Sunday September 17, 2017

0700-2000 Day

P1K5ZH (0116) MT-767004

Northern Rockies
NATIONAL

Demobilization Policy

This policy addresses driving by personnel actively engaged in wildland fire suppression or all-risk activities; these include driving while assigned to a specific incident (check-in to check-out) or during initial attack fire response (includes time required to control the fire, travel to a rest location, and travel to home unit).

- Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty day.
- No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift. Exception to the minimum off-duty hour requirement is allowed when essential to:
 - Accomplish immediate and critical suppression objectives.
 - Address immediate and critical firefighter or public safety issues.
- As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

DRIVE RESPONSIBLY AND SAFELY

INCIDENT OBJECTIVES	1. Incident Name Lolo Peak Fire	2. Date Sept 16, 2017	3. Time 2000			
4. Operational Period: 09/17/17 0700-2000 Day						
<p>5. General Control Objectives for the Incident (include alternatives) <u>Commander's Intent</u> PURPOSE: To manage risk in all incident actions. TASK: Ensure that all incident actions reflect a commitment to aviation, responder, and public safety through using the risk management process outlined in the IRPG, adherence to the 10 standard firefighting orders, mitigation of the 18 situations that shout watch out and LCES. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action until such time as the risk can be satisfactorily mitigated before re-engaging. Ensure that Leader's Intent is clearly communicated and understood. OUTCOME: Neither responders nor publics have been seriously injured or killed.</p>						
<p><u>Operational Objectives</u> Implementation of the following operational objectives is to be applied and accomplished only through managing risk to best assure firefighter safety.</p> <ol style="list-style-type: none"> 1. Provide Point/Zone Protection minimizing fire impacts to: <ol style="list-style-type: none"> a. Social/economic values including traffic flow on Highways 12 and 93, defensible structures, hard-asset infrastructure such as power lines, communication sites, and irrigation equipment. b. Public recreation sites as well as private undeveloped lands. 2. Provide Initial Attack on DNRC protected lands under the established TFR. On the Lolo, Bitterroot and Nez Perce-Clearwater National Forests, coordinate support to forest IA response within the TFR. Outside the TFR, provide support as requested based upon resource availability and fire activity. 3. Engage in Suppression Repair work where fire conditions will allow it. Follow the Suppression Repair Plan guidelines and specifications. Consult READS when and where needed. 						
<p><u>Management Objectives</u></p> <ol style="list-style-type: none"> 1. Provide timely and accurate dissemination of information to residents of Missoula and Ravali Counties, county governments, Lolo, Bitterroot and Nez Perce-Clearwater National Forests, MT DNRC, Nez Perce and Confederated Salish and Kootenai Tribes. Keep these entities informed of management goals, objectives, and successes on the incident. 2. Protect declared/proposed Wilderness, Research Natural Area, waterways and riparian areas from incident management impacts. Operations personnel should coordinate with appropriate READ(s) to document; and, if necessary, coordinate mitigation measures related to watershed impacts, sensitive species, cultural sites, and minimize introduction and spread of noxious/exotic weeds and aquatic species. 						
<p><u>Additional Commander's Intent</u> PURPOSE: To assure incident management activities are aligned with the overall goals of the requesting and cooperating agencies. TASK: Communicate, Coordinate and Cooperate incident management activities with Missoula and Ravali Counties, county governments, Lolo & Bitterroot National Forests, MT DNRC, Nez Perce and Confederated Salish and Kootenai Tribes entities; activities include but are not limited to suppression actions, support needs, and rehabilitation. OUTCOME: The incident is resolved to the satisfaction of requesting and cooperating agencies. PURPOSE: To create an environment that is based on solid relationships and is conducive to efficient accomplishments. TASK: Treat all Incident Management personnel, cooperators, contractors and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, discrimination, alcohol, or illegal drug use. OUTCOME: All people associated with the incident felt valued and could contribute to a positive outcome in the management of the incident. PURPOSE: To ensure that suppression impacts to natural and cultural resources are kept to a minimum. TASK: Coordinate closely with resource advisors (READs) on all operation activities. OUTCOME: Resource values have received minimal detrimental impacts.</p>

INCIDENT Weather Forecast

FORECAST NO: 67
SHIFT DATE: Sunday, September 17, 2017
TIME/ DATE
FORECAST ISSUED: 2000 Saturday, September 16, 2017

NAME OF FIRE: Lolo Peak
SIGNED:
Makoto Moore - Incident Meteorologist
(208) 577-1618

DISCUSSION:

Look for variable mid and high level cloudiness to stream in across the area today. Southwest winds across the higher elevations will be on the increase as well, ahead of the next incoming weather system. Today will be the last day of dry and warmer conditions, as unsettled weather is forecast to last through the week and into next weekend.

WEATHER FORECAST: SUNDAY

WEATHER: Mostly cloudy.
MAX TEMPERATURES: Ridges: 54-59F Valleys: 60-68F
MIN HUMIDITY: Ridges: 29-35% Valleys: 22-28%
20 FT WINDS: Ridges: SW 7-10 mph, with gusts to 20 mph after 1200
Valleys: S-SW 4-8 mph

HAINES INDEX: 3 (Very low) **CWR:** 0% **LAL:** 1.
INVERSION: Weak inversion to 2000 ft AGL, breaking between 1100 and 1300.

WEATHER FORECAST: SUNDAY NIGHT

WEATHER: Mostly cloudy.
MIN TEMPERATURES: Ridges: 30-35 F Valleys: 36-41 F
HUMIDITY: Ridges: 65-75% Valleys: 75-85%
20 FT WINDS: Ridges: SW 5-10 mph
Valleys: Downslope/downvalley 3-7 mph.

CWR: 0% **LAL:** 1.

EXTENDED FORECAST: MONDAY-WEDNESDAY

MONDAY: Cloudy with a chance of rain, becoming likely in the afternoon. Max Temp/Min RH: 45-55 F/40-50%. Min Temp/Max RH: 30-40 F/80-90%. Southwest winds 8-12 mph, gusting to 20 mph at times and becoming northwest in the afternoon.
TUESDAY and WEDNESDAY: Cloudy with rain and snow likely. Max Temp/Min RH: 35-45 F/65-75%. Min Temp/Max RH: 28-38 F/85-95%. West-southwest winds 7-10 mph.

OBSERVATIONS (Saturday afternoon):

IRAWS24 (Beaver Ridge-Div A): Max: 40; Min RH: 64%; Wind: W 4-9 mph
IRAWS22 (West Butte-Div B): Max: 43; Min RH: 80%; Wind: E 4-8 mph
IRAWS39 (Morman Peak-Div E): Max: 46; Min RH: 63%; Wind: ESE 4-10 mph
IRAWS48 (Saint Mary-Div L): Max: 51; Min RH: 49%; Wind: SE 5-10

Sunrise: 718 am **Sunset:** 743 pm

Observations

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #58	TYPE OF FIRE: Wildfire
FIRE NAME: Lolo Peak	OPERATIONAL PERIOD: 9/17/2017 Shift: Day
DATE ISSUED: 09/16/2017	TIME ISSUED: 2030
UNT: Lolo National Forest (includes areas within Bitterroot NF and Nez Perce-Clearwater NF)	Signed: Warren Appelhans FBAN 

WEATHER: Warmer and dry conditions today before unsettled weather next week. Weak inversion to 2000 AGL.

See INCIDENT Weather Forecast in this IAP!!!

General Fire Behavior Forecast: Fire activity will pick up throughout the day as temperatures warm and RH's drop. In areas that have heavy canopy cover the fire will continue to creep and smolder. Flame lengths less than 1 foot. Where the canopy is open stumps and down logs will continue to smolder and as the day warms you will see more open flames. The unburned islands will continue to burnout with single tree torching. The edge of the burn will continue to smolder and retain heat in the areas of heavy duff some areas will see surface fire.

Specific Fire Behavior:

Division Alpha and Bravo– Expect creeping and smoldering fire. There is a considerable amount of unburned interior pockets. Expect mostly smoldering and creeping fire behavior and an occasional tree torching.

Divisions Juliet and Lima – Expect backing and creeping surface fire. There is a considerable amount of interior fire edge in the upper portions of Sweeney and Larry Creeks. Late in the day you can expect to see some torching higher on the slopes.

Structure Groups/Initial Attack – See Division Juliet and Lima above....otherwise, minimal fire behavior with isolated stump holes and down logs burning.

PIG: 35 to 40%

AIR OPERATIONS: Inversion to lift between 1100 and 1300.

FIRE BEHAVIOR SAFETY: Watch out for rollout on steep slopes

SAFETY MESSAGE

Day Shift

Monday September 17, 2017

Lolo Peak Fire

With the onset of the weather shift we need to talk and refresh about hypothermia. Hypothermia is a drop of core body temperature below normal. It doesn't require cold near freezing temperatures. In fact it can occur in mild temperatures with a slight breeze and cool, moist conditions. Dehydration can accentuate risk of hyperthermia. People tend to drink less on cool days and can get hypothermic even with temps well above freezing.

Symptoms include: slurred speech, weakness and loss of coordination, confusion, irrational behavior, uncontrollable shivering, pale-cold skin, drowsiness and slowed breathing or heart rate.

Countermeasures are: guard against dehydration, avoid fatigue, avoid cold winds (dress appropriately or shelter up), Keep dry, and be aware of the symptoms.

If you recognize hypothermia take the following steps:

- Move the patient to shelter
- Remove wet clothes and replace with warm, dry garments,
- If alert, give the victim food and warm liquids.

So familiarize yourself with these tips. Be observant, considerate and watch out for one another.

Incident Safety Officers:

Dan LeCrone

Stan Lovan

6. Control Operations/Work Assignments:						
<p>Task: Use crews and engines for direct line construction to secure fire perimeter. Continue to remove hoselays, pumps, and tanks on the division that are not needed. Secure fire edge from burn block 3 to the west along Larry's Creek.</p> <p>Purpose: Protect structures and values at risk by limiting or preventing fire spread east of the primary control line. Minimize impacts to Highway 93.</p> <p>End State: Line was scouted, prepped, burned, held, and repaired with minimal impacts to communities. National forest and undeveloped private lands were burned with low to mixed severity. Road closures in the HWY 93 corridor were minimized.</p>						
7. Special Instructions:						
<p>* On loan, must be ready to respond to IA when called. Monitor fire weather and fire behavior. Know vehicle weight and observe posted bridge limits. To stop traffic on Highway 93, DIVS should contact Operations. Operations will contact LOFR to shut down highway in affected area.</p>

HUMAN RESOURCE MESSAGE

There is zero tolerance for drugs and alcohol on this fire incident.

Life is a fight and in that fight it doesn't matter how hard you hit or how well you fight, what matters is how hard you can get hit and keep on fighting.

Debby Hassel, HRSP (406) 274-7985

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report.

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha, Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.
