFM-136 radios.

The NFES 004499 Air Attack Kit has a Dual Audio Control (COM/FM1/FM2/AUX1/AUX2/SC) for the pilot and co-pilot/ATGS, connectors for two AUX-FM type portable radio adapters, and two passenger headset adapters. Kit headset jacks are 600 OHM impedance using standard audio and microphone type connectors. The pilot and co-pilot/ATGS utilize case-mounted headsets. Both passengers can operate all radios through the co-pilot/ATGS's transmitter selector. The "SC" position is simulcast transmissions on both COM (aircraft VHF-AM) and FM1. Each kit includes two passenger headset adapters, two PT-300 PTT adapters, two BNC barrel connectors (for AUX-FM antenna connections) and instructions. Two externally mounted VHF-FM antennas are also required.

The NFES 004499 Air Attack AUX-FM portable radio adapter connectors accept the same adapter connections used in all helicopters.

The 004660 Airbase kit is for MAFFS activations and temporary tanker bases. This kit provides a means to communicate with aircraft in noisy environments. It comes with a portable VHF-AM/VHF-FM base station radio, 10 handheld ICOM VHF-AM radios, and eight (8) sets of headsets, helmet adapters, and adapters to connect a headset/helmet to the ICOM radio. The VHF-FM base station can monitor both a main frequency and Air Guard. The base station radio is configured to operate on 115 VAC but, when requested, 12 VDC or 24 VDC power cables can be included for use with a deep cycle automotive/marine battery (Not supplied. Will need to be purchased locally). When additional handheld VHF-AM radios are needed, order the NFES 004240 Airbase Accessories kit.

COMMAND REPEATER KIT
\$18,623.45

NFES 004312

Loc: GBK
 WT: 95 lb
 CU: 3.65 ft
 DIM: 20"x21"x15"

The Command Repeater Kit must be used in conjunction with a Command / Tactical Radio Kit, NFES #004381. This kit is a battery operated portable VHF repeater/UHF link designed for mountainous terrain and/or extended area coverage applicable to incident operational requirements. NIRSC Command Repeater/Links will link to other VHF/UHF Repeaters using the UHF Link Modules included in the NFES 004312 kit.

ALL frequencies must be cleared for use BEFORE shipment is made. Please provide the latitude and longitude when ordering and call the NIICD-CDO at (208) 387-5644 or our Toll Free number (877) 775-3451 for clearance.

All Command Repeater/Links are single channel. If an additional repeater frequency is necessary, a separate Command Repeater/Links must be ordered. Orders will be filled based on priority need. All frequencies must be coordinated to reduce interference problems. All repeater/links are capable of being tone-controlled (RX & TX). A tone-controlled repeater/link will operate as a normal repeater/link (carrier squelch) when not in the tone mode. Call the NIICD CDO for more information on tone-control applications.

The unit can be operated from the supplied alkaline batteries at 15 VDC or from an external 12 VDC power source (i.e. heavy duty car battery, DC power supply, or solar panels). If a 12 VDC power supply is used, it should have a minimum 5 Amp continuous duty capability.

COMMAND/TACTICAL RADIO KIT

NFES 004381

Loc: GBK
 WT: 85 lb
 CU: 3.65 ft
 DIM: 20"x21"x15"

KIT CONTAINS TRACKABLE PROPERTY

This VHF-FM Radio Kit is designed for use in command and tactical operations of an incident. Each kit contains sixteen (16) hand held radios. All radios are configured with tactical, command and National Air frequencies. The radios in each kit are the same manufacturer and model.

Frequency charts are included in the kit, as well as T-cards for radio checkout. Boxes are labeled on the outside to indicate the type of radios contained within, according to the following convention:

4381DA - Datron Guardian 25

4381KD - King DPH

4381RL - Racal

ALL frequencies must be cleared for use BEFORE shipment. Call the NIICD CDO for clearance.

Command/Tac radios are programmed by the NIRSC to be compatible with each system in which they are included. The Racal and Datron have 256 channels. The King DPH has 400 channels. The Racal, Datron, and King DPH can also be operated in digital mode. The King DPH Radios have 25 groups of 16 channels. The Racal and Datron Guardian 25 have 16 groups of 16 channels.

The NIRSC recommends that users limit the number of scanned channels to three (3) and to use the HIGH POWER TX mode sparingly. These options increase the load on the batteries which will rapidly reduce battery life.

1. All clamshells included in the radio kits must be returned.
2. The NIRSC King Radio Kits use 9-cell clamshells only! Do NOT use more than 9 cells!

The Crossband Link Kit is designed to provide support for special operations on an all hazard incident that requires UHF frequency to VHF frequency conversion. This unit is in a Daniels rack with both a UHF transmitter and receiver and a VHF transmitter and receiver and can be programmed with special frequencies. Please contact the NIICD CDO for ordering, design, and frequency coordination. *This unit is not a repeater.*

KIT CONTAINS TRACKABLE PROPERTY

This Daniels kit is a portable, battery operated, all in one, VHF-AM aircraft base station and UHF-FM link. All air- craft kits operate as a base station or as a cross-band link. There are two sets of antennas (VHF-AM and UHF-FM) for use in the link configuration. All kits have four (4) handheld ICOM VHF-AM radios and require a 12 volt DC source. The unit can be operated from the supplied alkaline batteries at 15 volts or from an external 12 volt DC power source such as a heavy duty car battery, DC power supply, or solar panels. If a 12 volt DC power supply is used, it must have a minimum 5 amp continuous duty capability.

Additional ICOM radios may be ordered to supplement this kit. Call the CDO for ordering assistance. ALL frequencies must be cleared by the NIICD CDO or COMC.

KIT CONTAINS TRACKABLE PROPERTY

The Ground VHF-AM Base Station Kit is a portable, 760-channel VHF-AM base station. This kit cannot be linked. Kits are used primarily as a base station to contact aircraft on Forest Health Protection projects, and on incidents. Base stations will transmit 7 watts, are capable of 10 pre-set channels, will scan, and operate using 115 VAC or 12 VDC through an automobile accessory plug-in. Four (4) handheld ICOM VHF-AM radios are included, as well as T-cards for radio check-out. ALL frequencies must be cleared by the NIICD CDO or COMC.

If this kit is to be used as an FAA portable control tower, the resource order MUST be placed by the incident COML for the controller.

If this kit is to be used as an FAA portable control tower, the resource order MUST be placed by the incident COML for the controller.

KIT CONTAINS TRACKABLE PROPERTY

Contains 16 UHF radios for use by incident support personnel (i.e. Plans, Logistics, and Finance). The radios can operate independently or in conjunction with UHF Repeater Kit NFES 004248.

The radios are programmed with NIRSC UHF Frequencies, including all simplex and repeater pair frequencies. Frequency charts are included in the kit, as well as T-cards for radio checkout. Boxes are labeled on the outside to indicate the type of radios contained within, according to the following convention:

- 4244MD - Midland
- 4244X2 - Motorola XTS2500

ALL frequencies must be cleared for use BEFORE shipment. Call the NIICD CDO for clearance.

The Logistics Repeater Kit must be used in conjunction with the Logistics Radio Kit, NFES #004244. This is a battery operated portable repeater designed for mountainous terrain and/or extended area coverage. This kit is used for fire logistics functions which include ICP to Dispatch Center, staging area to ICP, Helibase to ICP, Helispots to ICP, Ground Support Units as well as for outlying service functions to Communications Units. Non fire related incidents may be able to utilize this kit in command/tactical situations. Resource orders must indicate what frequency will be required, e.g. L1, L2, etc. ALL frequencies must be cleared for use by the NIICD CDO and the COMC.

**PUBLIC ADDRESS KIT (AMPLIVOX)
\$2,020.17**

NFES 004410

Loc: GBK
WT: 60 lb
CU: 3.65 ft
DIM: 20"x21"x15"

This kit is primarily used at the ICP or in staging areas that house large numbers of personnel. It allows for the broadcasting of information or paging from a central point. The Public Address Kit consists of (1) model SW615A (PRIMARY) wireless powered speaker with internal 16 channel UHF Wireless Receiver, (1) model S1244-70 (SECONDARY) wireless powered speaker with external VHF Transmitter, and tools and accessories necessary for installation.

NFES	QTY	DESCRIPTION
000033	48 EA	BATTERY, D
001241	4 EA	BATTERY, 9 VOLT
004170	1 EA	TRANSMITTER, WIRELESS (S1600T)
004176	1 EA	CABLE, PA 40 FT (C200-0025)
004177	2 EA	AC ADAPTER (S1460)

REMOTE KIT

NFES 004330

Loc: GBK

TOTAL 2 PIECES: WT: 103 lb
CU: 4.5 ft

Piece 1/BOX:	Piece 2/MAST:
WT: 95 lb	WT: 8 lb
CU: 3.65 ft	CU: 1.0 ft
DIM: 20"x21"x15"	DIM: 60"x3"x3"

The Remote Kit can be used with VHF-FM (tactical) and UHF-FM (logistics) radios. Use of this kit, in conjunction with NIRSC radios allows a remote base station to be installed up to a half mile away from the ICP, camps, helibase, etc..

The radio, chassis and battery are enclosed in a steel box which is removable from the shipping container. This allows for placement of the box at the base of the antenna while running only a wire pair to the desk set location. VHF and UHF Radios are included in the chassis box, eliminating the need for multiple interface cables. This kit will contain either King or Motorola XTS 2500/5000 radios.

ALL frequencies must be cleared by NIICD CDO or COMC.

SOLAR PANEL KIT (FLEXIBLE)
\$ 895.07

NFES 004080

LOC: GBK
 WT: 50 LB
 CU: 1.7
 DIM: 23"x14"x9"

The kit contains a 60 Watt flexible solar panel, and a 12 Volt 35 Amp-hr sealed lead acid battery. The system should be able to power a repeater indefinitely provided the solar panel is illuminated with full sun most of the day. In the event there is no sun, the battery will give approximately 2 days backup power (for a repeater under moderate use). For greater energy reserves, an additional battery can be purchased at the incident and connected to the system (a cable is included in the kit for doing this). The backup battery must be a deep cycle 12V sealed lead acid (preferably gell cell or AGM) of the largest capacity that can be safely maneuvered (batteries are heavy!!). A fully charged 12 Volt 75 Amp-Hr battery should last at least 4 days and weighs 50lbs. Do not transport a sealed lead acid battery unless it is strapped down and unable to move and the terminals are covered to prevent a short circuit.

**STARTER SYSTEM
ICS COMMAND/LOGISTICS RADIO KITS**

NFES 004390

Loc: GBK

TOTAL 17 PIECES: WT: 885 lb

CU: 38.67 ft

10 BOXES:

WT: 829 lb

CU: 36.50 ft

DIM: 9 BX @ 20"x21"x15"

1 BX @ 20"x17"x8"

7 SETS OF MASTS:

WT: 56 lb

CU: 2.17 ft

DIM: 7 ST @ 60"x3"x3"

KIT CONTAINS TRACKABLE PROPERTY

The Starter System is designed to be the initial system to support basic incident communication requirements. The system supplies equipment which will facilitate immediate communications for command, tactical, logistical and ground-to-air needs.

The Starter System consists of:

- 1 Command Repeater, NFES 004312 (specify frequency)
- 3 Command/Tactical Radio Kits, NFES 004381 (48 radios total)
- 1 Ground Aircraft Radio/Link Kit with 4 ICOM radios, NFES 004370 (2 Boxes)
- 2 Remote Kits, NFES 004330
- 1 Logistics Repeater, NFES 004248 (specify frequency)
- 1 Logistics Radio Kit, NFES 004244 (16 radios)

Logistics capability is sent with all Starter Systems, e.g., Logistics Repeater, Logistics Radio Kit. The Command Repeater Kit is marked appropriately on the outside with the frequencies C1, C2, C3, C4, C5, and C6, and includes the NIRSC User's Guide (NFES 000968). ALL frequencies MUST be assigned and cleared by the NIICD CDO prior to shipment. For multi-branch or multi-incident complexes, where several ICS Starter Systems are being ordered, the NIICD COD or, if assigned, the Communications Coordinator (COMC) must be contacted for ordering, system planning and frequency coordination assistance. For single incident situations the NIICD CDO must be contacted.

The cost for this system is approximately \$150,000.00 but will vary according to the kits and subkits that are actually sent.
