Date and Time Products Delivered to Incident: 09/03/2017 @ 0315 MDT			
Comments /notes on tonight's mission and this interpretation: Started with IR perimeter 20170903 @ 0017. Perimeters for Reef and Rice Ridge (incident to the south) have merged at Otis Creek, 1.5 miles downstream from Otis Lake. My interpretation stops at Otis creek and Rice Ridge interpretation picks up from there going south. Growth since the last IR has been to the east where the perimeter has crossed Young's Creek and Otter Creek, and reached Gust Mountain summit. There is spotting outside the perimeter into Hahn Creek watershed, along Otter, Cabin, and Delaware Creeks, and in the vicinity of Goat Mountain and Puma Peak.
