IRIN Comments on imagery: Northern portion of incident was not scanned		Weather at time of flight: Clear	Flight Objective: Identify and map Heat perimeter, Scattered Heat and Isolated Heat Sources
Date and Time Imagery Received by Interpreter: 09/08/2017 @ 0345 MDT		Type of media for final product: PDF map, zipped shapefiles and KMZ files Digital files sent to:	
Date and Time Products Delivered to Incident: 09/08/2017 @ 0415 MDT		http://ftp.nifc.gov/incident_specific_data/n_rockies/2017_fires/2017_PatrolRidge/IR/20170908	
Comments /notes on tonight's mission and this interpretation: Started interpretation with 20170906 @ 2107 perimeter. Could not interpret northern portion of incident. Growth since last IR is to the southeast into the Patrol Creek watershed. Scattered heat along the southeastern perimeter. Isolated heat sources were detected outside the perimeter, approximately 9 miles southwest, near the confluence of Meadow Creek and Three Prong Creek. This is not shown on the map but is included in the isolated heat, intense heat and perimeter shapefiles (the additional 2 acres is not included above in interpreted size).
