Bacon Rind Fire Incident Action Plan

Sunday August 12, 2018 Custer Gallatin National Forest

Uninformed on Strategy, Tactics or Hazards

Firefighters who are uninformed on strategy, tactics, or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics, or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics, or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire
 (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the
 spotter on a smokejumper airplane). Discuss what types of hazards you might come across
 and ways you would mitigate them. For example, arriving at a fire after dark and a being
 instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics or hazards changed since last informed? Discuss situations that might
 alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.).
 Also, think about what new hazards can develop while you are on the fireline (e.g., roots
 burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
 - o To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics, and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the Incident Response Pocket Guide standard briefing

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 16	TYPE OF FIRE: Wildfire
FIRE NAME: Bacon Rind	OPERATIONAL PERIOD: August 12, 2018
DATE ISSUED: August 11, 2018	TIME ISSUED: 1800
UNIT: MT-CGF	SIGNED: (s/ Todd Erdody, Todd Erdody, LTAN (t)

INPUTS

WEATHER SUMMARY: (For full forecast refer to the Spot Forecast)

Today: Mostly sunny with isolated thunderstorms in the afternoon. Max Temp: 73-78 degrees Min RH: 19-24%

Afternoon 20 ft. Winds: Southwest 5-15 mph, Ridgetop: Southwest 15 to 25 mph. Haines Index: 5 (Moderate potential for large fire growth)

Tonight: Partly cloudy. Low Temp: 45-50 degrees Max RH: 52-57% Winds: West 5 to 20 mph

Monday: Mostly sunny. Max Temp: 68-73 degrees Min RH: 23-28% Winds: Northwest to west 10 to 20 mph.

OUTPUTS FIRE BEHAVIOR

GENERAL:

Today will look similar to yesterday but fire behavior may be tempered by higher humidity and cloud cover. Expect group torching with short range spotting (<0.2 mile). Spotting up to 0.4 miles is possible with higher wind speeds. There is still potential for growth through longer range spotting from thunderstorm outflow winds. With a Haines index of 5, keep up your situational awareness.

Mixed conifer (Fuel Models TU5 and TL4): ROS - 0 to 8 ch/hr, FL - 0 to 10 ft

SPECIFIC:

North side of fire: If fire in upper snowslide drainage becomes aligned with the wind, spot fires could become established further downslope and to the northeast, closer to Highway 191. However, wetter fuels at lower elevations could limit fire activity.

West side of fire: With strong winds out of the south to southwest, fire on the west side could cross the snowslide drainage approximately 1.5 to 2 miles up canyon from the confluence of the Gallatin river.

AIR OPERATIONS: Not Applicable

SAFETY

Be cautious around fire-weakened trees and existing snags, especially with outflow winds from thunderstorms.

Stay hydrated!

MEDICAL PLAN(ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

"MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH. Usethe following items to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." ☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, discriented. Severity of Emergency / Transport YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Priority Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.

Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location E	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

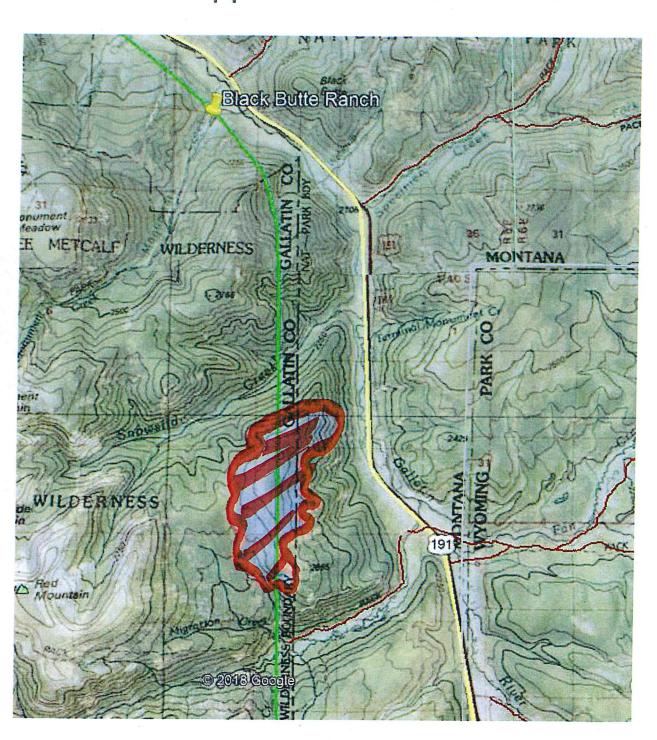

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Tone/N Tone/NAC * Function Channel Name/Number Receive (RX) Transmit (TX) AC * COMMAND AIR-TO-GRND TACTICAL

- 7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.
- 8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
