# **Bacon Rind Fire Incident Action Plan**

September 13-17, 2018 0600-2100 Custer Gallatin National Forest

# ICS Form 202

	1. INCIDENT NAME	2. DATE	3. TIME
INCIDENT OBJECTIVES	Bacon Rind	9/13-17/18	

- 4. OPERATIONAL PERIOD (DATE/TIME)
- 5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

### Leader's Intent:

The highest priority will be focused on minimizing risk to firefighters and the public by continually using the risk management process.

It is the expectation that every person assigned in any type of leadership role does a risk assessment and provides the appropriate mitigation measures prior to engaging in any activity. If a hazard cannot be mitigated to an acceptable level, the issue will be elevated to the next level.

# **Management Requirements:**

6. WEATHER FORECAST FOR OPERATIONAL PERIOD

- Ensure firefighter and public safety is the first priority in every operation.
- Maintain and develop relationships with adjacent communities, agencies, cooperators, concessionaires and other stakeholders while providing timely and consistent information coordinated with the USFS. A common message will be communicated through all channels.

# **Incident Objectives**

- 1. Minimize impacts to identified values at risk including Black Butte Ranch, Elkhorn Ranch, Highway 191, powerline corridors, and trail infrastructure.
- 2. Balance resource value with suppression impacts; where and when appropriate, allow fire to play its natural role in the wilderness ecosystem as a process of ecological change.
- Minimize impacts to natural and cultural resources, watersheds, and threatened and endangered species.
   Minimize suppression impacts in the Lee Metcalf Wilderness by allowing no mechanized equipment unless approved by the line officer.
- 4. Minimize potential bear/human interactions. All personnel assigned to the incident must comply with the Food Storage Special Order 36 CFR 261.58, in effect for the Greater Yellowstone Ecosystem (GYE).

\*See attached

7. GENERAL SAFETY MESSAGE Primary risk factors are remote aviation hazards.	*See attached and isolated work areas re	equiring a functioning communication system and
One of the greatest incident risks	s is driving Hwy 191. Be aw	are of your safety and public watching the fire.

# 7. CONTROL OPERATIONS

**Task:** Monitor fire progression and smoke impacts from Hwy 191; implement holding actions as needed along Hwy 191. Implement point protection on Black Butte Ranch and cultural sites. Assess any resources at risk ahead of predicted fire spread. Continue implementing fuels projects and providing lookouts as prudent.

Purpose: Provide for public and firefighter safety.

**End State:** Ensure efficient traffic flow on Hwy 191 and protect resources at risk.

# 8. SPECIAL INSTRUCTIONS

- Coordinate actions with other operational resources and law enforcement as needed.
- Monitor Management Action Points as necessary based on observed and modeled fire behavior to emphasize strategic planning and sound risk decision making.
- If fire spots east of Hwy 191 suppress with resources on incident.
- Do not draft out of the Madison River for the Bacon Rind fire; the Madison River water needs to stay in the Madison drainage and the Gallatin River water needs to stay in the Gallatin drainage due to aquatic invasive species!

# Fire Information

# **Bacon Rind Fire**

# September 9, 2018 10:00 am

# Current perimeter size:

Approx. 4,275 acres (8/9/18)

- 2,679 acres-Yellowstone National Park
- 1,597 acres-Custer Gallatin National Forest

# Location:

Approximately 20 miles south of Big Sky, MT and 23 miles north of West Yellowstone, MT.

# Date Started:

7/20/2018 lightning-caused

# Closures:

### Visit

https://inciweb.nwcg.gov/incident/5992/ for closures within Yellowstone National Park and the Monument Unit of the Lee Metcalf Wilderness in Custer Gallatin National Forest.

### Resources:

- 1 Twenty (20) person crew
- 1 Type 3 (light) helicopter
- 5 Type 6 engines

# **Cooperating Agencies:**

- Custer Gallatin National Forest
- Yellowstone National Park
- Gallatin County, MT
- Montana Department of Transportation

### Summary:

On Saturday blustery weather brought a small amount of rain on parts of the fire and winds maintained modest fire behavior to the northwestern and southwestern edges. The fire remains active on the southern flank, moving west of Migration Creek and bumping up against the Ernest Miller Ridge to the southwest. It also has reached the 2003 Rathbone Fire Area on southeast edge. To the north the fire continues to clean up dead and down trees just over the ridge into the Monument Creek Drainage.

New closures: (See attached map)

Yellowstone National Park

- This includes Gallatin River access along Highway 191 within Yellowstone National Park from the north park boundary south to the Fawn Pass Trailhead.
- The Fawn Pass Trail from the intersection with the cutoff from the Bighorn Pass Trail to the east has reopened. ALL other trail closures remain in place.

# Custer Gallatin National Forest

 Access is closed to Forest Service System Land north of the Monument Unit of the Lee Metcalf Wilderness to the Gallatin River and west to include Trails 151 and 191.

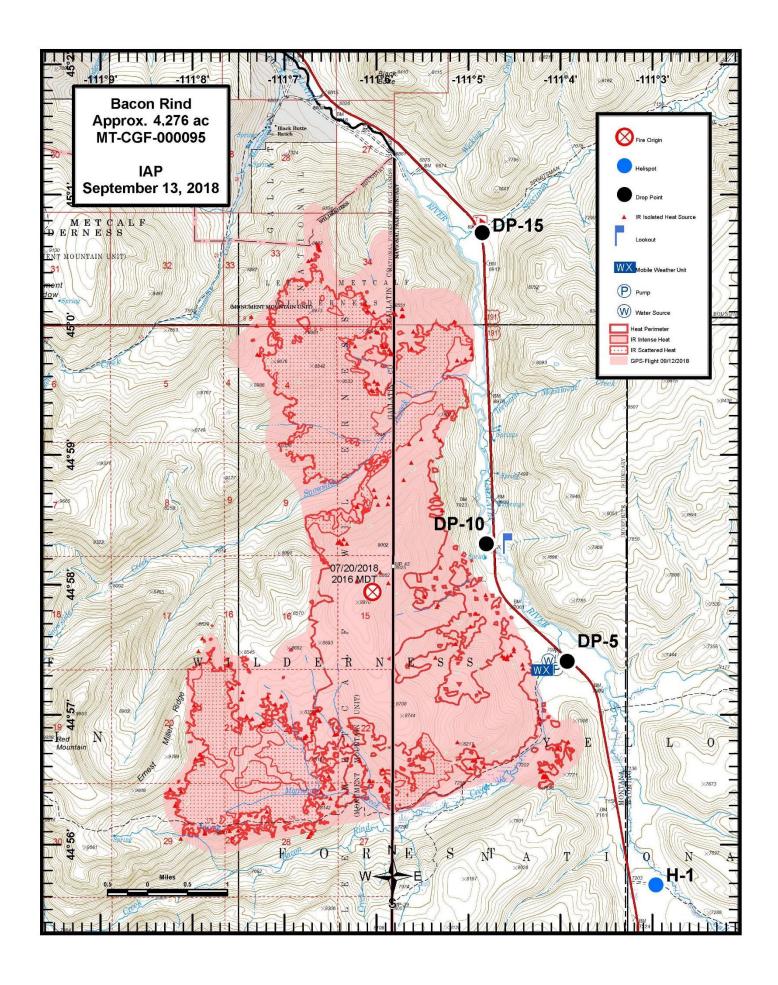

**Highway 191 is open**, and drivers are reminded that the speed limit through the fire area is **45 MPH**. Fire and smoke may be visible along the roadway so please be cautious when driving and stay alert for firefighters and their vehicles. Fire information is available at open designated pullouts. Do not stop along the shoulder of the road.

Fire has continually shaped the vegetation in the Greater Yellowstone Ecosystem and helps maintain the natural process in the area. Fire creates diverse habitat and recycles nutrients back into the soil. The plant and animal life we see and enjoy is partially benefited as a result of fire. The Bacon Rind Fire is burning in an area that has not experienced extensive fire in the last 150 years.
