Subject: Tactical Pause to Discuss Risk on August 9th or 10th

As we enter the height of the 2017 Western fire season, we are constantly reminded the wildland fire environment is dangerous. Along with the increase in fire activity, there has been an increase in close calls, serious accidents, injuries, and fatalities. It is now August and long-term fatigue is becoming a factor in a number of Geographic Areas. Please refer to the attached document from the Wildland Fire Lessons Learned Center (LLC) listing a summary of accidents to this point in the season.

We ask you to take a tactical pause at some point on Wednesday, August 9th or Thursday, August 10th to discuss current risks to which you are exposed. The timing and length of this tactical pause is at your discretion. During this time ask yourself what, if anything, is different from your previous experience? What is concerning you specifically when it comes to your safety and those you work with or lead? What might you be missing? It is all too easy to be task oriented so take this opportunity to discuss some simple reminders or measures you can take to reduce your exposure to the inherent hazards of our occupation, which can reduce the probability of the next accident.

The attached document from the LLC also includes links that may prove valuable references for your discussion. If you or your personnel are in the field and do not have access to those links choose other references such as the Incident Response Pocket Guide (IRPG) to aid you. The value of this tactical pause will be in the discussions you engage in so make it count.

We also recommend that you review and discuss *Planning for Medical Emergencies* (page #2) and the *Medical Incident Report* (page #108-109), also referred to as the "9-Line", in your IRPG. Reviewing and discussing these job aids will better prepare you to respond to an accident or medical emergency if one does occur.

Finally, NMAC wants to be clear that we are asking you to take this time to discuss risk management because we care about your health and welfare. We all need to do everything we can to ensure our people return home safely at the end of each shift and each fire assignment.

Health & Safety Message

| Incident: Park, Arrastra, & Alice Creeks MT-HLF-000146, 166, 179 | Date/Op Period: Day/Night Shift 8/8 - 9/17 0600-0600 <i>0700-0700</i> |

Hazards & Risks

Air Operations: With air operations over the fire; both fixed and rotary wing aircraft, comes a unique set of hazards and risks. Reference the blue pages in your IRPG. Consider mission need and aviation risk factors. Establish good communications with the aircraft and ensure ground personnel are aware of drop zones during paracargo, retardant and water dropping operations.

Review Aviation Watch Out Situations!

Firing Operations: Firing operations (burn out) can be an effective tactical firefighting tool when done competently and safely. Ensure all personnel are briefed on work assignments, start and stopping points, escape routes and safety zones and anchor points. Monitoring weather trends and fire behavior are critical to a successful operation. Ensure there are sufficient personnel on hand to hold the line and react to spot fires. Maintain L.C.E.S. during the entire operation.

Thunderstorm Safety: The weather forecast calls for the potential for thunderstorm activity within the next couple of days. Monitor the weather while out on the line and listen for any weather updates from the Comm. Unit. Review your IRPG for thunderstorm safety precautions.

Today's Watch Out Situation to Consider:
15. Wind increases or changes direction.

Watch for changes in wind speeds and direction. Consider diurnal changes and plan for them!

INCIDENT SAFETY ANALYSIS 215a

Park, Arrastra and Alice Fires - Wednesday August 09, 2017

| 8. Location | 9. Hazard | 6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc) |
|---------------------------|---|---|
| ALL | Snags, Hazard Trees along roads and in all Division work areas. | The strategy for these fires is to minimize firefighter exposure to snags by avoidance and using mechanized equipment to fell and remove trees and fuel from roads/control lines. Fireline personnel must do a risk assessment before operating in areas with snags. Avoid snag concentration areas and avoid falling of hazard trees if possible, green trees may also be compromised. Brief incoming personnel of location/nature of hazardous trees. Use only certified, experienced fallers for chain saw operations to fell snags. Watch for snags where you park, take a break or sleep. Set "no work zones" to avoid hazard trees that cannot be removed or felled safely. |
| D,G,IA | Indirect Line, unsecured anchor points, unburned fuel between line and fire, steep terrain hampers view of fires and access to fires | LCES in place before engaging, ensure use of qualified lookouts, monitor fire behavior & Wx reports, set trigger points, drill for escape routes and safety zones. Use line scouts, air resources to help size up. Provide for EMT medical response and Safety Officer for each Division. Personnel will follow the 10 Standard Fire Orders and discuss the 18 Watch Out Situations during briefings and fireline operations. |
| ALL | Night Operations | <ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while on roadways. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp) ~ Watch for signs of fatigue ~ Take breaks away from areas of known hazard |
| Z,D,G | Ignition Operations | Ignite only with Operational Approval and after all adjoining resources notified, the required organization is in place and a contingency plan has been identified. All personnel are in required PPE. Keep personnel clear of aerial ignition zone. Establish clear communications and POC with Pilot and crew. |
| A,Z,D,G, IA, Contingency, | Wildland /Urban Interface. Burnout around structures and roads. Potential to expose FFs to HAZMAT. | Coordinate with Lincoln VFD. Prepare Structure protection plan, prep structures, reduce fuels, size up hazmat, low electrical lines, fuel tanks & remove safely if possible. Avoid unlabeled drums/barrels. Notify OPS, DIVS, SOFRs and adjacent resources before ignitions and if any problems areas. |
| ALL | Wildlife Encounters | Don't feed or approach wildlife, implement food storage security for bears, no food or in tents, drive defensively, use passengers for additional situational awareness, carry bear spray only after training, follow local District protocols and report any bear encounters. If you get Bear spray from your Division Supervisor, attend Bear Spray training training from the District READ before field work. |
| A,Z,D,G | Chipper Operations | Use only qualified operators, review and adhere to JHA recommendations, use proper PPE, maintain safety zone around chipper. |
| A,Z,D,G | Logging Operations using Feller Bunchers, Skidders, Log Trucks, Dump trucks, Forwarders, tenders- | Provide supervision. Use only qualified operators and inspected equipment. Review and adhere to JHA recommendations, use proper PPE, maintain 300 foot safety zone around working machines to prevent injuries and accidents. Do not sit or place tools on equipment. |

Correcting Biased Communication Patterns

With increased diversity there comes a need for increased sensitivity about how we talk to one another. We can offend someone by a slip of the tongue. Becoming more sensitive in our dealings with one another contributes to a better work environment.

The Human Resource Specialist (HRSP) is Alan Seago, (707) 315-6537. The HR tent is between the IC's tent and the gravel road.
