# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Park/Arrastra	OPERATIONAL PERIOD: 8/17/2017
DATE ISSUED: 8/16/17	TIME ISSUED: 1900
UNIT: HLF	SIGNED: Renee Henault, FBAN

## INPUTS

**WEATHER SUMMARY: \*\*\*Critical fire weather conditions \*\*\***

See attached fire weather forecast.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** The combination of a dry air mass and breezy winds has dropped fuel moistures- increasing spotting potential and fire activity. Watch for changes in wind direction today. Increased activity after inversion lifts.

The fire is burning in Lodgepole pine /Douglas fir /Ponderosa Pine stands; with the main carrier being 100-1000 hour dead and down. Some surface/live fuels are not fully cured, but will carry fire independently with the right wind conditions. Fuels are variable with aspect.

Fuel Model 10

	Low	Moderate	Active	Very Active	Extreme
Rates of Spread (Ch/hr)	2-3	4-7	8-12	13-18	19+
Flame Length	<4	4-5	6-7	7-8	8+
Max Spotting Distance (Mi.)	0-0.1	0.1-0.2	0.2-0.3	0.3-0.4	0.4-0.5

**Probability of Ignition:** 70% unshaded fuels 50% shaded

**FDPM predicted:** 5-9%

**10hr:** 6%

**1000 hr fuels** 8-14%

**ERC:** 58

**Watch for:** Eye level winds >6mph

**SPECIFIC:** Moderate-Very Active fire behavior expected today. Burn period 1200-1900. Poor humidity recoveries overnight. Group torching and short crown runs are possible, with continued spotting into very receptive fuels.

Divisions Z, A: Spot fires on the western face of Stonewall drainage will become active, continuing the fires progress to the east toward Div A.

Division D: Fire will continue to move toward the Stonewall drainage. Watch for adverse changes in wind direction today, with frontal passage.

Division G: Expect backing/creeping fire with the possibility of occasional torching wind prone areas will be more active as fire backs into Arrastra Creek.

### AIR OPERATIONS:

Inversion lifting around 10:30

Sunrise: 0630 hrs

Sunset: 2040 hrs

### SAFETY:

**Fine fuels will reach critical burning conditions today.**

### Hazards & Risks

**Weather Watches & Warnings:** Definitions: a **weather watch** is issued when the risk of a hazardous weather or hydrologic (rain, hail, snow, flash flooding, etc.) event has increased significantly, but its occurrence, location or timing is still uncertain.

A **weather warning** is issued when a hazardous weather or hydrologic event is occurring, is imminent, or has a very high probability of occurring. A warning is used for conditions posing a threat to life or property.

*Heed these watches & warnings and develop a contingency plan to seek shelter or evacuate the area in the event they occur.*

**Hazard Tree Safety:** Hazard tree indicators include:

- Trees burning for any period of time
- High risk tree species known for rot or shallow roots
- Numerous dead & downed trees
- Dead, broken, or burning tops & limbs overhead
- Accumulations of downed limbs around the base of the tree
- Absence of needles, bark or limbs
- Tree leaning or hung up

Look for these indicators not only in the fire area, but in the green too. Scout out your work area and identify these hazards prior to going to work.

## INCIDENT SAFETY ANALYSIS 215a

Park, Arrastra and Alice Fires - Thursday August 17, 2017

8. Location	9. Hazard	5. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Snags, Hazard Trees along roads and in all Division work areas.	The strategy for these fires is to minimize firefighter exposure to snags by avoidance and using mechanized equipment to fall and remove trees from roads and control lines. Fireline personnel must do a risk assessment before operating in areas with snags. Avoid snag concentration areas and avoid falling of hazard trees if possible. Brief incoming personnel of location/nature of hazardous trees. Use only certified, experienced fallers for chain saw operations to fall snags. Watch for snags where you park, take a break or sleep. Set "no work zones" to avoid hazard trees that cannot be removed safely.
D,G,IA	Indirect Line, unsecured anchor points, unburned fuel between line and fire, steep terrain hampers view of fires and access to fires	LCES in place before engaging, ensure use of qualified lookouts, monitor fire behavior & Wx reports, set trigger points, drill for escape routes and safety zones. Use line scouts, air resources to help size up. Provide for EMT medical response and Safety Officer for each Division. Personnel will follow the 10 Standard Fire Orders and discuss the 18 Watch Out Situations during briefings and fireline operations.
Z,D,G	Ignition Operations	Ignite only with operational approval and after all adjoining resources notified. Ensure the required organization is in place and a contingency plan has been identified. Ensure all personnel are in required PPE. In the event of aerial ignition keep personnel clear of ignition zone. Establish clear communications and POC with Pilot and crew.
A,Z,D,G, IA	Wildland /Urban Interface. Burnout around structures and roads. Potential to expose FFs to HAZMAT.	Coordinate with Lincoln VFD. Prepare Structure Protection Plan, prep structures, reduce fuels, size up hazmat, low electrical lines, fuel tanks & remove safely if possible. Avoid unlabeled drums/barrels. Notify OPS, DIVS, SOFRs and adjacent resources before ignitions and if any problems areas.
ALL	Wildlife Encounters	Don't feed or approach wildlife, implement food storage security for bears, no food or in tents, drive defensively, use passengers for additional situational awareness, carry bear spray only after training, follow local District protocols and report any bear encounters. If you get Bear spray from your Division Supervisor, attend Bear Spray training training from the District READ before field work.
A,Z,D,G	Chipper Operations	Use only qualified operators, review and adhere to JHA recommendations, use proper PPE, maintain safety zone around chipper.
A,Z,D,G	Logging Operations using Feller bunchers, Skidders, Log Trucks, Dump trucks, Forwarders, tenders-	Provide supervision. Use only qualified operators and inspected equipment. Review and adhere to JHA recommendations, use proper PPE, maintain 300 foot safety zone around working machines to prevent injuries and accidents. Do not sit or place tools on equipment.
