**INCIDENT OBJECTIVES (ICS 202)**

<b>Incident Name:</b>	<b>Operational Period:</b>	<b>Day / Night</b>			
West Fork and Moose Peak Fires	Date: 09/16-17/17	Time: 0700 - 0700			
<b>Objectives:</b>					
<p>Public and firefighter safety is always recognized as the first priority for all fire management activities. The Ten Standard Fire Orders and the Eighteen Watch-Out Situations will be continually evaluated and mitigated before any action is undertaken. Aggressive initial attack will be provided with the safety of firefighters and the public being the primary concern. Maintain and enhance relationships with all cooperators, stakeholders, and private landowners.</p>					
<b>West Fork Objectives</b>					
<p>Protect private property, infrastructure, and corporate lands within close proximity to the fire area to avoid property damage and/or loss of timber values.</p> <p>Use a combination of aerial and ground resources and natural barriers to keep the fire north of the Kootenai River and west of the 508 Road in order to reduce threats to Libby and outlying areas.</p> <p>Protect critical infrastructure including, but not limited to bridges, Turner Mt. Ski Area, Loon Lake / Timber Lane Campgrounds, and area trailheads to avoid loss or damage to these values.</p> <p>Protect Bull trout habitat by following fire retardant avoidance guidelines and reducing fire intensity within drainages to avoid shade reduction that can lead to water temperature increases.</p> <p>Interagency coordination and cooperation will continue to evaluate and manage risks associated with the Rainy Creek area and Libby amphibole asbestos exposure.</p>					
<b>Moose Peak Objectives</b>					
<p>Identify strategies that support tactical options that balance safety with the highest probability of success to reduce the risk of fire spreading into the urban interface. Consider initiating Point/Zone protection actions if the fire spreads east towards the urban interface to minimize loss from fire damage.</p> <p>Suppression strategies and tactics should consider expected weather, natural fuel breaks, fire behavior, and the ability to extract personnel in the event of an injury, as well as zone and point protection tactics.</p> <p>Provide protection to threatened private and public values including:</p> <ul style="list-style-type: none"> <li>•Private lands and residences</li> <li>•Commercial timber fiber production lands</li> <li>•Cultural and historic sites</li> <li>•Recreation infrastructure</li> <li>•Roadway infrastructure</li> <li>•Threatened and endangered species habitat</li> </ul>					
<b>Operational Period Command Emphasis:</b>					
<p>Leader's Intent: Mutual Respect</p>

## Incident Weather Forecast

**INCIDENT:** West Fork/Moose Peak Wildfire

**PREPARED BY:** Darren Clabo IMET

**FORECAST:** #12

**VALID:** 16 September 2017 Day Operational Period

**DATE/TIME ISSUED:** Friday 15 September 2017 1928 MDT

### WEATHER DISCUSSION:

Mostly sunny skies are expected today as a weak upper level ridge moves across the region. High temperatures will be in the upper 50s to lower 60s while minimum humidity drops back below 30%. Light east winds this morning will transition to the south/southwest from 3-5 mph during the afternoon. A moderate morning inversion is in place and likely won't mix out until 1400 hrs. After that time, expect better visibility and at least a partial clearing of the low-lying smoke.

### WEATHER FORECAST:

#### Saturday

**Sky Weather:** Mostly sunny.

**Temperature:** Ridge: Max 58 F  
Valley: Max 65 F

**Humidity:** Ridge: Min 30%  
Valley: Min 25%

**20 ft Winds:** Ridge: E becoming  
SSW @ 3-5 mph

Valley: Upslope/upvalley

**Transport Wind:** S @ 10 mph

**Haines:** 3

**CWR:** 0% **LAL:** 1

**Mixing Height:** Increasing to  
4,000 ft AGL.

**Inversion:** A moderate inversion  
will mix out by 1400 hrs.

#### Saturday Night

**Sky Weather:** Partly cloudy.

**Temperature:** Ridge: Min 35 F  
Valley: Min 28 F

**Humidity:** Ridge: Max 60%  
Valley: Max 80%

**20 ft Winds:** Ridge: S @ 2-4 mph  
Valley: Downslope/downvalley

**Transport Wind:** SW @ 5 mph

**CWR:** 0% **LAL:** 1

**Inversion:** Moderate thermal belt  
expected mid-slope.

#### Sunday

**Sky Weather:** Increasing clouds.

**Temperature:** Ridge: Max 60 F  
Valley: Max 68 F

**Humidity:** Ridge: Min 30%  
Valley: Min 25%

**20 ft Winds:** Ridge: SW @ 5-10  
mph

Valley: Upslope/upvalley

**Transport Wind:** SW @ 15 mph

**Haines:** 3

**CWR:** 0% **LAL:** 1

**Mixing Height:** Increasing to  
4,000 ft AGL.

**Inversion:** A weak inversion will  
mix out by 1300 hrs.

### EXTENDED FORECAST:

Widespread showers are expected Monday – Wednesday as an upper level storm system stalls across the region. Daytime temperatures will cool into the 50s while minimum RHs are expected to stay above 30%. Light south to southwest winds will continue through the period. Excellent humidity recovery is expected at night with low temperatures hovering near the freezing mark.

### SAFETY:

Much cooler overnight temperatures are expected and lows may drop below 32 F. Stay warm out there.

Darren Clabo IMET

15 September 2017

Date

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> #12	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> West Fork/Moose Peak	<b>OPERATIONAL PERIOD:</b> 16 September 2017 Day
<b>DATE ISSUED:</b> Friday, 15 September 2017	<b>TIME ISSUED:</b> 1730
<b>UNIT:</b> MT-KNF-000222 MT-KNF-000225	<b>SIGNED:</b> <u>Ben Pratt</u> <b>Typed/printed:</b> Ben Pratt FBAN t

### INPUTS

**WEATHER SUMMARY:**

Mostly Sunny.  
Maximum Temperatures: 58F on ridges, 65F in valleys.  
Minimum RH's: 30% on ridges, 25% in valleys.  
Ridgetop Winds: E becoming SSW @ 3-5 mph. Upslope/upvalley.

### OUTPUTS

**FIRE BEHAVIOR****GENERAL**

Expect moderate fire behavior today on both the West Fork and The Moose Peak. Cold overnight temperatures and good humidity recovery will minimize spread before 1400. General fire behavior will include smoldering, creeping, surface fire and single tree torching. Slopes and jackpots of fuel may produce group torching. Probability of ignition will be around 50%.

**SPECIFIC:****West Fork Fire:**

In Divs A fire will back and creep as it fills in between Bobtail Ridge and the 600 road. Single and group torching will be limited to jackpots of fuel. Expect snags and rollout to keep coming down along the 600 road.

In Divs M expect mostly surface fire with single and group torching around fuel jackpots. Drought conditions will accentuate root burnout resulting in falling snags.

In Divs F the fire will mostly back and creep. Single and group tree torching is possible where fuel jackpots or terrain allows. Root burnout will continue resulting in falling snags. The spot NE of Pipe Creek will continue to slowly creep through surface fuels.

**Moose Peak Fire:**

In Division N The N side of the fire will back and creep with single and group tree torching around fuel jackpots. Activity around the south and west end of the fire will be influenced by terrain and range from creeping surface fire to occasional group torching.

In Divs T expect backing and creeping in sheltered areas. Terrain in alignment with winds may produce single and group tree torching.

In Divs Z surface fire and occasional single and group torching will continue as it munches south.

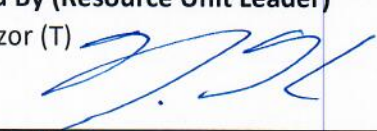

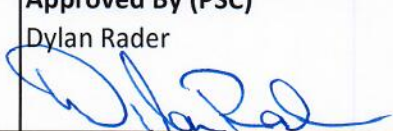

**AIR OPERATIONS:**

Visibility will likely be limited until early afternoon.

### SAFETY

Identify safety zones and make sure they are known,

<b>Control Operations / Work Assignments:</b>						
TASK: Construct indirect fireline.						
PURPOSE: Keep fire from impacting values at risk.						
END STATE: Fireline in the correct location with the right dimensions to contain the fire.						
TASK: Scout potential fireline locations.						
PURPOSE: Identify appropriate line for control operations.						
END STATE: Fireline in the correct location with the right dimensions to contain the fire.						
TASK: Burnout fireline.						
PURPOSE: Establish hard black inside indirect line.						
END STATE: Fireline burned with the correct intensity and minimized threat to the fireline.						
<b>Special Instructions:</b>						
IA response will be identified by Field Operations.						
Stimson Logging will be working in Div. F from 2100 - 1000.						
Utilize pilot cars for log hauling operations on Pipe Creek Road as necessary.						
Weed washing required when moving between Branches.

<b>Incident Name:</b>		<b>Branch:</b>		<b>Division:</b>		
West Fork and Moose Peak Fires		I		M		
<b>Operational Period:</b>	<b>Day</b>					
<b>Date:</b> 9/16/2017	<b>Time:</b> 0700 - 1900					
<b>Operations Personnel</b>						
Field Operations	Travis Lipp	Branch Director		Clark Hammond		
Planning Operations	Colby Crawford / Joe Sean Kennedy (T)	Division/Group Supervisor		Shay Rogge / Jared Gilmore (T)		
Safety Officer	Brian Ayers / Duffy Dufresne	Air Attack Supervisor		Gordon Grosslight		
<b>Control Operations / Work Assignments:</b>						
TASK: Construct direct and indirect fireline.						
PURPOSE: Keep fire from impacting values at risk.						
END STATE: Fireline in the correct location with the right dimensions to contain the fire.						
TASK: Burnout fireline from DP 5 to F/M break.						
PURPOSE: Establish hard black inside indirect line.						
END STATE: Fireline burned with the correct intensity and minimized threat to the fireline.						
<b>Special Instructions:</b>						
IA response will be identified by Field Operations.						
Evacuation notifications made - notify homeowners who refuse to leave prior to conducting burnout operations.						
Weed washing required when moving between Branches.

# AIR OPERATIONS SUMMARY

Prepared By: Warren Giacomini

Prepared Date/Time: 9/15/2017 1900

1. INCIDENT NAME: West Fork and Moose Creek Fire		2. OPERATIONAL PERIOD DATE: 9/16/2017		START TIME: 800	END TIME: 2000	SUNRISE: 720	SUNSET: 1954
3. REMARKS (Safety Notes, Hazards etc.) Maintain awareness of local conditions, specifically, smoke creating visibility issues and local winds influenced by terrain. <b>Tactical flight operations will cease at sunset; the 30 minutes past sunset can be used to ferry back to the base.</b> Environmental Bucket Wash-out with Hotsy, located at helibase, required for (1) Any aircraft arriving from East side of Continental Divide (2) Utilizing Cabinet Gorge, Savage Lakes or Noxin Reservoir. Current air operations are being run out of Libby Helibase on a lease loan basis. <b>All requests for aircraft must go through Kootenai Dispatch, who will then provide the appropriate kneeboard for designated aircraft.</b> MT DNRC aircraft may be available for use out of Kalispell City, S27 or Bend Helispot, on State owned/protected sections of the Moose Peak Fire. Call Kootenai Dispatch for requested aircraft. DNRC main State Repeater: Tx 159.4050 Rx 151.2650 tone 114.8 Tx ONLY Call Mtn Repeater		4. READY ALERT AIRCRAFT <b>Incident Medevac Resources:</b> TBD Litter Kit at Libby HB for 357TA <b>External Medevac Resources:</b> <b>SHORTHAUL Order via Kootenai A/C Desk.</b> ** Hoist/NVG: Two Bear Air Civilian All medivacs will be coordinated through West Fork/Moose Peak Communications and MEDL. ASGS to notify helibase of possible helicopter use. <b>Ensure Kootenai A/C desk is notified if helicopter dispatched to medevac.</b>		5. **Controlled Unclassified Information // Basic**

# HEALTH AND SAFETY MESSAGE

**SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: **West Fork and Moose Peak Fires**

DATE: **09-16-2017**

## Major Hazards and Risks:

**Driving:** Steep, narrow mountainous roads with blind curves and falling/rolling fire debris. Smoky and dusty conditions add to the limited visibility and speeds must be kept at a minimum. **Drive defensively!!**

**Snags & falling fire damaged green trees:** This is still one of the biggest hazards out there. Look up, look down, and look around. Falling fire debris rarely gives us a second chance.

**Heavy Equipment:** Pay attention. Make eye contact with operator prior to approaching. Follow road guard instructions.

**Weather:** It is getting cooler and rain is predicted in the next few days. Dress appropriately.

Fire Order of the Day – Determine safety zones and escape routes – make them known

**Narrative.** Firefighters are being looked up to for their dedication and hard work. Don't drive or behave in such a way to turn the public's attitude against us, or even worse, to cause a serious accident. Our policy is to drive slowly, courteously, **and with lights on**. Pack-it-in/Pack-it-out must be adhered to with food and trash to avoid encounters with bears. Rotate crews as needed if smoke conditions remain heavy throughout the day. Wash your hands frequently, it is the best way to avoid getting sick or infecting others. Plenty of fluids and frequent rest breaks are necessary.

**Ensure LCES is in place prior to engaging in operations!**

## Watch Out Situation of the Day

16. GETTING FREQUENT SPOT FIRES ACROSS LINE

## Escape Route/Safety Zone Checklist

### Escape Routes:

- \*More than one escape route
- \*Scouted – soils, vegetation, slope
- \*Timed – slowest person, fatigue, dozer speed
- \*Marked – flagged for day and night use

### Safety Zones:

- \*Survivable without a shelter
- \*Natural – clean burn, water, bare soil/rock
- \*Manmade – constructed sites, roads
- \*Scouted for size and hazards
- \*Close enough considering escape time needed

### Remember and Follow:

- \*The 10 Standard Fire Orders
- \*The 18 Situations That Shout Watch Out
- \*The Common Denominators of Fire Behavior on Tragedy Fires
- \*The Downhill Line Construction Guidelines

Incident Safety Officers: Brian Ayers, Duffy Dufresne, Mark Haines, Greg Toll, Randy Miller, Don Mapstone, Tim Macy

# MEDICAL PLAN - Medical Incident Report (ICS 206 WF)

Medical Incident Report					
<b>FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</b>					
<b>Use items one through nine to communicate situation to communications/dispatch.</b>					
<b>1. CONTACT COMMUNICATIONS/DISPATCH</b> <i>Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)</i>					
<b>2. INCIDENT STATUS: Provide incident summary and command structure.</b>					
Nature of Injury/Illness			<i>Describe the injury (Ex: Broken leg with bleeding)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
Incident Commander			<i>Name of IC</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
<b>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.</b>					
Number of Patients:	Male / Female	Age:	Weight:		
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Mechanism of Injury: <i>What caused the injury?</i>					
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>					
<b>4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY</b>					
<b>SEVERITY</b>			<b>TRANSPORT PRIORITY</b>		
<input type="checkbox"/> <b>URGENT-RED</b> Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>			Ambulance or MEDEVAC helicopter. Evacuation need is <b>IMMEDIATE</b> .		
<input type="checkbox"/> <b>PRIORITY-YELLOW</b> Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>			Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED</b> .		
<input type="checkbox"/> <b>ROUTINE-GREEN</b> Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>			Non-Emergency. Evacuation considered <b>Routine of Convenience</b> .		
<b>5. TRANSPORT PLAN:</b>					
<b>Air Transport: (Agency Aircraft Preferred)</b>					
<input type="checkbox"/> Helispot		<input type="checkbox"/> Short-haul/Hoist		<input type="checkbox"/> Life Flight	
				<input type="checkbox"/> Other	
<b>Ground Transport:</b>					
<input type="checkbox"/> Self-Extract		<input type="checkbox"/> Carry-Out		<input type="checkbox"/> Ambulance	
				<input type="checkbox"/> Other	
<b>6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:</b>					
<input type="checkbox"/> Paramedic/EMT(s)		<input type="checkbox"/> Crew(s)		<input type="checkbox"/> SKED/Backboard/C-Collar	
<input type="checkbox"/> Burn Sheet(s)		<input type="checkbox"/> Oxygen		<input type="checkbox"/> Trauma Bag	
<input type="checkbox"/> Medication(s)		<input type="checkbox"/> IV/Fluid(s)		<input type="checkbox"/> Cardiac Monitor/AED	
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)					
<b>7. COMMUNICATIONS:</b>					
Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					
<small>*(NAC for digital radio system)</small>					
<b>8. EVACUATION LOCATION:</b>					
Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>					
Patient's ETA to Evacuation Location:					
Helispot/Extraction Size and Hazards:					
<b>9. CONTINGENCY:</b>					
<b>Considerations:</b> <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>			<b>REMEMBER:</b> <i>Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.</i>
