WEATHER DISCUSSION: ***Isolated Late Afternoon or Evening Thunderstorm***

A stationary front near the Continental Divide will once again provide the focus for isolated thunderstorms this afternoon and evening. Cloud buildups during the peak heating part of the day may lead to the development of a thunderstorm near the incident area. Thunderstorm development would be mainly confined to the 1500-2100 time frame. Any thunderstorm that passes within the vicinity of the incident area may contain **Gusty and Variable Thunderstorm Outflow Winds.**

WEATHER FORECAST FOR THURSDAY (DAY-SHIFT):

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Park, Arrastra and Alice Creek Fires | DATE: August 10, 2017 Day & Night Shift

Major Hazards and Risks: Please pay attention to the following hazards – Changes in fire behavior, firefighter fatigue, rolling material, snags, steep slopes and potential wildlife encounters. Watch speeds and traffic in and around camp as well as through town going to and from the incident.

Fire Order of the Day – Fight fire aggressively, having provided for Safety first.

Narrative:

Don't let your guard down and pay strict attention to your fire weather and fire behavior forecasts. Stay alert and don't become complacent! Watch your speed and drive defensively to from and around the incident. Drink plenty of water during your shift and pace yourself. When the fire ground is steep expect rolling material in most locations. Know who and what is above you and take your rest and lunch break in safety zones, free from rolling material and snags. Identify and mark snags and make their location known to all. Have a safe day!!

INCIDENT SAFETY ANALYSIS 215a

Park, Arrastra and Alice Fires - Wednesday August 09, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Snags, Hazard Trees along roads and in all Division work areas.	The strategy for these fires is to minimize firefighter exposure to snags by avoidance and using mechanized equipment to fell and remove trees and fuel from roads/control lines. Fireline personnel must do a risk assessment before operating in areas with snags. Avoid snag concentration areas and avoid falling of hazard trees if possible, green trees may also be compromised. Brief incoming personnel of location/nature of hazardous trees. Use only certified, experienced fallers for chain saw operations to fell snags. Watch for snags where you park, take a break or sleep. Set "no work zones" to avoid hazard trees that cannot be removed or felled safely.
D,G,IA	Indirect Line, unsecured anchor points, unburned fuel between line and fire, steep terrain hampers view of fires and access to fires	LCES in place before engaging, ensure use of qualified lookouts, monitor fire behavior & Wx reports, set trigger points, drill for escape routes and safety zones. Use line scouts, air resources to help size up. Provide for EMT medical response and Safety Officer for each Division. Personnel will follow the 10 Standard Fire Orders and discuss the 18 Watch Out Situations during briefings and fireline operations.
ALL	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while on roadways. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp) ~ Watch for signs of fatigue ~ Take breaks away from areas of known hazard
Z,D,G	Ignition Operations	Ignite only with Operational Approval and after all adjoining resources notified, the required organization is in place and a contingency plan has been identified. All personnel are in required PPE. Keep personnel clear of aerial ignition zone. Establish clear communications and POC with Pilot and crew.
A,Z,D,G, IA, Contingency,	Wildland /Urban Interface. Burnout around structures and roads. Potential to expose FFs to HAZMAT.	Coordinate with Lincoln VFD. Prepare Structure protection plan, prep structures, reduce fuels, size up hazmat, low electrical lines, fuel tanks & remove safely if possible. Avoid unlabeled drums/barrels. Notify OPS, DIVS, SOFRs and adjacent resources before ignitions and if any problems areas.
ALL	Wildlife Encounters	Don't feed or approach wildlife, implement food storage security for bears, no food or in tents, drive defensively, use passengers for additional situational awareness, carry bear spray only after training, follow local District protocols and report any bear encounters. If you get Bear spray from your Division Supervisor, attend Bear Spray training training from the District READ before field work.
A,Z,D,G	Chipper Operations	Use only qualified operators, review and adhere to JHA recommendations, use proper PPE, maintain safety zone around chipper.
A,Z,D,G	Logging Operations using Feller Bunchers, Skidders, Log Trucks, Dump trucks, Forwarders, tenders-	Provide supervision. Use only qualified operators and inspected equipment. Review and adhere to JHA recommendations, use proper PPE, maintain 300 foot safety zone around working machines to prevent injuries and accidents. Do not sit or place tools on equipment.

Human Resources

AVOID HORSEPLAY

HORSEPLAY is rough and rowdy play that does not contribute to a safe and productive work environment. Don't do it in fire camp or on the line.

The Human Resource Specialist (HRSP) is Alan Seago, (707) 315-6537. The HR tent is between the IC's tent and the gravel road.

Training Specialist

**FEAR DOESN'T KEEP YOU SAFE,
YOUR TRAINING WILL**

If you are a trainee utilize the QR code below or stop by DMOB/Resources and register with training. Capture the experience and complete a performance rating (ICS 225) and an evaluation record form and present them to training before DMOB.
